SPACE RESEARCH

SPACE research has progressed very fast since the first man-made satellite 'Sputnik' was put into orbit by Russia in 1957. The United States followed up and launched 'Explorer I' into space in 1958. Many other countries, namely, France, Canada, Britain, Japan, West Germany, Italy, China and Australia have joined the space race.

The Indian Space Programme began in 1962 when the **Indian National Committee for Space Research** (INCOSPAR) was formed in the Department of Atomic Energy of the Government of India. In 1969, the **Indian Space Research Organisation (ISRO)** was created to plan, manage and execute the nation's growing activities in Space Science, Space Technology and Space Applications.

The Government of India established the Space Commission in June 1972, backed by the Department of Space (DOS) and entrusted DOS with the responsibility for conducting India's space programme. ISRO functions under DOS as its research and development organisation.

The Space Commission, the Department of Space and the Indian Space Research Organisation have their Headquarters in Bangalore.

The primary aims of the Indian Space Programme are the applications of space science and technology to further national developmental objectives in mass communication and education via satellites; the survey and management of natural resources through remote sensing technology from space platforms and the development of space technology with the maximum degree of self-reliance.

The activities of ISRO are carried out at the following centres. (1) **Vikram Sarabhai Space Centre** (VSSC), Trivandrum, Kerala; (2) **Auxiliary Propulsion System Unit** (APSU), Trivandrum, Kerala; (3) **ISRO Satellite Centre** (ISAC), Bangalore, Karnataka; (4) **SHAR Centre,** Sriharikota, Andhra Pradesh and (5) **Space Application Centre** (SAC), Ahmedabad, Gujarat.

In addition, DOS provides major support to the **Physical Research Laboratory** (PRL) at Ahmedabad which is India's prime centre for research in space sciences. The National Remote Sensing Agency (NRSA) at Hyderabad functions as an autonomous registered society, mainly supported by DOS. NRSA utilises modern remote sensing techniques for assisting in the planning and management of the country's natural resources and provides operational support to various users.

Vikram Sarabhai Space Centre (VSSC): Named after the late Prof. Vikram A. Sarabhai, the founder of the Indian space programme, VSSC encompasses work related to the development of sounding rockets and satellite launch vehicles, scientific and technological payloads, ground-based and vehicle-borne instrumentation and production facilities for propellants and rocket hardware. VSSC is also responsible for building and launching the **Menaka** and **Rohini** (including **Centaure**) series of sounding rockets for meteorological and scientific investigations of the upper atmosphere. India's first **satellite launch vehicle SLV-3,** successfully launched on July 18, 1980, was developed at this centre. This four-stage, solid propellant rocket placed a 35-kg indigenous Rohini Satellite (RS-1) into a near-earth orbit and all the systems of SLV-3 worked satisfactorily. The SLV-3-D2 was successfully launched on April 17, 1983. The vehicle incorporated an improved fourth stage kevlar motor, and introduced 18 major improvements/modifications/optimisations after detailed reviews, simulations and tests. The 22.7-metre-long SLV-3 is being augmented with strap-ons to achieve a vehicle (ASLV) capable of putting 150 kg class satellites into a low earth orbit. As a follow-up to ASLV, development of a Polar Satellite Launch Vehicle (PSLV) capable of putting a 1000-kg class satellite into a 900 km sun-synchronous polar orbit is also on the anvil.

The Space Science and Technology Centre (SSTC) of VSSC is the main research and development laboratory. Solid propellant for the rockets is produced at the Rocket Propellant Plant while the rockets and other hardware are made at the Rocket Fabrication Facility (RFF). The Propellant Fuel Complex (PFC) produces special materials required for the processing of propellants. Liquid propellants for rockets have also been developed on a laboratory scale. An experimental plant for the production of Ammonium perchlorate used as oxidiser in solid propellants has been set up at Alwaye, Kerala.

VSSC operates and maintains the **Thumba Equatorial Rocket Launching Station** (TERLS) which has been recognised by the United Nations Organisation (UNO) as an international facility for sounding rocket experiments to investigate problems of meteorology and ionosphere over the geomagnetic equator running close to Thumba and for other experiments. Since November 1963, when the range became operational, more than 1,500 sounding rockets of different makes have been launched for meteorological, ionospheric, aeronomic and astronomical studies. Scientists from Bulgaria, France, Federal Republic of Germany, Japan, the U.K., the USA and the USSR have participated, in co-operation with their Indian counterparts, in many of these experiments. APSU has the primary responsibility of designing, developing and supplying the propulsion control packages for launch vehicles and satellites.

ISRO Satellite Centre (ISAC) is responsible for the design, fabrication and integration of spacecraft and the development of satellite technology. The first Indian satellite, **Aryabhata,** named after the famous ancient Indian astronomer and mathematician, was designed and fabricated by this Centre. This 360-kg satellite was launched on April 19, 1975 into a near-circular orbit of 600 km at an inclination of 51^0 to the equator from a Soviet Cosmodrome using a Soviet Intercosmos rocket. The spin-stabilised satellite survived in orbit well beyond the design lifetime of six months.

With the launching of Aryabhata, India has acquired indigenous capability in satellite technology, namely, to design and fabricate a space-worthy system and evaluate its performance in orbit, evolve the methodology of conducting a series of complex operations on the satellite and set up the necessary receiving, transmitting and tracking systems besides the establishment of the infrastructure for fabrication of satellite systems.

The second Indian satellite, **Bhaskara**, was launched on June 7, 1979, from a Soviet Cosmodrome, for earth observations. The 444-kg experimental satellite named after an ancient Indian astronomer, was designed and built by ISRO. It contained sophisticated instruments for carrying out remote sensing experiments over India, using TV cameras and microwave radiometers. Bhaskara experiments are useful in the fields of forestry, hydrology, snow-cover and snow-melt, geology, soils, land use and ocean surface studies. The orbital period of the satellite was 95.2 minutes and the inclination 50.7^0. The maximum height of orbit above surface of earth (apogee) was 557 km and the minimum height (perigee) 512 km.

An improved version of **Bhaskara** with a wider scanning was launched on 21st November 1981.

Rohini Satellite (RS/D1) went into orbit on May 31, 1981 at the head of SLV-3-D1 launcher.

Rohini Satellite (RS/D2): The 41.2 kg Rohini D-2, third in the Rohini series, was put into orbit by the SLV-3 vehicle on April 17, 1983. The Rohini D-2 carries a smart sensor, capable of classifying ground features such as water, vegetation, bareland, cloud and snow through onboard processing of data.

Stretched Rohini Satellite Series (SROSS): The SROSS project envisages the development of spacecraft of 150-kg. class for launch on ASLV and on-orbit operations of spacecraft and experimental payloads pertaining to scientific, technological and remote sensing missions. Both 3-axis-stabilised and spin stabilised configurations are envisaged.

Apple Satellite: India's first three axis body stabilised geostationary experimental satellite, Apple, developed here was launched on 19th June 1981 using the third Ariane launch vehicle of the European Space Agency (ESA). The spacecraft weighing about 670 kg will provide India expertise in the technology necessary for the building and operation of geo-stationary satellites. While the communication payloads of the satellite were built at SAC (Space Applications Centre), important subsystems like ABM (Apogee Boost Motor) and secondary propulsion systems were built at VSSC. Under Apple project, a series of experiments aimed at speeding up the tempo of space communications in India is being carried out.

Indian Remote Sensing Satellite (IRS): Space-based remote sensing of natural resources being one of the major goals of ISRO, efforts are underway to develop an operational 900 kg class Indian Remote Sensing Satellite (IRS) by mid-eighties. The spacecraft will need to be placed in sun-synchronous near polar orbit at a nominal altitude between 550 km & 1,000 km, the orbit depending on the mission requirement. An agreement has been signed between ISRO and Licensintorg of USSR for the launch of first IRS on a Soviet launch vehicle.

SHAR Centre: The SHAR Centre at Sriharikota island, off India's east coast, is about 100 km. north of Madras city. It is being developed as a range for launching bigger satellite launch vehicles like ASLV and PSLV. India's first satellite launch vehicle SLV-3 was launched from here.

A comprehensive test facility for conducting various ground tests of rocket motors and subsystems has been set up at Sriharikota. Also, it has a large propellant production plant called SPROB. This is being augmented for PSLV programme.

The ISRO Telemetry, Tracking and Command Network (ISTRAC) which has been set up to manage the telemetry and telecommand network of ISRO has supported all ISRO missions such as Aryabhata, Bhaskara and RS-1 with its network stations at SHAR Centre, Ahmedabad, Car Nicobar and Trivandrum.

Space Applications Centre (SAC) is engaged in the planning and execution of the space application projects of ISRO. Its objective is to apply space science and technology to practical uses. To achieve this goal SAC has taken up work in telecommunications and television broadcasting and reception via satellites; use of remote sensing techniques to survey natural and renewable earth resources; studies in space meteorology and satellite geodesy.

This Centre conducted the **Satellite Instructional Television Experiment** (SITE), the year-long (August 1st, 1975 to July 31st, 1976) experiment in direct broadcast of television programmes via the NASA satellite, ATS-6. During the experiment, community TV sets were installed in 2,400 villages in Rajasthan, Bihar, Orissa, Madhya Pradesh, Karnataka and Andhra Pradesh and instructional programmes were beamed directly via the satellite.

Under an agreement between ISRO and the Symphonie organisation, one of the two transponders aboard the Franco-West German Symphonie satellite with a bandwidth of 90 MHz, was made available for Indian experiments in satellite telecommunications for two years, beginning from June 1977. Known as the **Satellite Telecommunications Experiments Project** (STEP) this two year project was taken up by ISRO in collaboration with the Posts and Telegraphs (P & T) Department of the Ministry of Communications. Under STEP, experiments in remote area communications using transportable terminals, radio-networking, emergency communications, digital communications, multiple access, integration of satellite circuits into terrestrial net-works and multiple audio-video transmissions were conducted. The project was mainly aimed at providing a system test of geo-synchronous communication satellite and to sharpen India's expertise in the design, development, fabrication and operation of communication systems involving geo-stationary satellite.

The ground network for STEP consisted of the following: The earth stations at Ahmedabad, Delhi and Madras, Transportable Remote Area Communication Terminal (TRACT) and the Emergency Communication Terminal (ECT).

Except for the Madras Earth Station, the modification, fabrication and operation of all other earth stations were the responsibilities of ISRO. ISRO was also responsible for fabricating the antenna system and the high-power amplifier for the Madras Earth Station. TRACT was fabricated at SAC and was tested with ATS-6 in July 1976. ECT, a miniaturised and ruggedised communication system, is mounted on a jeep in such a way that it can be detached easily and the whole unit air-lifted in emergencies like natural calamities when the terrestrial communication system is disrupted.

One important area of SAC activity is the remote sensing of natural and renewable resources. ISRO and the Indian Council of Agricultural Research (ICAR) conducted, during 1974-75, a joint experiment called the **Agricultural Resources Inventory and Survey Experiment** (ARISE), employing remote sensing techniques, to assess crops and land-use pattern in Anantapur district of Andhra Pradesh and Patiala district of Punjab.

The remote sensing techniques are being applied for a wide range of purposes such as collection of data relating to agriculture (crop vigour, crop census, classification of soil, etc.), detection of minerals, management of water resources, forest inventories and meteorological studies. SAC is developing sensors for use from balloons, aircraft and spacecraft to collect data for these applications. Some of these sensors are: infra-red scanner, multispectral scanner, microwave radiometer and the vidicon TV camera.

About ten remote sensing experiments have so far been conducted to study aspects of agriculture and landscape features over sites in Pune, Bombay, Sriharikota island, Jaipur, Bangalore, Anantapur district in Andhra Pradesh, Patiala district in Punjab and Panchmahals district in Gujarat.

INSAT: The Indian National Satellite System (INSAT) is a joint venture of the Dept. of Space, the ministries of Communications, Tourism and Civil Aviation and Information and Broadcasting. The INSAT system is multi-purpose operational space system providing telecommunications, meteorology and television services from a common satellite in geostationary orbit. The proposed system envisages a very significant telecommunications component providing for long-distance telephony, communication with remote areas and islands and emergency communications. The meteorological capability includes 24-hour observation of weather system, data collection and relay from remote, unattended platforms and a disaster warning. Television capability relates both to direct TV broadcasting from satellite to community TV sets in rural areas and to radio networking.

The two INSAT-1 spacecraft are being provided by Ford Aerospace Communications Corp. (FACC) under a contract from DOS.

The first INSAT-I satellite, INSAT-1A, was successfully launched on 10th April 1982. However, a series of malfunctions/anomalies in orbit led to its deactivation on 6th September 1982. The restoration of INSAT-1 system operating capability has been restored with the launching of the INSAT-IB Satellite in 1983.

Ahmedabad Earth Station (AES): SAC operates the Ahmedabad Earth Station (AES), Ahmedabad, which is an international Centre for training in satellite telecommunications technology.

STARS: The Satellite Tracking and Ranging Station (STARS) came into operation on January 23, 1977 at Kavalur in Tamil Nadu. In addition to the tracking cameras there is a Ranging Laser at the station. This facility is used to determine orbits of satellites. The data collected by this station will be useful for geodetic purposes.

PRL: The Physical Research Laboratory has been the cradle of space science in India and is being further developed as a national centre in this field. Its activities are supported mainly by DOS. PRL conducts basic research in many areas of space sciences for understanding the structure and dynamics of the earth's upper atmosphere, the solar terrestrial relationships, plasma physics and astrophysical problems. For these studies, data are collected through laboratory experiments, ground-based observations and measurements with rocket-borne instruments. PRL participates in many rocket-borne experiments at TERLS. It also uses data received from various orbiting scientific satellites of other countries. Investigations on lunar samples and meteorites and laboratory studies of plasma for understanding certain ionospheric phenomena and astrophysical problems are also conducted. Climatological, archeological and hydrological studies are also undertaken.

Sponsored Research: Various universities and academic institutions in the country are identified and encouraged by ISRO to undertake research and development studies in Space Science, Space Technology and Applications relevant to the Indian Space Programme.

ENERGY

ENERGY is an essential input to all productive economic activity and the process of economic development inevitably demands increasingly higher levels of energy consumption. The present per capita commercial energy consumption in India is only about a tenth of the global average reflecting the country's low level of income. While India, in common with many developing countries, consumes energy in a variety of forms ranging from electricity obtained from nuclear fuels to agricultural waste and animal dung, the pattern of commercial energy consumption is characterised by a high degree of oil dependency, the share of oil products (measured in coal replacement terms) being close to fifty per cent. Just when the Indian economy had managed to adjust itself to the oil price increases of 1973-74 there has been a threefold increase in oil prices in the last years. Apart from the heavy strain this will cast on the country's balance of payments, even the physical availability of oil in the international markets will pose a problem in the years to come. This means that if India's plans of economic growth are not to be hampered by inadequacies of energy supply, reduced dependence on imported oil has to be a key element in our development strategy. The main elements of such strategy are as follows:

(1) Accelerated exploitation of domestic conventional energy resources—oil, coal, hydro and nuclear power; (2) management of oil demand; (3) energy conservation: (4) exploitation of renewable sources of energy like energy forestry and biogas, specially to meet the energy requirements of rural communities: and (5) intensification of research and development in emerging energy technologies.

The energy sector of the plan is geared to implement this basic strategy.

The total commercial energy consumed increased five-fold during the last 25 years. Between 1953-54 and 1975-76, the annual growth rate in commercial energy consumption was 6.78 per cent as against the GDP growth rate of 3.68 per cent, the GDP-energy elasticity co-efficient has remained stable at around 1.8 and is high compared to developed countries. Firewood, agricultural waste and animal dung (which are commonly referred to as non-commercial forms of energy) continue to contribute a substantial proportion of the total energy consumed in the country, though reliable data on the extent and pattern of their use are not available. Rough estimates indicate that between 40 and 45 per cent of total energy consumed is still accounted for by non-commercial fuels.

The household sector in India is the largest consumer of energy accounting for about 50 per cent of the total energy consumption. Most of the energy used in this sector is in the form of non-commercial energy. Of the total of 5.7 lakh villages, about 2.5 lakh villages have been electrified, but the percentage of households electrified is about 14 per cent only.

The industries sector has the largest consumption of commercial energy (about 38.5 per cent). What is more, the intensity of energy use in this sector has been rising sharply mainly on account of higher electricity consumption. The electricity consumed per rupee of value added went up sharply from 0.54 kwh in 1960-61 to 1.02 kwh in 1975-76. The relatively high proportion in the industry mix of power-intensive primary metal industries in the initial stages of industrialisation and substitution of other energy forms by electricity appear to have controlled to the high electricity intensity.

Conventional energy technologies are characterised by long gestation periods. It takes even longer to bring about significant changes in the pattern of energy consumption. Appropriate policy and investment decisions have therefore to be taken without loss of time if the country is to meet the challenge which the energy problem will pose in the coming decades. This concern is reflected in the increased allocation made in this Plan for accelerated exploitation of India's demestic resources of oil, coal, hydro and nuclear power. The scale of the energy forestry and bio-gas programmes is being expanded sharply. Funds have also been provided for a more intensified research, development and demonstration effort in the area of renewable energy technologies, as also for a more efficient harnessing of animal energy. The details of the programmes and schemes are set out in the sections which follow. As for measures of energy conservation, the need is not so much for Plan investments as for appropriate fiscal policies and establishment of institutional mechanisms for regulation, extension and training. These will be pursued during the Plan period.

IRRIGATION

The main thrust of the development policy for irrigation sector during the Sixth Five-Year Plan (1980-85) is towards achieving the target of 113 million hectares of gross irrigation potential in the country by the turn of the century. Of this 58 million hectares have to be contributed by major and medium irrigation projects and the rest by minor surface irrigation works and groundwater. So far, however, 24.48 million hectares of irrigation potential has been created by major and medium schemes upto June, 1982, leaving a balance of 29.5 million hectares and 32.85 million hectares by minor schemes leaving a balance of 22.15 million hectares.

The Sixth Five-Year Plan, target for creation of additional irrigation potential is 13.74 million hectares in the five year period, i.e. about 2.75 million hectares on an average every year.

Water potential: India is endowed with substantial water resources. The total water resources of the country are assessed at 178 million hectares metres (1,442 MAF). However, on account of limitations of physiography, topography, geology, dependability and the present state of technology, only a part of this can be utilised.

The land area that can ultimately be irrigated has been assessed to be 113 million hectares as against possible gross cropped area of 200 million hectares on full development of irrigation potential. Thus, on present assessment, it may not be possible to provide irrigation facilities to the entire cultivated area in the country. National Water Perspective envisaging construction of storage reservoirs of optimal capacity and of inter-linking the various river systems has been evolved which can enable irrigation of an additional 35 million hectares, generation of 40 million K.W. of power and provide inland navigation, flood control and other multipurpose benefits.

Progress of irrigation development: Prior to 1951 the total area irrigated in the country was 22.6 million hectares (9.7 million hectares from major and medium irrigation projects and 12.9 million hectares from minor schemes both surface and ground). The irrigation potential increased to 52.1 million hectares by the end of the Fifth Plan in 1977-78 (out of which 24.8 million hectares was from major and medium irrigation projects and 27.3 million hectares from minor schemes). Between 1978 and 1980, an additional potential of 4.5 million hectares was created (1.8 million hectares from major and medium irrigation and 2.7 million hectares from minor schemes). The aggregate irrigation potential to the end of 1979-80, i.e. the beginning of the Sixth Plan, was 56.6 million hectares. During 1980-82, an additional potential of 4.7 million hectares has been created, bringing the aggregate to 61.3 million hectares. The target of 1982-83 is 2.345 million hectares.

Programme for 1982-83: During 1982-83, an outlay of Rs. 1,582 crores was approved by the Planning Commission for major and medium irrigation schemes with a target of creating an additional potential of 0.895 million hectares. A review of the irrigation development so far and the programme for 1982-83 was taken during August-September, 1982. It is anticipated that the target of 0.895 million hectares of additional potential will by and large be achieved.

Minor irrigation: Minor irrigation programme includes ground water development through construction of dugwells, private shallow tubewells, deep public tubewells, boring and deepening of dugwells etc. and small surface water development works through diversion schemes, storage schemes and lift irrigation projects, each having cultivable command area not more than 2000 hectares.

POWER

Resources of Power Development: *Coal:* Coal is the most important source of commercial energy in India. Assessment of coal reserves of the country is being made on a continuous basis by the Geological Survey of India through regional mapping and exploratory drilling. Various agencies, state governments and private parties also undertake assessment of reserves in some coal fields. Taking into account the development in the technologies and emerging energy situation the total coal reserves of the country have been estimated at 111,628 million tonnes comprising of 89,075 million tonnes of non-coking variety and 22,553 million tonnes of coking variety.

The use of coking coal is confined to metallurgical purposes. The up-grading of coking coal for use in the Steel Plant leaves behind considerable quantity of middlings which are used mainly for power generation. The poor quality of non-coking coal makes it suitable mainly for power generation with power stations close to pit-heads. The production of coal is anticipated to be stepped up to 165 million tonnes by the end of the Sixth Plan.

Oil and Natural Gas: Though Indian has a large sedimentary basin and prognostic studies of available geological data have indicated sizable reserves of oil and gas, the established reserves are still small. The present balance recoverable resources of crude oil are placed at 370 million tonnes and that of natural gas at about 350 million cubic metres.

It is estimated that the demand for petroleum products may reach a level of 45.5 million tonnes by 1984-85. While the exploration and development of new wells would be given greater emphasis, it is anticipated that we would continue to be dependent on import of oil in the coming years to a large extent. Therefore, along with increased emphasis on indigenous development the policy also envisages curbing demand for oil by suitable conservation measures and taking action to switch over to alternative fuels, wherever possible.

Hydro Power: Hydro-electric projects have a very significant role to play in the context of the massive power development programme which has been envisaged, both from the point of view of providing replenishable, clean and reasonably cheap source of energy and from the point of view of exploiting the enormous potential available in the various river valley systems. The Himalayan Region and the North-Eastern Region of the country hold very good prospects for hydro power development. Similarly with the award of the Narmada Waters Disputes Tribunal, it is likely that potentially good sites in this river system would become available for exploitation. In the Southern region of the country also there are some good sites that remain to be exploited.

Re-assessment of hydro potential: The hydro-electric potential in this country was originally assessed in 1953-59 by the Power Wing of the erstwhile Central Water & Power Commission at about 42 million kW at 60 per cent load factor and annual generation of 222 TwH. This study did not include assessment of secondary energy as well as the theoretical potential. Subsequently, in October 1977, a scheme for re-assessment of the hydro potential in the country has been sanctioned at a cost not exceeding Rs. 3 million. This scheme aims at the re-assessment made in 1953-59 and while doing so it is proposed: (a) that the annual energy contribution both for dependable and average conditions would be computed, (b) that possible pumped storage schemes would be identified and (c) the gross theoretical potential as well as economic potential would be determined. On a rough calculation on the basis of data compiled, the total hydro potential in the country has been tentatively assessed to be over 45 million kW at 100 per cent load factor, 75 million kW at 60 per cent load factor and nearly 150 million kW at 30 per cent load factor.

Investigations: The bulk of the hydro potential in the country is available in the North-Western and North-Eastern areas, particularly, in the states of Himachal Pradesh, J & K and North-Eastern States. The survey and investigation of hydro-electric schemes are generally done by the state authorities. However, the state authorities have not been able to accord adequate priority in this regard due to the constraints on availability of fiscal resources and technical expertise. In order to combat this problem and to have a shelf of well investigated projects, the Central Government has also been participating in the programme of investigations of hydro-electric sites in J & K, Arunachal Pradesh, Sikkim and Mizoram. Investigations in these states are being carried out by the Central Water Commission (Department of Irrigation), NHPC and North-Eastern Electric Power Corporation. In addition, the state governments are also being given Central assistance in the form of grants-in-aid for the survey and investigation of hydro-electric projecs in hilly and backward areas.

Presently, 70 hydro-electric schemes are in different stages of implementation. It is proposed to increase the proportion of hydro power in the installed capacity by giving more priority to hydro projects both in the state sector as well as in the Central sector. In this connection, 87 new hydel projects with total installed capacity of 16963.5 MW have been indentified for construction during the period 1980-85.

In order to expedite construction of hydro-electric projects, close and effective monitoring systems have been set up in CEA, NHPC and the Ministry of Energy. It is also proposed to take up large hydro-electric projects in the Central Sector for execution by the NHPC and North-Eastern Electric Power Corporation (NEEPCO), which are being strengthened and streamlined with a view to expediting the construction of these projects. The National Hydro-electric Power Corporation is currently executing the following projects:

Project (State)	Installed capacity
Baira Suil (HP)	3 × 60 MW
Salal (J & K)	3 × 115 MW
Loktak (Manipur)	3 × 35 MW

The North-Eastern Electric Power Corporation is executing the Kopili (Assam) project with an installed capacity of 2 × 50 MW + 2 × 35 MW.

In addition to the above, the under-mentioned hydro-electric projects have been taken up in the Central sector for investigation/execution through the National Hydro-electric power Corporation:—

Project (State)	Installed capacity (MW)
i) Koel Karo (Bihar)	710
ii) Dul Hasti (J & K)	390
iii) Kol Dam (HP)	600
iv) Chamera (HP)	640
v) Parvati (HP)	1,900
vi) Eastern Ramganga (UP)	80
vii) Dhauliganga (UP)	900
viii) Gauriganga (UP)	450

The north-Eastern Electric Power Corporation is also investigating the under-mentioned four projects in the North-Eastern region:—

Project (State)	Installed capacity (MW)
i) Ranganadi (Arunachal Pradesh)	500
ii) Damwe (Arunachal Pradesh)	400
iii) Papu (Arunachal Pradesh)	80
iv) Tuivai (Mizoram)	200

Nuclear Power: The nuclear power development in the country was initiated at Tarapur (420 MW) based on the boiling water reactor technology which requires enriched uranium. Subsequently, three nuclear power plants, with pressurised heavy water reactors using natural uranium were taken up in Rajasthan (440 MW), Kalpakkam (470 MW) and Narora (470 MW). The 2 x 220 MW units at RAPP and the Kalpakkam unit have been commissioned.

During the Sixth Plan discussion, the Planning Commission agreed in principle for commitment of work on six more reactors of 235 MW each during the current Plan period. Financial sanction for two units of 235 MW each at Kakrapar in the Western Region has also been accorded.

Geo-Thermal Energy: The activities in the geo-thermal field in the country are directed towards locating promising hydro-thermal reservoirs for power generation and other possible uses of the heat energy. Based on the preliminary geological and geo-chemical studies, two experimental projects, viz., one at Parbati Valley in Himachal Pradesh with the assistance of UNDP and the other called 'Puga Geothermal Assessment Project' in the Puga Valley in J & K have been undertaken to make a detailed assessment of geo-thermal potential.

Drilling rigs and accessories have since been shifted to the drilling site in the Parbati Valley. With a view to obtaining a plausible three-dimensional model of the Manikaran geo-thermal system, large-scale geo-thermal mapping was carried out over an area of 0.7 sq. km. in the Manikaran Area. Since the expected resource temperature of about 150^0 C is not considered adequate for direct power generation using geo-thermal fluids, the feasibility of generating power using binary cycle scheme is being examined. During 1982-83, direct applications of geo-thermal energy for local uses are proposed to be studied.

Geo-scientific investigations including geological mapping, hydro-geological mapping, plane-table mapping, glaciological studies were continued in Puga Valley during 1981-82. Major items of equipment for geo-thermal drilling have also been shifted to the site. During 1982-83 it is proposed to continue the geo-scientific investigations.

Based on the preliminary investigations and taking into account the recommendations of a UNDP expert, the possible area where tidal range is fairly high and where tidal power could be developed are in the Gulfs of Kutch and Cambay along with the West Coast and in the Sunderban areas along the East Coast. A proposal to take up investigations and studies to establish the feasibility of power generation from tidal waves in the Gulf of Kutch at an estimated cost of Rs. 218 lakhs has been approved.

The scheme is estimated to afford an energy benefit of 1,600 GWH p.a. with an installation of 600 MW. The investigation was formally inaugurated on 9th January, 1982 by the Minister of State for Energy and the work on the scheme has already commenced. It is also proposed to get necessary consultancy assistance from the Electricite de France (EDF) in Paris which has the necessary expertise in the field in view of its experience in the only major tidal project, viz., La-rance.

Wind Power: Initial studies and investigations to examine the possibilities of using wind energy in India indicate that though the energy of the wind is of no practical value over the greater part of the country yet it should be possible to make use of wind mills for irrigation and certain places in the Peninsular India. Research and development activities in this area are also being undertaken by the Commission for Additional Sources on Energy. Several wind mills have been established under an integrated rural development project in the Eastern U.P. in collaboration with the Government of the Netherlands. It was thought desirable to continue the integrated rural development project and also to take up R & D activities for the development of wind power for application in rural areas. However, as per the evaluation report of the projects, the extension programme proposal related only to the manufacture and sale of the wind mills. A scheme is proposed to be worked out in consultation with the CPRI for undertaking R & D activities for application of wind power in rural areas.

Development of a National Power Grid: The Union Cabinet has approved, in principle, the formulation of a National Power Grid. The successful operation of the National Power Grid will depend on the integrated operation of the existing regional grids and the speedy construction of as many EHV lines (at least of 400 kV) as possible to evacuate the power which will soon start flowing from the gigantic super thermal power stations. To begin with, the following 400 kV inter-state/inter-regional lines and the associated works have been included in the Central sector project with the National Thermal Power Corporation (NTPC) as the implementing agency:

	Approximate Route Length Km.
1. (a) Ramagundam-Mangur 400 kV S/C line on D/C Towers	190
(b) Mangur-Vijayawada 400 kV S/C line on D/C Towers	160
(c) 400 kV line bay at Ramagundam	—
(d) 400 kV grid sub-station at Mangur with 315 MVA 400/220 kV Interconnecting transformer	—
(e) 400 kV grid station at Vijayawada with 315 MVA 400/220 kV Interconnecting transformer	—
2. (a) Vijayawada-Red Hills 400 kV S/C Line	460
(b) Line bays at Vijayawada and Red Hills with line reactors etc.	—
3. (a) Chandrapur-Ramagundam 400 kV D/C Line	158
(b) Terminal bays at Chandrapur and Ramagundam	—
4. (a) Waidhan-Singrauli 400 kV S/C Line	10
(b) 400 kV Line bay at Singrauli	—
(c) HVDC back to back station at Waidhan complete with 500 MWDC converter station 400 kV AC entrances, etc.	—

Several other 400 kV transmission lines associated with the different super thermal power stations are also under construction by NTPC. The National Hydro-Electric Power Corporation (NHPC) and North-Eastern Electric Power Corporation (NEEPCO) are also engaged in the construction of a number of 132 kV and 220 kV transmission lines. Many more EHV lines will be constructed in future by different state electricity boards and Central undertakings. The integrated operation of these lines along with existing lines in the different Regional Grids will in course of time make the National Power Grid a reality.

There have been interchange of power and electrical energy exchanges between the constituent systems of the Regional Grids since 1977-78. These are 1977-78: 7731 million units; 1978-79: 7,878 million units; 1979-80: 6,800 million units; 1980-81: 6,745 million units; 1981-82 (upto Sep., 1981): 4,089 million units.

The total inter-regional exchanges of energy were 784 MU in 1979-80 and 1,078 in 1980-81. During the current year (April-September, 1981) the total inter-regional exchange was 505 MU.

The National power grid will facilitate flow of power from surplus areas to deficit areas and thus help in the optimum utilisation of the power generated in the country.

For the integrated operation of the Regional Grids, Regional Load Despatch Centres (RLDCs) are being set up in different regions. In the Southern region, a permanent RLDC has already been established. Phase-I of the project is already in operation and Phase-II of the project is under implementation. Interim Load Despatch Centres are functioning in the Northern, Western, Eastern and North-Eastern Regions. These Centres are monitoring the Regional Grid operation and assisting in exchange of power among the state systems. The work on setting up permanent RLDC projects with latest computer-systems for the Northern, Western and Eastern regions is in progress. The equipment for these RLDCs are being obtained under IDA Credit 604. IN.

TABLE 1: GROWTH OF POWER INDUSTRY

Year	Installed capacity (MW) (@)	Energy generation (GWH)	Per capita consumption (KWH)
1950	2,302	7,514	18
1960-61	5,654	20,123	38
1970-71	16,271	61,212	90
1973-74	18,456	72,796	98
1979-80*	31,307	112,820	131
1980-81	33,141	119,226	135
		Projections	
1984-85	51,192	191,000	212
1989-90	82,000	310,000	320

*—provisional.

(@)—includes figures of non-utilities also.

TABLE 2: GROWTH RATES (%)

Year	Capacity	Energy
1950 to 1960-61	10.5	10.4
1960-61 to 1970-71	12.2	11.8
1970-71 to 1978-79	7.6	7.6
1978-79 to 1984-85	10.5	11.3
1984-85 to 1989-90	9.9	10.1

TABLE 3: EXPENDITURE INCURRED AND POTENTIAL CREATED FROM MAJOR AND MEDIUM IRRIGATION PROGRAMMES DURING VARIOUS PLANS

Period	Expenditure (Rs. million)	Additional irrigation potential created (Million hectares)
Pre-Plan	Not available	9.7
1st Plan (1951-56)	3000	2.5
2nd Plan (1956-61)	3800	2.1
3rd Plan (1961-66)	5810	2.3
Annual Plan (1966-69)	4340	1.5
4th Plan (1969-74)	12370	2.6
5th Plan (1974-78)	24420	4.1
Annual Plan (1978-80)	20720	1.8
Total	74460	26.6
Sixth Plan (1980-85)	84480	5.7
1980-81	12100	0.9
1981-82	14250	1.0

ATOMIC ENERGY

National Programme:

THE Indian atomic energy programme was launched chiefly to supplement the limited conventional energy resources to meet the long-term electricity needs of the country, to produce nuclear power and to utilise nuclear techniques in agriculture, industry, medicine and other areas.

The **Atomic Energy Commission** was constituted in 1948 as the policy-making body of the Government of India for the development and utilisation of atomic energy. In 1954 the Government of India set up the Department of Atomic Energy.

The Department of Atomic Energy functions directly under the Prime Minister. The chairman of the Atomic Energy Commission is also the Secretary to the Department of Atomic Energy and is responsible for the administration of the Department. The Constitution of the Commission was changed in 1958, vesting it with full executive and financial powers of the Government of India. Dr. H. J. Bhabha was the first chairman of the Commission.

The Atomic Energy Establishment was formally inaugurated by Jawaharlal Nehru in 1957 and renamed the Bhabha Atomic Research Centre (BARC) after its founder and the first director Dr. H. J. Bhabha in 1967. (The Director of BARC is an ex-office member in charge of research and development.) It is now the largest scientific organisation in India.

The production of nuclear fuels, control instruments, reactor components, research equipment, high purity metals and materials required for the atomic energy programme is undertaken either under the aegis of the Department of Atomic Energy or by the industry with technical assistance from the Department.

Over the years, the Department has placed considerable emphasis on the following areas in addition to its main task of nuclear research and development producing commercial nuclear power and applying nuclear techniques to agriculture, industry, medicine etc. These activities are:

(a) Training and development of personnel in different fields of science and technology related to the atomic energy programme.
(b) Development of the nuclear equipment/industry, both in the public and private sectors.
(c) Transfer of technology from research centres to industry in several non-nuclear areas.
(d) Planning and implementation of pilot level and semi-commercial demonstration projects to extend the benefits of atomic energy in industry, medicine, agriculture and research.
(e) Assistance, both financial and otherwise, to various academic and other institutions for promoting research and other activities that are beneficial to the atomic energy programme.

RESEARCH AND DEVELOPMENT

The Bhabha Atomic Research Centre, Trombay, which was set up as the Atomic Energy Establishment in 1957 and renamed in 1967, is the national centre for research and development work in nuclear energy and related disciplines. Its facilities include research reactors *Circus* (40 MW) and *Apsara* (1MW), a 5.5 MeV Van de Graaff accelerator, a number of computers and various special laboratories. A zero energy thermal reactor *Zerlina* and a fast critical facility *Purnima* also have been used for a number of experimental purposes. It also has a uranium metal plant, a fuel element fabrication plant, a plutonium plant, radiological laboratories to handle radio isotopes, facility to fabricate plutonium mixed fuel elements, etc.

A 100 MW thermal research reactor R-5 has been constructed and is expected to be in operation as soon as the commissioning of the various systems is completed.

The **Variable Energy Cyclotron** has been set up at Bidhan Nagar, Calcutta, by the Bhabha Atomic Research Centre. It is a national facility for advanced work in nuclear physics and for the controlled direct irradiation of biological and agricultural products.

The High Altitude Research Laboratory, Gulmarg of the Bhabha Atomic Research Centre which was set up in 1963, provides facilities for high altitude research to all scientific institutions and universities in the country.

The **Nuclear Research Laboratory,** Srinagar, is devoted to applied research in nuclear and radiation physics.

The Reactor Research Centre has been set up at Kalpakkam, Tamil Nadu, adjacent to the Madras Atomic Power Station. The research and development efforts have been in the area of fast reactor technology, sodium technology, metallurgy, fuel reprocessing engineering and material science. The major projects undertaken by the Centre are a Fast Breeder Test Reactor, the Materials Development Laboratory, Radiometallurgy Laboratory and Radiochemistry Laboratory.

The Reactor Research Centre has a large computer system to meet the R & D requirements.

The Gauribidanur Seismic Station (of the Bhabha Atomic Research Centre), 80 kilometres north of Bangalore, was set up towards the end of 1965 in collaboration with the U.K. Atomic Energy Authority. It has an array of 20 short-period seismographs and 3 long-period seismographs deployed over an area of 25 km × 25 km. It helps in the detection and identification of underground nuclear explosions and also facilitates seismic research.

Aided Institutions: The 3 aided institutions which receive grants from the Department of Atomic Energy for their research and development plan schemes are the Tata Institute of Fundamental Research, the Tata Memorial Centre, both at Bombay and the Saha Institute of Nuclear Physics at Calcutta.

The **Tata Institute of Fundamental Research** was founded in June 1945. It is the national centre for nuclear science and mathematics. It has two schools: the School of Mathematics and the School of Physics (experimental physics, theoretical physics, astrophysics, geophysics, computer science, molecular biology and radio astronomy).

The institute has established a National Computation Centre, a Balloon Fabrication and Flying Facility, a Tritium Laboratory for hydrological studies and a new liquid Helium Plant. At the Balloon Facility, Hyderabad the new launch vehicle built during 1977-78 has been further modified to launch heavier payloads.

The **Tata Memorial Centre** comprises two institutions: The Tata Memorial Hospital and the Cancer Research Institute.

It is one of the foremost cancer treatment centres in the country and conducts extensive research on cancer. The Centre proposes to acquire sophisticated equipment and intensify research in cancer. It is recognised as a post-graduate teaching institute by the University of Bombay.

The **Saha Institute of Nuclear Physics** was formally opened in June 1950. Its fields of research include: electron microscopy, EPR spectroscopy, mass spectrometry, microwave absorption spectroscopy, molecular biology, NMR spectroscopy, NCR spectroscopy, nuclear activation, nuclear reactions, nuclear spectroscopy, radiochemistry, solid state physics, structural crystallography, technical physics and theoretical nuclear physics.

It aims at development of polarised target facilities, development of high power Hd. glass laser, and studies of radioactive isotopes etc.

POWER

Nuclear power provides an alternative and long-lasting source of electricity and its role is expected to enlarge with installation of more PHW (Pressurised Heavy Water) reactors and with the development of Fast Breeder Technology. The total nuclear power generation capacity in 1983 was 860 MW.

To meet the requirements of heavy water for the PHWR atomic power stations, following heavy water plants have been set up:

1. Heavy Water Plant, Tuticorin: The plant, designed to produce 71.3 tonnes of heavy water per annum became operational in July 1978. Its annual production depends on the availability of synthesis gas from the Southern Petrochemical Industries Corporation and adequate power supply.

2. Heavy Water Project, Baroda: Designed to produce 67.2 tonnes of heavy water per year had become operational in April 1977, but had to be closed for extensive repairs as a result of fire and explosion in the plant in December 1977. The operation of the plant was also affected by the cyclone in November 1982.

3. Heavy Water Plant, Kota: This plant with a capacity to produce 100 tonnes per year of nuclear grade heavy water is being commissioned.

4. Heavy Water Plant, Talcher: This plant is designed to produce 62.7 tonnes of heavy water per year and is linked with the Ammonia Plant of Fertiliser Corporation of India at Talcher. The commissioning of this plant is adversely affected by the intermittent operation of FCI's ammonia plant and by frequent power cuts.

5. Heavy Water Plant, Nangal: This plant was commissioned in August 1962. It has an annual capacity of about 14 tonnes. This plant is shut down whenever a total power cut is imposed.

Nuclear Fuel Complex, Hyderabad: For fabricating the fuel bundles, the Coolant and the Calandria Tubes required for the nuclear power stations in the country, the Department has established the Nuclear Fuel Complex at Hyderabad. The Ball Bearing Steel Tubes Plant is designed to produce 21,000 metric tonnes of S.S., Tubes for the Ball Bearing Industry. and 3,000 metric tonnes of drill pipes for O.N.G.C. The expansion of natural uranium fuel fabrication facilities is being taken up to meet the fuelling needs of the power reactors already under construction in order to achieve self-sufficiency in this regard.

The **Power Reactor Fuel Reprocessing Plant**, Tarapur, has been built by the Bhabha Atomic Research Centre. This plant processes the irradiated fuel from the Tarapur and Rajasthan Atomic Power Stations.

The **Atomic Minerals Division** is responsible for surveying, prospecting and exploratory development of atomic minerals required for the atomic energy programme.

The **Tarapur Atomic Power Station**, 100 kms. north of Bombay, is the first atomic power station in India. It was built by General Electric Co. of U.S.A. It has two boiling water type reactors fuelled by enriched uranium with a total output of 420 MWe and has been supplying power to Maharashtra and Gujarat since October 1969.

The **Rajasthan Atomic Power Station** at Rana Pratap Sagar has two units. The first unit with a capacity of 220 MWe is in commercial operation since Dec., 1973. The second unit started commercial operation since April, 1981.

The **Madras Atomic Power Station**, about 80 kms. south of Madras has two Candu-type units. The first unit is ready to receive heavy water and the second unit is nearing completion.

The **Narora Atomic Power Station,** U.P. consists of two units. The first unit of the station is expected to be completed in 1987 and the second unit in 1988.

Financial sanctions for two 235 MWe units at Kakrapar in Gujarat has been accorded. The two units are expected to be completed in 1991 and 1992.

Beyond Kakrapar four more 235 MWe units have been included in the Sixth Plan proposal.

PUBLIC SECTOR UNDERTAKINGS

The **Indian Rare Earths Ltd.** was incorporated on 18th August 1950, with its registered office at Bombay with the object of processing monazite recovered from the beach sand deposits in Kerala and Tamil Nadu to produce rare earths chloride as main product and a compound containing uranium and thorium as a co-product at their Rare Earths Plant at Udyogmandal, Alwaye, Kerala. The company owns and operates two Mineral Sands Separation Plants, at Chavara (Kerala) and Manavalakurichi (Tamil Nadu). It also manages the Thorium Factory at Trombay.

The **Electronics Corporation of India Limited** was incorporated, with its registered office at Hyderabad on April 11, 1967 with the primary object of developing, manufacturing and marketing electronic components, instruments and systems based on indigenous know-how. It also undertakes commercial manufacture of various electronic equipment developed at Bhabha Atomic Research Centre and Tata Institute of Fundamental Research and other commercial products like T.V. sets, Computer etc.

The **Uranium Corporation of India Ltd.,** Jaduguda, was formed in Oct., 1967 with the primary object of providing uranium required for the Indian nuclear power programme. The Corporation took over the assets and liabilities of two Government projects viz. the Jaduguda Mines Project and the Jaduguda Uranium Mill Project on 16th Oct. 1967. Copper and molybdenum concentrates are produced as by-products.

Another important R & D project on hand is Magneto Hydrodynamics (MHD) Power Generation. Located at Tiruchirapalli, the project is a joint venture of BARC and Bharat Heavy Electricals Ltd. The MHD technique relates to the direct conversion of thermal energy to electrical power. The technology is expected to improve the thermal efficiency of fossil-fired power plants from the present 30-40 per cent to 50 per cent, and even higher.

BARC has also built and commissioned a flash X-ray generator in a national laboratory at Chandigarh. The flash X-rays have many applications in high-speed radiography, pulse radiolysis and X-ray cinematography.

Production of wide range of radioisotope preparations and associated equipment is a major activity at the BARC. During the year, the Centre supplied over 45,000 consignments of various radioactive products to users in India and abroad.

Isomed, the radiation sterilisation plant at Trombay, sterilised a total of 3,030 cu.m. of various medical products during the year.

NUCLEAR EXPLOSION

The first peaceful underground nuclear explosion at Pokhran in the Rajasthan desert was conducted on May 18, 1974. The plutonium device used was designed to yield about 12 kilotons of TNT explosive energy.

SOCIAL WELFARE

WITH the fast changing modern times, the very concept of social welfare has undergone a transformation, stress being laid on preventive and developmental aspects. Consequently, the Ministry of Social Welfare has set up three bureaux, each headed by a Joint Secretary, dealing with nutrition and child development, social security and welfare of the handicapped, well-being of women and development.

Financial allocations have been progressively going up from Rs. 16 million in the First Five-Year Plan to Rs. 1,500 million in the Sixth Five-Year Plan.

Among the highlights of the projects are Integrated Child Development Services, Welfare of Children in Need of Care and Protection, National Children's Fund, Creches, Condensed Courses of Education for Women, Assistance to Voluntary Organisation for the Handicapped, Scholarships to the Physically Handicapped Hostels for Working Women, etc. There has been co-ordination with UNICEF and CARE.

The following are the service centres:

The Central Social Welfare Board (Jeevan Deep Building, Parliament Street, New Delhi 110001). (*Established in* 1953): The Board, with a network of 30 State Social Welfare Advisory Boards in all the States and Union Territories, renders financial assistance to nearly 10,000 voluntary organisations for strengthening and improving their existing welfare services and to take up new activities for the benefit of the socially and economically weaker sections of the community with emphasis on children, women and the handicapped. The Board provides financial assistance to voluntary organisations under its various programmes. It also initiates pioneering welfare services in new fields and in unexplored areas. In extending these services, the Board supervises, guides and strengthens the voluntary organisations and its activities, besides evaluating the aided programmes. The Board has recently set up Voluntary Action Bureau in Delhi and 16 other States/Union Territories to fight social crimes, thus shifting the emphasis of its role from a mere fund giving agency to that of a social catalyst.

National Institute of Social Defence, Ministry of Social Welfare, West Block No. 1, Wing-7, Ramakrishnapuram, New Delhi 110066.

The main functions of the institute: (1) Undertakes research on social defence; (2) Compiles, processes, and analyses statistics on social defence; (3) Develops, promotes, sponsors and undertakes training orientation in the fields of social defence; (4) Drafts model legislation and rules in the field of social defence; (5) Advises the Central and State Governments/Union Territory Administrations on social defence problems and provides technical service facilities for preparation of schemes, formulation of projects, drafting of legislation, etc.; (6) Provides a forum for the exchange of information on social defence among States/Union Territories and voluntary organisations and thus serves as a clearing house for information in the field of social defence; (7) Creates public awareness on social defence problems specially in regard to preventive and rehabilitative role of the community; (8) Assists the Government of India for the exchange of information on social defence with other countries and with the United Nations or other specialised agencies; (9) Establishes liaison with universities, research institutes and voluntary organisations for appropriate attention to social defence: (10) Organises conferences/seminars/workshops on social defence; (11) Brings out publications in the field of social defence, both popular and scientific.

Rehabilitation Services, Delhi Administration, Jamnagar House, Shahjahan Road, New Delhi 110011 (Formerly Social Welfare and Rehabilitation Directorate, Govt. of India). Set up to tackle problems of destitute, needy and economically and socially handicapped women.

The main activities are: 1. One Year Certificate Course in Tailoring and Embroidery; 2. Two-Year Teachers' Training Diploma Course in Tailoring, Embroidery, Drawing & Designing, Book-keeping & Accounts and Method of Teaching & School Organisation etc.; 3. Non-Diploma Courses in Tailoring, Embroidery and Knitting etc. Besides this, the main employment providing work, for 19 Training-cum-Production Centres come from the Govt. of India's sources, under the standing orders of Ministry of Home Affairs, whereby liveries of all Central Government offices/departments/Public Undertakings is to be done as per prescribed stitching rates.

Research & Documentation Centre in Social Welfare and Development, 175, Dr. D. N. Rd., Bombay 400001. A voluntary organisation dedicated to social work in the areas of research, documentation, organisation of training courses, seminars & action projects.

The Association for Social Health in India (4, Deendayal Upadhyaya Marg, New Delhi 110002). Aims at the prevention of prostitution and other evils related to it; to secure equal ethical standards of living for men and women; to promote understanding & edn. in respect of sex relations and encourage healthy family relations through Family Life Instt.'s counselling & guidance centres; to establish, maintain and assist short stay homes & family homes to prevent exploitation of women, etc.

Research Institutions: *Andhra Pradesh*—Tribal Cultural Research & Training Instt., Ravindranagar Colony, H. No. 6-2-6, 2819, P. C. Khairatabad, Hyderabad 500004; *Assam*—Tribal Research Instt., New Sarania, Gauhati 781003; *Bihar*—Tribal Welfare Research Instt., Morabadi Rd., Ranchi 834001; *Gujarat*—Tribal Research and Trg. Centre, Gujarat Vidyapeeth, Ahmedabad 380014; *Kerala*—Instt. for Research Training & Development Studies of Scheduled Castes and Scheduled Tribes, Kozhikode; *Madhya Pradesh*—Tribal Research and Devpt. Instt., Bhopal 462001; *Maharashtra*—Tribal Research Instt., 28, Queen's Road, Pune 411001; *Meghalaya*—Tribal Research & Trg. Instt., Shillong 793001; *Nagaland*—Naga Cultural Instt., Kohima 797001; *Orissa*—Tribal and Harijan Research-cum-Training Instt., Bhubaneshwar 751001; *Rajasthan*—Tribal Research & Trg. Instt., Udaipur 313001; *Uttar Pradesh*—Directorate of Harijan and Social Welfare, Lucknow 266001; *West Bengal*—Cultural Research Instt., Maniktola, Calcutta 700001.

THE SALVATION ARMY

For administrative purposes the country is divided into 6 territories each under a territorial commander.

The work done is evangelical, social, medical and educational. The six territories are:

Madras and Andhra: Territorial Headquarters, The Salvation Army, 15, Ritherdon Road, P. O. Box 453, Vepery, Madras 600007.

South-Eastern India: Territorial Headquarters, The Salvation Army, High Ground Road, Maharaja Nagar P.O., Tirunelveli 627011, Tamil Nadu.

South-Western India: Territorial Headquarters, The Salvation Army, Kowdiar, Trivandrum 695003. Kerala State.

Northern India: Territorial Headquarters, The Salvation Army, "Rana Place", H-15, Green Park Extension, New Delhi 110016.

Eastern India: Territorial Headquarters, The Salvation Army, 37, Lenin Saranee, Calcutta 700013.

Western India: Territorial Headquarters, The Salvation Army, Sheikh Hafizuddin Marg, P.O. Box 4510, Byculla, Bombay 400008.

FAMILY WELFARE PROGRAMME

INDIA adopted family planning as an official programme in 1952 as it recognised that a timely check on population growth would, in turn, raise the standard of living of the people. During the period of the first two Plans (1951-61), the emphasis was mainly on research in the field of motivation, communication, demography, physiology of reproduction and on the extension of Central and State organisations for providing clinical services. After the results of the 1961 census, which revealed a growth rate higher than calculated, the programme was re-organised and a new "Extension Approach" was adopted in 1962-63. The programme was, however still treated as an isolated birth control scheme. This point of view was given a more concrete shape during 1974, the World Population Year. In March 1977, the Ministry of Health and Family Planning has been redesignated as Ministry of Health and Family Welfare, the Department of Family Planning as the Department of Family Welfare and the Family Planning Programme as Family Welfare Programme. The objective of the Family Welfare in India in 1978 was to reduce the **birth rate** to 30 per thousand population by the end of 1982-83 from the present rate of 33 per thousand population.

In 1978, the Planning Commission, appointed a Working Group on Population Policy to suggest a long-term demographic objective for the country. They felt that under the present conditions it is hardly possible to separate the issues of fertility control from the broad spectrum of socio-economic and developmental factors. The Group suggested that the future fertility goals should be linked to some developmental variables, like mortality level, particularly infant mortality. The Working Group, in its final report has recommended that the long-term demographic goal of the country should be that on the average woman will be replaced by one daughter and two-child family will be the normative pattern in the society, and for the country as a whole the goal should be reached by 1996. The recommendations of the Working Group were discussed by the National Development Council and following the approval of the Council the demographic goal suggested by the Working Group was incorporated into the Sixth Plan (1980-85) as the objective of the Population Policy.

Keeping in view the long-term demographic goal of the new population policy, the past performance, the present capacity and the future potentials, the operational programme fixed for the five

Overall Performance of Family Planning in 1979-80

Method	Tarjet 1980-81	Achievement			Change in performance in 1980-81 over 1979-80 (Percentage)
		Number	Percentage	Performance in 1979-80	
1. Sterilisation	2.90	2.03	70.0	1.78	(+)14.0
(a) Vasectomy	—	0.44	—	0.47	(−) 6.4
(b) Tubectomy	—	1.59	—	1.31	(+)21.4
2. I.U.C.D.	0.79	0.62	78.8	0.63	(−) 1.6
3. Other Methods (Eq. Users)	5.54	3.79	68.4	3.07	(+)23.5
(a) C.C.Users	5.04	3.70	73.4	2.99	(+)23.8
(b) Oral Pill Users	0.50	0.09	17.9	0.08	(+)12.5
Total Users	—	6.44	—	5.48	(+)17.5

year period 1980-85 envisages 22 million sterilisations, 7.9 million IUD insertions, and an annual average of 7.6 million users of conventional contraceptives and oral pills. For the year 1980-81, it was aimed to perform 2.9 million sterilisations, 0.8 million IUD insertions and 5.5 million users of conventional contraceptives.

Position in 1980-81

The method-wise performance of the programme as compared to that in the year 1979-80 is tabulated in the table given above.

Administration: A full-fledged Department of Family Planning created in April 1966, in the Ministry of Health and Family Planning, now known as the Department of Family Welfare, is headed by the Secretary, who is in overall charge of the department. He is assisted by an Additional Secretary who is also Commissioner of Family Welfare. There is a Family Welfare Cabinet Committee presided over by the Finance Minister and the State Family Welfare Cabinet Committees headed by the Chief Ministers to ensure expeditious policy clearance and better co-ordination among different administrative wings. The Central Family Welfare Council is the supreme policy-making body. The Union Minister of Health presides over the Council, while all State Health Ministers and Secretaries are its members. The Council also includes representatives of voluntary and labour organisations, some members of Parliament and eminent personalities and experts in the field of family welfare. Family Welfare Councils also function at the State level.

On 31st May, 1982, Government announced the formation of a national population advisory council to keep a close watch on the implementation of the family planning programme and suggest strategies for improving the performance of the programme to facilitate attainment of the demographic goals.

The council, headed by the Health Minister, comprises 20 members who are to hold office for two years.

Organisation in States and Union Territories: To implement Family Welfare and Maternal Health Programme, 27 State Family Welfare Bureaux are functioning in various States and Union Territories. At the district level, out of 391 districts in India, 366 district Family Welfare Bureaux are functioning in the country and five more, two each in Meghalaya and Maharashtra and one in Haryana, have been sanctioned during 1981-82. Up to the period ending March, 1981, there were 2,218 Urban Family Welfare Centres (including 503 attached to Post-Partum Family Welfare Institutions). In addition, the State Governments have been allowed to establish 200 new Urban Family Welfare Centres during 1981-82. Again in the rural areas Family Welfare Centre forms an integral part of the Primary Health Centre. As against 5,456 Primary Health Centres functioning in the country, 5,408 Rural Family Welfare Centres have been functioning. The State Governments have been allowed to establish 80 Rural Family Welfare Centres at such Primary Health Centres which do not have one at present. These Rural Centres are supported by sub-centres. Against the required 80,050 sub-centres necessary to achieve the target of one sub-centre per 5,000 population (1981 census), 50,157 sub-centres are functioning in the country. It has also been decided to establish a comprehensive Health Delivery System in the rural areas through a team of multipurpose workers, one female and one male per 5,000 rural population. It is proposed that 71 per cent of the estimated number of workers according to mid-year population of 1982 would be in position by the end of Sixth Five Year Plan and massive training scheme have been taken up towards that end.

Integrated Approach: During the inter-plan period of 1968-69, the family planning programme was integrated with the public health

* Provisional

+ Including Rs. 791.4 million obtained through supplementary grants and excluding Rs. 1.5 million provided in the Ministry of Works and Housing

(a) In addition supplementary grant was also sought, including Rs. 59.5 million for payment of arrears.

@ Budget provision

programme in the country, especially with the maternal and child health programme. In 1973-74, it was integrated with other health programmes, like health, family planning, maternity and child health (MCH) and multi-purpose workers are being trained to perform all the integrated tasks. Since 1978, the programme has been integrated with other development programmes, such as adult education programmes, population education programmes in the schools and special programmes for employment of women in rural areas. However, during the year 1974-75, the policy of mini-camps were adopted. These camps are held at primary health centres, urban welfare centres and at district and *tehsil* hospitals. An extra expenditure of Rs 5 per case is allowed.

Some Associations: Voluntary organisations have been recognised for playing an important role in the field of family welfare. Some of these are: the Family Planning Association of India, Indian Medical Association, Central Bharat Sevak Samaj, Indian Red Cross Society, Trained Nurses Association of India, Bharatiya Gramin Mahila Sangh, Indian Council of Social Welfare, the Christian Medical Association, the Rotary Clubs, the Lions Clubs and the Junior Chambers of Commerce etc. Many of these voluntary organisations are represented on the Central as well as on the State family welfare councils. In addition, the Ministries of Railways, Defence, Labour and Employment, and the Posts and Telegraphs Department have been participating in the National Family Welfare Programme. For commercial distribution of *Nirodh*, 12 consumer goods marketing companies are engaged in the work and it is estimated that 0.38 million retail shops are selling *Nirodh*.

Research: Research in demography, bio-medicine and communication is supported by the Government through suitable grants.

A high-powered committee called the Committee on Socio-economic Studies on Family Welfare has been constituted to go into different aspects of the family welfare programme. This Committee advises and co-ordinates research on economic, sociological, educational, psychological, communicational and demographic aspects of population growth and family welfare. The Committee also reviews the progress of research work done and makes recommendations for development of research in these fields. It also reviews the working of the research centres dealing with population studies.

The International Institute for Population Studies (IIPS), Deonar, Bombay 400 088: Formerly known as Demographic Training and Research Centre, the Institute was established as a registered body in July 1956 and is a regional centre for the training of demographers from India and other ESCAP countries. It is supported by the United Nations and Government of India. The Institute conducts a Certificate course in Population Studies, and Diploma course in Population Studies. It also has a Ph.D Programme leading to Ph.D. in Demography of the Bombay University. Apart from teaching the Institute undertakes researches in the field of population studies, including family welfare. It was renamed as International Institute for Population Studies in 1970.

Population Research Centres: The National Institute of Health and Family Welfare, New Delhi, is a technical Institute for promoting health and family welfare programme in the country through education, training, service, research, evaluation and consultancy. In addition, there are 15 Population Research Centres located at Baroda, Bangalore, Delhi, Dharwar, Gandhigram, Lucknow, Patna, Pune, Trivandrum, Bhubaneswar, Waltair, Gauhati, Chandigarh, Bhopal and Udaipur. These Centres are functioning with the financial assistance from the Department of Family Welfare, Ministry of Health and Family Welfare. Three new Centres at Bhopal, Calcutta and Udaipur have been sanctioned and are at various stages of establishment.

India Population Project: Since 1973, two experimental projects on family welfare have been initiated. The first project covers six districts of Uttar Pradesh and the second, five districts of Karnataka. These projects were run with assistance from the International Development Association to the extent of 21.2 million dollars in the form of a loan, and 10.6 million dollar grant from the Swedish International Development Authority. The emphasis in these projects is on the implementation of a maternity based family welfare programme both in urban and rural areas. An attempt has also been made to assess the effect of supplementary nutrition on the acceptance of family welfare in one district each in the two States and to Develop a better system of management information and evaluation. The implementation of the field programme has been divided into three broad categories namely, an urban programme in the cities of Lucknow and Bangalore: an optimal programme on the existing pattern in four districts of Uttar Pradesh and three districts of Karnataka: and an intensive rural programme in two districts of each of the States. A population centre is attached to each of these projects. The main function of the Centre is to carry out experimental and innovative studies in the field of family welfare and to experiment with new management techniques.

Research in Reproductive Biology and Fertility Control: Research in Reproductive Biology and Fertility Control is carried out at the Central Drug Research Institute, Lucknow: All-India Institute of Medical Sciences, New Delhi: Rajasthan University: National Institute of Health & Family Welfare, New Delhi; Indian Institute of Science. Bangalore: Institute of Research in Reproduction, Bombay. The Indian Council of Medical Research provides technical advice and co-ordinates research work in the field of medical and bio-medical research.

Training: The training of family welfare instructors and key staff is undertaken by five training institutes, the National Institute of Health and Family Welfare, New Delhi; the Institute of Rural Health and Family Welfare, Gandhigram; the All-India Institute of Hygiene and Public Health, Calcutta; the Family Welfare Training and Research Centre, Bombay; and the Central Health Education Bureau, New Delhi. There are 59 Family Welfare Training Centres at the State level functioning. Each State has a Central Family Welfare Field Unit which undertakes *ad hoc* training programmes. In order to overcome the acute shortage of Auxiliary Nurse Midwives in some States, the Family Welfare Department opened 25 new ANM training schools in 1970-71, ten in Bihar, ten in Uttar Pradesh and five in Orissa.

Oral Contraceptives: The Technical Committee on Family Planning recommended in June, 1971, that oral contraceptives may be tried both in urban and rural areas under some restricted conditions as an adjunct to the IUD programme. As of March 1981 there were 7,061 centres comprising 4,546 rural centres and 2,515 urban centres (excluding 25 centres of Tripura for which rural/urban break up is not available) were distributing pills throughout the country. During 1980-81 a total of 1.15 million cycles of oral pills were distributed gratis throughout the country.

Copper 'T': The Government has agreed to include Copper T as a new loop in its programme. The Indian Medical Research Institute has found it effective. Out of a total of 0.62 million IUD insertions in 1980-81, 0.28 million were Copper T. Compared to the performance of Copper T insertion in 1979-80, the performance during 1980-81 has slightly decreased. It is likely the demand of Copper T will increase in the future.

Medical Termination of Pregnancy Programme: Through this programme, abortions are conducted on persons requiring the same voluntarily by trained doctors in government hospitals and approved institutions. As per reports received upto March 1981, there were 3,319 institutions approved for M.T.P. Since inception more than 2.4 million abortions have been terminated under this programme, out of which 375,815 were performed during 1981-82.

Conventional Contraceptives: Among the conventional contraceptives, Nirodh is widely used. It claims about 97 per cent of the total conventional contraceptive users. During the year 1980-81, about 285.6 million pieces were distributed out of which around 130 million pieces were distributed through commercial distribution and the rest free of cost. Presently 12 consumer goods marketing companies are engaged in this work and about 0.38 million retail shops are selling *Nirodh*.

Progress: The country's birth rate for 1979 was slightly lower than that for the previous year. Calculated on the basis of births averted through the family welfare programme, the rate was 33.3 per 1.000 during 1978 as compared to 33.0 for 1979.

The number of births averted in 1980-81 was 4.93 million while the corresponding achievement in the preceding year was 4.91 million.

The total number of births averted up to the end of March 1981 since the inception of the family planning programme was 44.2 million.

However, the progress of the family welfare programme during 1980-81 was better than in the previous year. The number of voluntary sterilisations performed in 1980-81 was 2.03 million as compared to 1.78 million in 1979-80, representing a 14.0 per cent increase.

The percentage of tubectomy operations performed during 1980-81 was slightly more (78.6 per cent) than that of 1979-80 (73.4 per cent). Since the launching of the family planning programme in the country, 33.4 million sterilisation operations have been performed upto the end of March 1981, giving a cumulative rate of 48.8 per 1,000 population.

The number of IUD insertions done in 1980-81, was 623,086 as against 634,509 in 1979-80 representing a slight decrease of two per cent. The total of such insertions done from the beginning of the programme until March 31, 1981 was 8.77 million giving a cumulative rate of 12.8 per 1,000 population.

But in 1980-81 the actual performance, against the official "expectation" was less in all aspects of the programme. In the case of voluntary sterilisation, while the expectation was 2.90 million the achievement was 2.03 million.

During the year 1980-81 there was an improvement in the number of sterilisations compared to that of the previous year. However, there was a slight decline in the number of IUD insertions. In case of "Other Methods", C.C. and Oral Pill users there was increase in the number of users. As a result of the net change in the performance in 1980-81 over 1979-80, there was an increase of 17.5 per cent in the number of "acceptors" of any family planning methods propagated under the official programme in 1980-81 was 6.44 million against 5.48 million in 1979-80.

Up to the end of March, 1981 the number of eligible couples effectively protected by the programme was 26.4 million, out of the total 116 million such couples in the country. Thus, the percentage of protected couples was 22.7.

State-wise achievement of family planning by methods, 1980-81

New Legislation: The Medical Termination of Pregnancy was passed in 1972 and is designed to substantially liberalise legal provisions to resort to abortion in cases where contraceptives fail to prevent conception.

According to the National Population Policy announced by the Government of India on April 16, 1976, it was proposed to raise the legal minimum age of females at marriage from 16 to 18 years. The Child Marriage Restraint (Amendment) Act, 1978, which came into effect from 1-10-1978, provides for raising the minimum age of marriage in respect of girls to 18 years and in respect of boys to 21 years. The Government has also taken preliminary steps to introduce population education in schools and colleges.

According to the revised statement of policy released on 29-6-1977, family planning will be pursued vigorously as a wholly voluntary programme and an integral part of comprehensive policy covering education, health, maternity and child care, family welfare, women's rights and nutrition.

Religion and Family Welfare: The religion-wise distribution of sterilisation and IUD insertions in 1979-80 based on the revised estimates of the Department of Family Welfare are given in the table below.

Religion-wise percentage distribution of sterilisation and IUD, 1979-80

Religion	Sterilised Persons	IUD acceptors	Distribution in 1971 census
Hindus	88.6	84.9	82.7
Muslims	5.9	7.4	11.2
Christians	3.3	2.5	2.6
Sikhs	1.4	5.5	1.9
Others	0.8	0.7	1.6

PUBLIC HEALTH

(For the addresses of the Research Institutes mentioned in the chapter please refer to the Research chapter)

PUBLIC health, which broadly embraces preventive measures and control of communicable diseases to enable the citizen to lead a healthy life, is primarily the responsibility of the State Governments. But the Union Government plays a major role in all such programmes. The Centre is also directly responsible for this State subject in the Union Territories. It also emphasises the Family Welfare Programme and guides, sponsors, and supports major health programmes of national significance such as control of T.B., Leprosy, Malaria etc.

For effective implementation of the policies the Union Ministry of Health and Family Welfare functions through the Directorate-General of Health Services.

*Prior to the transfer of Centrally Sponsored Schemes to State share.

The primary objective of the Health Sector in the Sixth Five Year Plan (1980-85) is to provide better primary health and medical care services in the rural areas, tribal areas and to poor people. This aims to achieve the goal of "Health for all by 2000 A.D." as postulated in the 'Alma Ata' international declaration.

In the Sixth Five Year Plan, an outlay of Rs. 28,311 million has been provided for Health and Family Welfare Programmes out of which Rs. 18,211 million is for health and Rs. 10,100 million is for family welfare schemes. The outlay for health schemes is roughly 1.9 per cent of the total plan investment of the Sixth Plan. In the Annual Plan of 1981-82, an outlay of Rs. 3,566.0 million has been provided for health plans. The budget estimates (1981-82) under the Central and State Sectors are Rs. 1,250.0 million and Rs. 2,316.0 million respectively.

Rural Health: The Central Health and Family Welfare Ministry drafted a plan for the development and extension of health care services in the rural areas at an expenditure of Rs. 4,860 million over the four years during 1981-85. It proposes to provide health services at the villager's doorstep through 580,000 community health workers and another 580,000 midwives after a short term training in the preventive and promotional aspects of health care. It envisages one man and one woman multipurpose worker for every 5,000 people by 1984-85. Manpower will be drawn from among those below 30 years with minimum formal education up to the sixth standard. The workers, covering every village with a population of 1,000 will be selected by the community itself and trained in groups of 20 for three months. The target of training is 580,000 community health workers at the country's 5,372 community health centres. Since the inception of the Community Health Volunteer s Scheme 182,077 persons had been trained up to 30th September, 1981

During 1981-82 the Government has established 142 new primary health centres and 8,518 new sub-centres. Besides 36 primary health centres have been upgraded.

Expectation of Life at Birth and Death Rates

Year	Expectation of life at birth		Death rate per 1,000 population
	Males	Females	
1941-50	32.5 years	31.7 years	27.4
1951-60	41.9 years	40.6 years	22.8
1961-70	46.4 years	44.7 years	19.0
1971-75	50.7 years	49.3 years	15.5 (for 1973)†
1976-80	53.8 years	52.6 years	14.2 (for 1978)†

†Based on sample registration system data.

Source: (i) The figures for 1941-50, 1951-60, 1961-70 are based on Census estimates. (ii) The figures for 1971-75 and 1976-80 are estimates based on the revised projections made by the Expert Committee appointed by the Government of India.

Hospitals and Dispensaries: The number of hospitals and dispensaries (as on January 1, 1982) was 23,559 out of which 10,148 were in the urban areas and the rest rural. The number of beds available in the urban areas was 417,781 and in rural 86,757.

Doctor-Population Ratio: At the end of 1979-80 the doctor-population ratio was 1:3,600 and that of midwife/nurse was 1:5,600. The number of doctors registered (possessing recognised medical qualifications under I.M.C. Act) with the State Medical Councils was 268,712 in 1981. The corresponding number in 1980 was 255,138.

Population Ratio per Doctor in States/Territories: (Year in brackets): Andhra Pradesh: 12,557 (1982); Assam: 11,879 (1979); Bihar: 4,746 (1978); Gujarat: 2,603 (1978); Haryana: 6,131 (1982); Himachal Pradesh: 7,514 (1979); Jammu and Kashmir: 6,996 (1979); Karnataka: 9,770 (1979); Kerala: 2,491 (1979); Madhya Pradesh: 11,546 (1978); Maharashtra: 2,045 (1982); Manipur: 3,463 (1980); Meghalaya: 6,422 (1979); Nagaland: 3,425 (1979); Orissa: 9,377 (1978); Punjab: 3,705 (1982); Rajasthan: 10,637 (1982); Sikkim: 3,115 (1979); Tamil Nadu: 7,663 (1982); Tripura: 5,743 (1980); Uttar Pradesh: 16,677 (1979); West Bengal: 2,236 (1981); Andaman and Nicobar Islands: 2,896 (1981); Arunachal Pradesh: 2,841 (1981); Chandigarh: 1,131 (1979); Dadra and Nagar Haveli: 5,184 (1982); Goa, Daman and Diu: 1,014 (1982); Lakshadweep: 3,095 (1980); Mizoram: 7,173 (1981); Pondicherry: 2,472 (1982).

Air Pollution: The National Environmental Engineering Research Institute, Nagpur is studying the effects of air pollution in Bombay. A national network of sampling for air quality has been set up in nine cities (viz. Delhi, Calcutta, Madras, Kanpur, Bombay, Ahmedabad, Hyderabad, Jaipur and Nagpur).

A provision of Rs. 15 million was made in the Fifth Plan for water and air pollution control to meet the cost of establishment of a Central Water Board and for extending financial assistance to State Governments and Union Territories for necessary studies in this subject.

Cancer: About 425,000 people die every year from cancer in India. There are 110 centres where facilities for cancer treatment are available in the form of surgery, radium etc. The State-wise break-up is: Andhra Pradesh 7, Assam 4, Bihar 2, Delhi 6, Gujarat 5, Karnataka 6, Kerala 3, Maharashtra 15, Orissa 2, Punjab (including Haryana) 5, Rajasthan 6, Tamil Nadu 13, Uttar Pradesh 5, and West Bengal 5. During the Fifth Plan it was proposed to strengthen the treatment facilities by providing radio-therapy units at medical college hospitals and important district hospitals with Cobalt beam. A sum of Rs. 30 million has been provided for this purpose. The Cancer

Foundation had offered a donation of Rs. 4 million for setting up of a Rotary Cancer Hospital at the All India Institute of Medical Sciences, New Delhi. In the Sixth Plan, a sum of Rs. 115 million has been provisionally kept for cancer research and treatment.

Research is conducted at the Cancer Research Institute, Parel, Bombay; the Cancer Institute, 110 Mount Road, Madras 600018; the Chittaranjan National Cancer Research Centre, Calcutta; Radium Institute and Cancer Hospital, Hyderabad; J.K. Institute of Radiology and Cancer Research, Kanpur; International Cancer Centre, Neyoor, Tamil Nadu and S. N. Medical College, Agra. Field Research stations for official facilities have also been established at Chandernagore, Hooghly, West Bengal and Madras. The Indian Council of Medical Research has started a study of cancer of the cervix at the Lady Hardinge Medical College and Safdarjang Hospital in New Delhi.

Cholera: The endemic areas are Andhra Pradesh, Bihar, Maharashtra, Karnataka, Orissa, Tamil Nadu and West Bengal. Considerable decline had been noticed in the case fatality of Cholera during 1981 compared to 1980. During 1981, 5,731 cases with 190 deaths were reported while during 1980, 8,717 cases occurred with 309 deaths.

The introduction of Oral Rehydration Therapy has proved very effective in the control of cholera and other diarrhoral diseases. 46 cholera combat teams are functioning in different parts of the country.

Diabetes: The urban population in the country is more prone to diabetes than its counterparts in rural areas. On a rough estimate at the end of 1972 about 5.5 million people were suffering from diabetes in India. Of them, urban area's share was 3.3 million.

Filaria: The National Filaria Control Programme has been in operation since 1955-56. About 236 million persons are endemic for filaria. 18 million persons have been detected as micro-filaria carriers and 14 million are chronic filaria patients. At present 157 Filaria control units, 46 filaria clinics, and 26 survey units are functioning in various endemic States/Union Territories endemic for filariasis. These units protect 23 million urban population.

The headquarters of the programme is located at the National Institute of Communicable Diseases, Delhi. Training in filariology is being imparted at the Regional Filaria Training and Research Centres located each at Calicut (Kerala), Rajahmundry (Andhra Pradesh) and Varanasi (Uttar Pradesh). These centres are also responsible for the field evaluation of the programme, and research in various aspects of filariasis.

Pilot programmes for the control of filariasis in rural areas were introduced in three districts, viz. Srikakulam (Andhra), Bulsar (Gujarat) and Jaunpur (Uttar Pradesh) since 1977, which cover about 5 million of the population.

Goitre: Endemic goitre is a nutritional deficiency disease and is prevalent in the southern slopes of the Himalayas covering a distance of 2,414 kms. About 40 million people live on this goitre belt which consists of northern parts of Jammu and Kashmir, Punjab, Haryana, Himachal Pradesh, Bihar, West Bengal, Nagaland, Arunachal Pradesh and Manipur. The persons affected with goitre are estimated to be about 8 to 10 million. The Central Goitre Survey Teams have completed initial goitre surveys.

The National Goitre Control Programme includes the manufacture of iodised salt at Sambhar Salt Ltd. (Sambhar Lake) in Rajasthan, Hindustan Salt Ltd. (Kharaghoda) in Gujarat, Government Salt Golah (Howrah, Calcutta) and at Gauhati (Assam). The production during 1981-82 in these establishments was estimated to be 0.15 million metric tonnes. Three additional plants are proposed to be installed one each in Meghalaya, Himachal Pradesh and Madhya Pradesh.

Influenza: An Influenza Centre was opened in 1950 at the Pasteur Institute, Coonoor, Tamil Nadu, to undertake study of and research in problems relating to influenza. The centre co-operates with the World Influenza Centre, London and other influenza centres organised by the WHO in different parts of the world.

Leprosy: It has been estimated that 3.2 million people in India are suffering from leprosy out of which about 25 per cent are of the infectious type and 25 per cent suffer from deformities.

The National Leprosy Control Programme was launched in the year 1955 to control the spread of the disease and to provide modern treatment facilities to the leprosy patients. Till October 1981, the following components have been established under the above programme: Leprosy Control Units: 383; Survey education and treatment centres: 6,695; Urban leprosy centres: 445; Temporary hospitalisation wards: 226; Voluntary leprosy control units: 42; Number of beds provided: 32,000.

The Central Leprosy Training and Research Institute, Chingleput (Tamil Nadu), **Regional Leprosy Training Institute,** Aska (Orissa) and **Regional Leprosy Training & Research Institute,** Raipur (Madhya Pradesh) are the Regional Training and Research Institutions under the Central Govt.

Assistance to certain research programmes is received from the WHO in the form of equipment and drugs.

Private organisations also take active part in controlling leprosy. These include the Leprosy Mission, Hind Kushta Nivaran Sangh (the Indian Leprosy Association), Gandhi Memorial Leprosy Foundation (for addresses refer to the chapter on 'Institutions for the Handicapped') and 3 R' Society, C/o Tata Dept. of Plastic Surgery, Balaram Bldg., J. J. Group of Hospitals, Bombay 400008. In addition four centres helped by international agencies are also functioning. They include the French Centre in Andhra Pradesh, ELEP Centre and Swedish Mission Hospital in Tamil Nadu, and JALMA in Uttar Pradesh.

The Reconstruction Surgery Programme is receiving increasing attention of the Government of India and leprosy patients with deformities of hands, feet and face get facilities of corrective surgery now in about 30 hospitals in India.

Malaria: The incidence of the disease which used to be 75 million cases per year in 1952 has been reduced to about 0.1 million total cases in 1965. But due to world-wide shortage of DDT and BHC, and increase in their prices, spraying was limited causing an increase in the incidence of malaria. In 1975 there were 5.1 million cases which again were brought down to 3.1 million in 1979 and 2.7 million in 1981. Mortality due to malaria which in 1952 was estimated at 0.75 million deaths, is now a rarity. Deaths due to Malaria during 1981 were 164. Incidence of Malaria during 1976 was the highest in recent years, viz. 6,467,215. In order to tackle the growing incidence of Malaria a modified plan of operation at an estimated cost of Rs. 658.7 million per annum was implemented since April 1, 1977. There are at present 393,250 NMEP units functioning in the country covering a population of 535 million. The remaining population reside in areas which were never malaria endemic.

The National Institute for Communicable Diseases is responsible for research and field investigations and for the training of unit medical officers and district health officers in methods of malaria eradication. Other categories of health personnel are trained by the regional co-ordinating organisations established at Bangalore, Vadodara, Bhubaneswar, Hyderabad, Lucknow and Shillong.

Mental Diseases: At present there are 38 mental hospitals with accommodation for about 25,000 patients. About 1 million Indians suffer from mental sickness (1971).

It was proposed to establish 50 psychiatric clinics in medical colleges during the Fifth Plan. The following is a list of mental hospitals in India:

Andhra Pradesh: Government Mental Hospital, Waltair; Hospital for Mental Diseases, Hyderabad. **Assam:** Mental Hospital, Tezpur. **Bihar:** Hospital for Mental Diseases, Ranchi; Ranchi Mansika Arogya Shala, Ranchi. **Delhi:** Mental Hospital, Delhi. **Goa:** Mental Hospital, Panaji, Goa. **Gujarat:** Mental Hospital, Ahmedabad; Mental Hospital, Vadodara; Mental Hospital, Bhavnagar; Mental Hospital, Bhuj; Mental Hospital, Jamnagar. **Jammu & Kashmir:**

Mental Hospital, Srinagar. **Karnataka:** National Institute of Mental Health and Neuro Sciences, Bangalore; Government Mental Hospital, Dharwar. **Kerala:** Mental Hospital, Trivandrum; Mental Hospital, Trichur; Mental Hospital, Calicut. **Madhya Pradesh:** Mental Hospital, Indore; Mental Hospital, Gwalior. **Maharashtra:** Mental Hospital, Thane; Mental Hospital, Ratnagiri; Central Mental Hospital, Yeravada; Mental Hospital, Nagpur: Private Hospital, Miraj. **Orissa:** Orissa Red Cross Mental Health Institute, Cuttack. **Punjab:** Mental Hospital, Amritsar. **Rajasthan:** Mental Hospital, Jaipur; Mental Hospital, Jodhpur. **Tamil Nadu:** Government Mental Hospital, Madras. **Uttar Pradesh:** Mental Hospital Varanasi; Mental Hospital, Agra, Mental Hospital, Bareilly; Nur Manzil Psychiatric Centre, Lucknow. **West Bengal:** Mental Observation Ward, Calcutta; Lumbini Park Mental Hospital, 24-Parganas; Bangiya Unmad Ashram, Calcutta; Mental Hospital, Calcutta; Bodhi Peet Mental Hospital, Calcutta, Mental Hospital, Mankundu, Hooghly.

There are at present 51 institutions (25 Government and 26 private) for the **mentally deficient** and the **mentally handicapped.** The Major centres are in: Chandigarh (1), Uttar Pradesh (5), Karnataka (2), Maharashtra (19), Tamil Nadu (1), Madhya Pradesh (1), Kerala (1), Gujarat (3), Delhi (7), Bihar (2) and Andhra Pradesh (2).

National Institute of Mental Health & Neuro-sciences, P. Bag No. 2979, Hosur Road, Bangalore 560029, is registered as a society and it is the premier institution of its kind in India. (See Chapter on "Education" for courses conducted.)

The institute is backed by a well-equipped hospital complex. It provides treatment in the fields of neuro-surgery, neurology and psychiatry. A community psychiatric service in 50 surrounding villages and a project to probe "human consciousness" which includes a study of altered conscious states in the *Kundalini yoga* and after the use of drugs are among the schemes currently undertaken by the Institute.

Smallpox: As a result of intensive campaign carried out in 1974-75 with the help of the World Health Organisation, smallpox has been eradicated from the country. No smallpox case has been reported since May 1975. 9,597,687 primary vaccinations and 10,573,439 revaccinations against smallpox have been given during 1979 (upto Sept.).

Trachoma: Trachoma infection is highly endemic in the States of Punjab including Haryana (79.1 per cent), Rajasthan (74.3 per cent), Uttar Pradesh (68.1 per cent), and Gujarat (56.0 per cent). The States of Madhya Pradesh (41.3 per cent), Bihar (35.0 per cent), Assam (25.2 per cent), and Karnataka (22.6 per cent), are considered to be moderately endemic areas where the prevalence is more than 20 per cent but less than 50 per cent. The low endemic areas are the States of Jammu and Kashmir (16.8 per cent), Maharashtra (11.2 per cent), Kerala (8.7 per cent), Andhra Pradesh (5.3 per cent), Tamil Nadu (4.6 per cent), Orissa (2.7 per cent) and West Bengal (0.5 per cent).

About 45 million people are suffering from visual impairment and over 9 million are blind including 6 million who can be cured by surgery. Due to nutrition deficiency about 2 million people lost their eye-sight.

A National Plan for prevention of Visual Impairment and Control Blindness including Trachoma Control was drawn up with the main objective of providing eye-health care services to the community with emphasis on prevention and treatment. The control strategy of the programme includes (1) health education to the community; (2) temporary measures to provide immediate and comprehensive eye health care by establishing mobile units in different parts of the community and (3) creation of permanent infrastructure for eye care in general health services. International co-operation is being extended by WHO/UNICEF, UNDP etc. for the programme. Besides Danish International Development Agency has provided an assistance of Rs. 85 million for mobile units, and to strengthen PHCs and District hospitals. Financial assistance is being provided to voluntary organisations for organising eye-camps in rural areas.

Tuberculosis: There are at present 653 T.B. clinics in the country including 353 upgraded District T.B. centres. Approximately, 44,000 T.B. beds have been established. There are 17 T.B. demonstration and training centres.

It is estimated that the number of active cases is nearly 9 million of which 2.25 million are infectious. Almost all of the 3,119 towns and urban areas and 575,936 villages are affected by tuberculosis. The Government of India proposes to have one BCG team in every district. There are 320 BCG teams currently functioning in various States and Union Territories.

The National Tuberculosis Institute of India, Bangalore 560003, established by the Government of India in 1959 is responsible for formulating and continuous evaluation of India's National Tuberculosis Programme. It carries out applied research in tuberculosis, epidemiology, bacteriology and B.C.G. vaccination, sociological studies as well as operation research. This institute also arranges for the training of tuberculosis programme workers. There are two more research institutions at Madanapalle, Andhra Pradesh and Tamil Nadu. Training is also imparted at other institutions, such as Vallabhbhai Patel Chest Institute, Delhi.

The B.C.G. Vaccine Laboratory, Guindy, Madras is one of the largest B.C.G. producing laboratories in the world, manufacturing freeze dried vaccine. India is self-sufficient in BCG vaccine.

Venereal Diseases: India has an estimated 20 million people suffering from V.D. which comes to nearly 20 per cent of the reproductive age group. About 5 per cent of the total population suffers from syphilis and an equal percentage from gonorrhoea. Yaws is prevalent in a few districts of Andhra Pradesh, Orissa, Madhya Pradesh and Maharashtra.

V.D control schemes are sponsored by the Union Government, which gives all the money needed to the States and Union Territories. In India, 240 V.D. clinics function, whilst some hospitals have special wards for V.D. patients. A mobile V.D. unit at Safdarjang Hospital, New Delhi, has started functioning since July 1973. Sufficient quantity of VDRL antigen is produced in the country. During 1978 (upto Oct.) 303,120 V.D. cases were examined in the V.D. clinics. During 1979-80 about 452,640 patients were suffering from S.T.D. (Venereal Diseases) in various States & Territories.

Training: Facilities are available in the V.D. Training Centre, Safdarjang Hospital, New Delhi, and the Institute of Venereology, Government General Hospital, Madras. Efforts are being made to establish five regional, teaching and training centres at Bombay, Calcutta, Delhi, Madras and Bhopal.

National Water Supply and Sanitation Programme: This programme was launched in 1954. During the three Plan periods and three Annual Plans, about 418,700 new wells were constructed and 304,000 new hand-operated tubewells were bored. In addition about 554,000 old wells were renovated.

Nearly 36,000 villages with a population of 21.6 million have been provided with water supply. For the water supply and sanitation sector the Fifth Plan had allocated Rs. 10,206 million against Rs. 4,105.3 million in the Fourth Plan.

The programme also provides for the training of public health engineering personnel. The training programme is being implemented at the Victoria Jubilee Technical Institute, Matunga, Bombay 400019, the All India Institute of Hygiene and Public Health, Calcutta, the Engineering College, Guindy, Tamil Nadu and the Engineering College, Roorkee, Uttar Pradesh. The Central Public Health Engineering Organisation (C/o Min. of Health and Fly. Welfare) has been set up for helping State Governments in the preparation and execution of their schemes and for giving technical advice and guidance. Similar organisations have also been established in most of the States.

HEALTH EDUCATION: The Central Health Education Bureau at Temple Lane, Kotla Road, New Delhi 110002, established in November 1956, co-ordinates and promotes health education in the country through Health Education Bureaux established in the States and Union Territories.

The Bureau conducts a one-year Diploma in Health Education under the auspices of the University of Delhi and conducts in-service training programmes for health and family planning personnel such as, medical officers, mass education and information officers, media personnel etc. It conducts research on behavioural aspects of health and develops health education curricula for different age groups of students and teacher training courses. The Bureau organises exhibitions, maintains a film library and produces educational and publicity materials for National Health Programmes and programmes for promoting MCH nutrition and immunisation and against the menace of food and drug adulteration.

Publications: The Central Health Education Bureau publishes monthly journals *Swasth Hind* (English) and *Arogya Sandesh* (Hindi) for general readers and *Directorate General of Health Services Chronicle* for medical personnel.

It also produces health education material—folders, pamphlets, posters, filmstrips, etc. for use by health personnel and the general public.

FOOD AND NUTRITION: Several measures are being taken to meet the nutritional deficiency of certain vulnerable groups such as industrial workers, expectant and nursing mothers and school children. Skim milk powder supplied by UNICEF and other organisations is distributed to children and expectant and nursing mothers. Midday meals are provided to about 13.1 million primary school children. Other schemes being implemented are protein supplement to the diet of the vulnerable groups, opening of canteens in industrial concerns and offices and manufacture and popularisation of cheap and nutritious food.

Malnutrition is one of the major factors responsible for high mortality and morbidity in India. Nutrition divisions have been established in Health Dept. of 18 States and two Union Territories to tackle the problem of malnutrition. Those divisions assess the incidence of nutritional deficiencies among various groups, conduct nutrition education campaigns and supervise supplementary feeding programmes.

Quality control over food articles is exercised under the Prevention of Food Adulteration Act, 1954 (amended in Feb. 1976). Excepting Maharashtra, Assam and Kerala where the States have taken the responsibility, in all other States the work is left to the local bodies. The Director-General of Health has established a Food Squad under the Act to check adulteration of food at inter-state level. A few States like Madhya Pradesh, Andhra Pradesh, Gujarat, Maharashtra, Delhi and Pondicherry have also established separate food and drugs directorates.

Central Food Laboratories: The Prevention of Food Adulteration Act (amended in 1976) provides for the establishment of (four) Central Food Laboratories, viz. State Public Health Laboratory, Pune (West Zone); Central Food Laboratory, Mysore (Southern Zone); Food Research and Standardisation Laboratory, Ghaziabad (Northern Zone) and Central Food Laboratory, Calcutta (Eastern Zone).

The Government of India proposes to have regular refresher training course at the Central Food Technological Research Institute, Mysore, for analysts working in the country.

A two weeks' refresher course for senior Health Officers and administrators in the implementation of the Prevention of Food Adulteration Act is imparted in collaboration with the Indian Institute of Public Administration at New Delhi.

MEDICAL EDUCATION: There are 106 medical colleges with over 12,000 annual admissions in the country.

Dental Education: There are now 22 dental institutions, all affiliated to universities, training students for the degree of Bachelor of Dental Surgery (B.D.S.), having facilities for about 866 admissions. Fourteen of these institutions have post-graduate degree courses leading to M.D.S. and two institutions have 1½ year dental hygienist-cum-chairside dental assistant course.

(Refer to the chapter on "Education" for the list of dental institutions.)

Pharmacy: (See chapter on "Education", for institutes and/or universities teaching pharmacy.)

STATUTORY COUNCILS

Medical Council of India: Established under the Indian Medical Council Act of 1933 and reconstituted under the Indian Medical Council Act, 1956, this Council is responsible for the maintenance of the Indian Medical Register, uniform standards of medical education and for recognition of medical qualifications in the country. The total number of doctors on the Medical Register upto 31st December 1981 was 282,098.

Dental Council of India: This council was established under the Dentists Act of 1948 for the regulation of the profession of dentistry. It maintains uniform standards of dental education in the country. It also maintains the registers of qualified dentists, dental hygienists and dental mechanics, respectively. The number of dentists on the State Dentists Registers of the various State Dental Councils as on 1st April 1982 was 8,648.

Pharmacy Council of India: Was constituted under the Pharmacy Act, 1948 to prescribe the minimum educational standards for qualification as a pharmacist, to ensure that these standards are uniformly enforced throughout the country and to recognise qualifications in pharmacy granted outside the said Act which offered sufficient guarantee of the requisite skill and knowledge.

By 1980 the diploma courses in pharmacy were being conducted at 72 centres having annual admissions of 3,760 and degree course in pharmacy at 29 centres having annual admission of 1,039 per annum. The list of pharmacy institutions is given under the chapter on 'Education'.

The registration of pharmacists is the responsibility of the State Government's State Pharmacy Councils.

Indian Nursing Council: (Medical Council Building, Temple Lane, Kotla Road, New Delhi-110002.) The Council established under the Indian Nursing Act, 1947, is responsible for laying down uniform standards of nursing education.

The number of training institutions for nursing personnel and of students (in brackets) under training at the end of 1980 respectively were as follows:

Nurses: 286 (22,710); Midwives: 276 (2,901); Auxiliary Nurse Midwives: 323 (10,916); Health Visitors: 21 (735); B.Sc. (Nursing): 8 (1,155). During 1979-80 there were 146,201 registered nurses in India.

(See chapter on **State Associations** for State-wise list of medical associations)

Availability of Health Services in India

Items & Units	1960-61	1981-82
Hospital beds ('000)	186	505
Primary health centres (number)	2,800	5,739
Sub-centres (number)	1,649	59,511

POPULATION

INDIA'S total population touched 685 million on 1st March, 1981. This represents an increase of 25.0 per cent since 1971 when the population was 548 million. The main cause of this increase can be attributed to a fall in the death rate due to better health conditions. Efficient handling of epidemics and other natural calamities coupled with general improvement in economic conditions have also contributed to a rise in population apart from natural increase due to births.

Census: Most of the population data in India is available from the Census. The first synchronous Census in India was taken in 1881, and since then a Census has been taken every tenth year. The last of the series is the Census of 1981 which gives the population count at the sunrise of 1st March, 1981. Generally the Census count in India refers to the sunrise of 1st March, but because of the mid-term General Election the Census date of the 1971 Census was shifted by one month and it refers to the sunrise of 1st April, 1971.

The 1981 Census: The enumeration of the 1981 Census began on 9th February, 1981 and ended on 28th February, 1981. A revisional round was conducted during 1st to 5th March, 1981 to up-to-date the figures for the sunrise of 1st March, 1981. The houseless persons were enumerated on the night of 28th February, 1981.

The 1981 Census was conducted synchronously in all the States and Union Territories except for Assam and Jammu and Kashmir. In Jammu and Kashmir the enumeration was done from 20th April to 5th May, 1981 with the reference date being the sunrise of 6th May, 1981. The revisional round was conducted during 6th to 10th May, 1981. In Assam, Census could not be conducted synchronously because of the disturbed conditions. In order to determine the total population of the country as on 1st March 1981, the population of Assam has been borrowed from the estimates of the Expert Committee on Population Projections set up by the Planning Commission.

The Census Organisation on the basis of the 1981 Census has published final population totals and some other information. In the present section the figures have been updated wherever available and the remaining are based on the previous Census.

Number: India's population in 1981 numbered 685,184,692, comprising about 354 million males and 331 million females.

Growth: India's population which was 238 million in 1901 increased to 361 million in 1951 and to 685 million in 1981. Thus, in the first half of the present century, that is, during 1901-51, India's population increased by about 51.5 per cent whereas in the next thirty years during 1951-81 it increased by nearly 89.8 per cent

The rate of growth of India's population till the 1951 Census was slow and since then it has tended to increase at a faster rate. During the period 1921-51, India's population increased at a moderate rate but after the 1951 census it increased at an accelerated rate because of decline in death rate caused by health programmes initiated by the Government to control/eradication of epidemic and communicable diseases. It may be mentioned that during the decade 1911-21, India's population experienced a negative growth, excess of deaths over births, due to natural calamities and epidemics. During the inter-censal period 1961-71 the population increased by 24.80 per cent. Again, during 1971-81 the population experienced a growth of 25.0 per cent. This signifies that the growth of India's population has somewhat stabilised and may start declining with decline in fertility levels.

Future Growth: The recent increase in India's growth rate is due to a fall in the death rate and not due to any increase in the birth rate. The death rate has declined considerably in the last 60 years. Reliable estimates of birth and death rates are not available in India because of the shortcoming of the registration data. Efforts are being made by the Registrar-General of India to improve the quality of the registration data and a scheme called the Sample Registration System has been launched in different parts of India. The object of the scheme is to have sample areas, both urban and rural, in different States and Union Territories and to obtain reliable birth and death data in these areas. Most reliable estimates, however, point out that the **Birth-rate** in India in 1961 was around 43 and **Death rate** around 21 per 1,000 population. The sample registration system estimated that the birth rate in 1980 was 33.3 and the death rate 12.4. The birth rate in the rural areas was 34.6 and in the urban areas 28.1, whereas, the death rate was 13.5 and 8.0 respectively. It is estimated that the death rate might decline still further and reach the low level of 10 per 1,000 population by 1990 or so. Birth rate would, therefore, be the crucial factor in determining the future growth of India's population.

Expectation of Life and Death Rate: According to the estimates of the Sample Registration System, the expectation of life at birth for 1970-75 was 50.5 years for males and 49.0 years for females.

Growth of Population from 1901-1981

Year	Persons	Per cent Decade Variation
1901	238,396,327	—
1911	252,093,390	5.75
1921	251,321,213	(—)0.31
1931	278,977,238	11.00
1941	318,660,580	14.22
1951	361,088,090	13.31
1961	439,234,771	21.64
1971	548,159,652	24.80
1981	685,184,692	25.00

State-wise Growth Rate: The decennial growth rate of 1971-81 shows that the highest rate was observed in the Union Territory of Chandigarh followed by Andaman and Nicobar Islands and Delhi. In case of States, the highest rate was observed in Sikkim followed by Nagaland, Assam, Manipur and Tripura. The differential growth rate is due to differences in birth and death rates and in internal migration.

Age Structure: One of the consequences of high birth rate is that India has a 'young' population. Nearly 42.0 per cent of India's population in the 1971 Census was below the age of 15 years and only 6.0 per cent of the population was aged 60 years and over.

Income Structure: The average per capita income in the country at current prices has shown an increase in 1979-80 compared to the previous year but at the 1970-71 prices it has decreased.

The average **per capita income** in 1979-80 was Rs. 1,379 at current prices and Rs. 678 at the 1970-71 prices

In 1978-79 the average per capita income in India was Rs. 1,267 at current prices and Rs. 728 at 1970-71 prices.

Rural-Urban: A very large proportion of India's population lives in rural areas. However, urban population has grown from about 9 per cent in 1881 to about 23.3 per cent in 1981. Leaving aside the Union Territories, the most urbanised State in India is Maharashtra, in which about 35 per cent of the population was found living in the urban areas at the time of the 1981 Census. Bihar, Himachal Pradesh, Orissa and Tripura are less urbanised States with less than 15 per cent urban population.

Rural-Urban Population*, 1981

Residence	Persons
Total	685,184,692
Rural	525,457,335
Urban	159,727,357

1981	685	220	936	76.7	23.3	—	—	—	—	36.1	63.9	—

N.A.—Not available.

In the 1981 Census it was observed that about 60.4 per cent of the urban population of India lives in towns having a population of 100,000 and more. The corresponding figure for 1971 was 48.9 per cent. The growth of population in towns of large size is generally greater than in medium and small towns

As per the 1981 Census, there are 12 cities which have population of one million and above and these are Calcutta, Greater Bombay, Delhi, Madras, Bangalore, Ahmedabad, Hyderabad, Pune, Kanpur, Nagpur, Jaipur and Lucknow.

The twelve metropolitan cities (with their respective Urban Agglomeration figures) in India:

1. Calcutta	9,194,018
2. Greater Bombay	8,243,405
3. Delhi	5,768,200
4. Madras	4,289,347
5. Bangalore	2,921,751
6. Ahmedabad	2,548,057
7. Hyderabad	2,545,836
8. Pune	1,686,109
9. Kanpur	1,639,064
10. Nagpur	1,302,066
11. Jaipur	1,015,160
12. Lucknow	1,007,604

A city is regarded as metropolitan when its population exceeds one million.

Sex Ratio: There are more males than females in India. In 1961 the sex ratio was 941 females per 1,000 males and in 1971 it decreased to 932 females per 1,000 males. Differential mortality by sex may be responsible for this disparity in the sex composition. However, in the 1981 Census the situation improved and the sex ratio worked out to 936 females per 1,000 males. Probably during the decade 1971-81 the females gained comparatively more from the health programmes than the males. Only in Kerala the sex ratio is favourable to females and in other places it is favourable to males. In Haryana, Jammu & Kashmir, Nagaland, Punjab, Sikkim, Uttar Pradesh, Andaman & Nicobar Islands, Arunachal Pradesh, Chandigarh and Delhi the sex ratio is highly favourable to males where it is estimated to be less than 900 females per 1,000 males.

Literacy: Literacy which is defined as capacity to read and write with understanding in any language was as low as 5.8 per cent in 1891 and only 9.5 per cent in 1931. In 1981 it had increased to 36.1 per cent. Male literacy was found to be nearly 47 per cent and female literacy about 25 per cent. Rural areas have lower literacy rate than urban areas.

Religious break-up: According to the 1971 Census 82.7 per cent of India's population belonged to the Hindu religion and about 11.2 per cent to the Muslim religion. The percentage of the Christians and the Sikhs was 2.6 and 1.9 respectively.

Religion		Number	Percentage to total population	Percentage increase in 1961-71
Hindus	..	453,436,630	82.72	23.69
Muslims	..	61,418,269	11.20	30.84
Christians	..	14,225,045	2.59	32.58
Sikhs	..	10,378,891	1.89	32.28
Buddhists	..	3,874,942	0.71	17.33
Jains	..	2,604,837	0.48	28.49
Scheduled Castes	..	80,005,398	14.60	24.14
.. Tribes	..	38,015,162	6.94	26.00

Age at Marriage: In India, age at marriage is very low because of the prevalence of child marriages. From time to time suitable legislations have been passed specifying the minimum age at marriage for boys and girls. Nevertheless, a sizeable number of boys and girls seem to be married below the specified minimum age. However, the age at marriage shows an increasing trend over the decades which is an indicator of social change.

Decade		Age at marriage	
		Male	Female
1921-31	..	18.4	12.5
1931-41	..	20.3	14.4
1941-51	..	19.9	15.4
1951-61	..	21.8	15.4
1961-71	..	22.2	17.2

Age at Widowhood: It was found in the 1911 Census that 17.3 per cent of the females were widows. This percentage declined to 15.5 in 1931 and to 8.9 in 1971. The mean age at widowhood of those who are widowed by age 45 was found to be 34 years in the 1951-61 decade and 34.8 years in the 1961-71 decade.

Fertility: The fertility of Indian women is high and about 5.5 children are born to a couple who remain married throughout the reproductive period. This average number is, however, reduced to 5 when all ever-married women, that is, those who are widowed, divorced or separated are considered.

The pattern of age-specific fertility among females between the ages 15-44 shows that highest fertility exists among females in the ages between 20 to 29 years. The fertility curve shows a low but significant rate in the ages 15-19 years, a sharp rise in the age group 20-24 and 25-29 and a sharp decline after the age of 35.

Of the children born in a year roughly 62 per cent in rural India and 67 per cent in urban India are of first-three order births and 38 per cent and 33 per cent are of the fourth and higher order birth. About 23.5 per cent and 25.3 per cent are first order births, 20.9 and 23.5 per cent second order births, 17.2 and 17.8 per cent are third order births, 13.7 and 12.4 per cent fourth order births, 9.7 and 7.7 per cent fifth order births, and about 15.2 and 13.7 per cent sixth and higher order births in rural and urban India respectively.

There is some evidence to indicate that fertility of those women who are educated above Matriculation and also of those who marry after the age of 19 is lower than of those who are less educated or marry earlier.

Working Force: According to the 1981 Census, roughly 33.4 per cent of the population of India was in the working force. About 51.2 per cent of the males and 14.4 per cent of the females were workers. A larger proportion of the rural population was in working force. The work participation rate by residence shows that 34.8 per cent of the rural population (52.2 per cent male and 16.5 per cent female) was in working force whereas 29.2 per cent of the urban population (48.2 per cent male and 7.6 per cent female) was in working force.

Among the workers, nearly 42 per cent are cultivators, 25 per cent are agricultural labourers, 4 per cent are engaged in household industry and 29 per cent in other activities. In the rural areas nearly 51 per cent of the workers were cultivators, 30 per cent were agricultural labourers, 3 per cent are engaged in household industry and 16 per cent in other occupations. In urban areas nearly 5 per cent of the workers were cultivators, 6 per cent agricultural labourers, another 6 per cent are engaged in household industry and 83 per cent in other occupations.

Poverty Line: At least 294 million people in the rural and urban areas were living below the poverty line during 1977-78 under the norms adopted by the Planning Commission.

First Six States Area-wise: Madhya Pradesh (443.4 sq. kms.); Rajasthan (342.2 sq. kms.); Maharashtra (307.7 sq. kms.); Uttar Pradesh (294.4 sq. kms.); Andhra Pradesh (275.1 sq. kms.); and Gujarat (196.0 sq. kms.).

First Six States Population-wise: Uttar Pradesh (110,862,013); Bihar (69,914,734); Maharashtra (62,784,171); West Bengal (54,580,647); Andhra Pradesh (53,549,673); Madhya Pradesh (52,178,844).

Language-wise Break-up: According to 1971 Census, about 25 million people or 4.5 per cent of the total population speak their mother tongue other than the 15 languages listed in the Constitution.

The break-down of the population in terms of the 15 Constitutional languages is as follows (figures in million): Assamese — 8.96: Bengali — 44.79; Gujarati — 25.87; Hindi — 208.51; Kannada — 21.71; Kashmiri — 2.50; Malayalam — 21.94; Marathi — 41.77; Oriya — 19.86, Punjabi — 14.11; Sindhi — 1.68; Sanskrit— 2,212 (persons); Tamil — 37.69; Telugu — 44.76; Urdu — 28.62.

Six Most Thickly Populated States: (figures per sq. km.): The six most thickly populated States, excluding the Union Territories, according to the 1981 Census are: Kerala (654); West Bengal (614); Bihar (402); Uttar Pradesh (377); Tamil Nadu (271); and Punjab (331).

National Average Density: 220 per sq. km.

Density in Union Territories: (per sq. km.) (First three). Delhi (4,178); Chandigarh (3,948); Lakshadweep (1,228).

Per Capita Net Domestic Product for Different States

State/Union Territory	Year	Per capita (Rs.) (At current prices)	Per capita (Rs.) (At constant prices)
Andhra Pradesh	1977-78	1,002	322
Assam	1977-78	866	552
Bihar	1976-77	700	422
Delhi	1976-77	2,213	785
Goa, Daman & Diu	1976-77	1,686	1,240
Gujarat	1976-77	1,341	400
Haryana	1976-77	1,472	482
Himachal Pradesh	1977-78	1,154	359
Jammu & Kashmir	1977-78	986	355
Karnataka	1976-77	1,002	366
Kerala	1976-77	968	291
Madhya Pradesh	1977-78	896	494*
Maharashtra	1977-78	1,628	527
Manipur	1977-78	799	500*
Meghalaya	1973-74	598	N.A.
Orissa	1975-76	785	523*
Pondicherry	1976-77	1,341	N.A.
Punjab	1977-78	1,991	625
Rajasthan	1977-78	925	308
Tamil Nadu	1977-78	1,031	657*
Tripura	1975-76	813	374

Population Projections upto 1991

(in Million)

Year	Males	Females	Total
1971	283.5	263.6	547.1
1976	315.4	293.7	609.1
1981	347.6	324.4	672.0
1986	379.8	355.3	735.1
1991	412.4	386.5	798.9

The projected figures given above are of Projection III, prepared by the Expert Committee on Population Projections set up by the Planning Commission and has been recommended for official use. Projection III is based on the assumption that birth rate in India will reach a level of thirty per thousand population by 1982-83 and thereafter it will reduce by one point every year. As a result of the decline in the birth rate, the percentage of population in the age group 0-14, which at the time of the 1971 Census was around 41.5 will come down to 34.3 in 1991. The working age population in the age group 15-59 will however, increase. Its percentage which in 1971 was 53.3 will increase to 59.3 in 1991. However, on 1st March 1981, about 684 million persons were enumerated in the country. Thus, the projected population fell short of the enumerated population by about 12 million.

Literacy Rate by Sex, 1981

State/Union Territories	Persons	Males	Females
INDIA	36.12*	46.72*	24.80*
Andhra Pradesh	29.72	39.03	20.18
Bihar	26.01	37.78	13.58
Gujarat	43.75	54.53	32.31
Haryana	35.84	47.78	22.23

Pondicherry	54.23	64.00	44.30
Mizoram	59.50	65.99	52.57

*Excludes Assam.

HOUSING

THE problem of housing in India is a complex one, requiring finances on a large scale, and is dependent for its solution on the concerted efforts of individuals, co-operatives and Central and State Governments to be planned and executed over a number of years. With a growing population and the steady shift of population from the rural to the urban areas, the problem has become more difficult, both in qualitative and quantitative terms.

The total number of households in 1970 was 97.0 million—78.0 million in the rural areas and 19.0 million in the urban areas. Their numbers rose to 103.1 million at the beginning of the Fifth-Five Year Plan in 1974—81.4 million in rural areas and 21.7 million in urban areas. It is estimated that the growth of population alone demands 2 million dwelling units every year.

Shortage: The shortage of housing units at the beginning of the Fifth Plan (on the criterion that (i) every household in the urban areas should have a *pucca* house or semi-*pucca* house; and (ii) every household in rural areas should have a *pucca*, semi-*pucca*, or serviceable *katcha* house) has been estimated by the National Building Organisation at 15.6 million units—11.8 million in rural areas and 3.8 million in urban areas respectively.

On the basis of the 1971 Census and population projections made by the Registrar-General of India for 1981, the shortage of housing is estimated by the National Buildings Organisation at 21.3 million units—16.5 million in rural and 4.8 million in urban areas.

The priority in the Sixth Five-Year Plan (1980-85) is to focus the attention on the housing needs of absolutely shelterless people. The Plan outlay provides Rs. 8,373.7 million for Social Housing Schemes and Rs. 3,535 million for Rural House-sites-cum-Construction Assistance Scheme for the rural landless.

Household Incomes: Family incomes naturally, play a great part in a family's ability to acquire or afford a home. Income of families in the urban areas are much higher than families in the rural areas. For instance in Greater Bombay 56 per cent families have an income of less than Rs. 350 a month and 28 per cent less than Rs. 600 a month.

In the Asansol Industrial area of West Bengal 80 per cent families earned less than Rs. 350 a month and 19 per cent less than Rs. 600.

Household Expenditure: It is observed that an increasing amount of a family's income goes towards the purchase of food alone. A low income family's inability to pay for shelter can be seen from the expenditure pattern of the various income groups compiled by the Town and Country Planning Organisation, New Delhi. The survey covers South Delhi and is deemed to be representative for all major urban areas of the country (See table on next page).

HOUSING SCHEMES

(a) Central Sector Schemes:

Subsidised Housing Scheme for Plantation Workers: This scheme was transferred from the State to the Central Sector in 1970. The Central Government provides 50 per cent loan and 37.5 per cent grant for construction of homes to be occupied by the plantation workers free of rent. This scheme is being implemented in Assam, Tripura, West Bengal, Karnataka, Kerala and Tamil Nadu. The scheme has recently also been extended to Uttar Pradesh.

About 24,000 houses have so far been constructed in all the six States.

(b) State Sector Schemes:

Scheme for Provision of House-sites to Landless Workers in Rural Areas: The scheme aims at providing house-sites, free of cost, to families of landless workers and artisans like carpenters, potters, fishermen etc., in rural areas, who do not own a house-site or a built-up house or a hut on land of their own. It is proposed to cover all the landless families numbering about 14.5 million by 1985.

Since the inception of the scheme in 1971 and till December 1982, 10.4 million families have been provided with house-sites and about 2.2 million families with construction assistance.

The Sixth Plan envisages to provide sites to 6.8 million landless families and financial assistance for house construction to 3.6 million families at a total cost of Rs. 3,535 million.

Integrated Subsidised Housing Scheme for Industrial Workers and Economically Weaker Sections of the Community: Up to December 1981, 188,871 houses had been constructed.

Low Income Group Housing Scheme: The scheme provides for loan assistance up to 80 per cent of the approved cost of a house subject to a maximum of Rs. 14,500, to persons whose annual income does not exceed Rs. 7,200. Up to 31st December 1981, 342,639 houses had been constructed.

Growth of population in larger urban centres in India

M.C. Municipal Corporations

Source: 1. Census of India—1981—Housing and establishment tables Part IV (B). 2. Census of India—1971—Housing tables Part IV (B).

Village Housing Projects Scheme: Under this scheme loans are granted to villagers for construction of a house to the extent of 80 per cent of the cost or a maximum of Rs. 5,000. Loans are also granted to improve the environmental hygiene of the village. Upto the end of December 1980, 69,914 houses had been constructed.

Middle Income Group Housing Scheme: Loans are given to individuals earning between Rs. 7,210-Rs. 18,000 per annum. Loans are restricted to 80 per cent of the cost of construction subject to a maximum of Rs. 27,500. Loans are also given to eligible persons for the purchase of ready built houses. Up to the end of December 1981, 45,741 houses had been completed.

Rental Housing Scheme for State Government Employees: Under this scheme introduced in 1959, State Governments construct houses and rent them to their employees. Up to the end of December 1981, 35,023 houses had been completed.

Land Acquisition & Development Scheme: Financial assistance is given to States for large scale acquisition and development of land to make plots available at reasonable prices to house builders, particularly in the lower income group. The aim of the scheme (started in 1959) is to stabilise land prices, rationalise urban development and promote self-contained composite housing colonies. Up to 31st December 1981, about 13,748 hectares of land had been acquired and 7,438 hectares developed by various State Governments.

(c) House Building Allowances to Central Government Employees

To simplify the procedure and to cut down administrative delays, sanction of House Building Advances was decentralised from April, 1978. Ministries/Departments concerned were authorised to scrutinise and sanction advances out of funds allocated by the Housing Ministry. Out of the total revised Budget grant of Rs. 320 million, Rs. 314 million (approx.) has been allocated to the Ministries/Departments upto the end of December 1982 and the balance is to be allocated during the remaining period of the financial year 1982-83.

Research: National Buildings Organisation, Nirman Bhavan, Maulana Azad Rd., New Delhi 110011, is engaged in documentation and dissemination of information on building science and technology to bring about improvement in quality of building construction and reduction in cost.

It is also the co-ordinating agency for housing and building statistics as well, and sponsors and conducts studies in socio-economic aspects of housing.

Central Building Research Institute, Roorkee, U.P.: Assists the building industry by developing new materials and techniques to achieve economy and efficiency.

Loans from Life Insurance Corporation to State Governments: Life Insurance Corporation has been lending money to State Governments every year in accordance with the allocation made by the Centre for the implementation of social housing schemes. These loans amounted to Rs. 3,861.6 million up to 1982-83, including Rs. 314.9 million during 1982-83. Similarly the General Insurance Corporation has so far given loans of Rs. 660 million up to 1982-83 including Rs. 250 million for 1982-83.

Expenditure Pattern of Various Income Groups

Annual Income Groups	Av. Income per household in Rs.	Total expenditure in Rs.	Expenditure, as % of income	Expenditure on food as % of total expenditure
Less than Rs. 2,500	1,996	2,190	109.7	72.2
Rs. 2,501-5,000	3,900	3,683	94.4	68.2
Rs. 5,001-7,500	6,288	5,302	84.3	62.9
Rs. 7,501-20,000	8,854-17,625	6,124-9,109	69.2-51.7	60.5-52.8
Rs. 20,000	22,303-48,656	10,335-14,620	46.3-30.0	48.3-46.6

LABOUR

THE seventh schedule of the Indian Constitution deals with the subject of labour and its various aspects which are the main concern of the Department of Labour. The implementation of the labour policy is mainly the responsibility of State governments though co-ordinated by the Union government, except in cases where labour is spread over in more than one State.

With industrial progress and growing awareness among workers of their rights and interests the Government has framed legislation to safeguard workers' interests, namely, health and welfare, minimum wages, bonus and social security measures. India also ratified the ILO convention No. 144 favouring tripartite consultations to promote international labour standard in 1979.

The working population formed 37.55 per cent of total population according to 1981 census.

Employment: According to the 1971 census 72 per cent of the working population was engaged in the primary sector, 11.1 per cent in the secondary sector and 16.7 per cent in the tertiary sector.

The occupational structure of the rural working population also revealed that 84.8 per cent were dependent on agriculture and allied activities, 6.6 per cent on mining, manufacturing and household industry and only 8.5 per cent in trade, commerce and other services.

In the urban sector 54.9 per cent were engaged in the tertiary sector and only 32.3 per cent found employment in the secondary sector.

According to 1981 census, out of the total working population of 247.1 million, 91.4 million were cultivators, 55.4 million agricultural labourers, 8.8 million belonged to household industry and 64.5 million related to various other spheres. There were about 27.1 million marginal workers.

Rural Workers: Nearly 80 per cent of the population of India and 83 per cent of the workforce live in the rural areas. The estimated workforce in the rural areas in 1978 was 216.16 million as against urban workforce of 44.76 million. The workforce in agriculture was 192.43 million. The remaining 23.73 million of the rural workforce was engaged in non-agricultural occupations. The rural workforce is expected to rise to 349.73 million by 1983.

Sex Break-up: The sex-wise break-up of the working population showed that 82.6 per cent of the total workers were male and 17.4 per cent female.

Age Break-up: 5.9 per cent of the total workers were children in the age group 0 to 14 whilst 7.8 per cent were over the age of 60. The social reality is that nearly 10.8 million children are labourers despite the law against child labour, whilst lack of old age security compels people to work beyond the retirement age.

Employment Exchanges: The total number of employment exchanges functioning in the country at the end of 1982 was 692 as against 663 at the end of 1981. These included 73 University Employment Information & Guidance Bureaux, 16 Professional & Executive Employment Offices, 7 Colliery Employment Exchanges, 10 Project Employment Exchanges, 22 Special Employment Exchanges for the Physically Handicapped and 1 Special Employment Exchange for Plantation Labour. In addition 211 Employment Information and Assistance Bureaux to cater to the needs of rural areas were also functioning in different Community Development Blocks.

The number of vacancies notified by employers was 837.7 thousand during 1980 against 878.7 thousand in the previous year.

Employment of Handicapped: Special employment offices for the physically handicapped are functioning at Bombay, Delhi, Madras, Hyderabad, Calcutta, Kanpur, Bangalore, Ahmedabad, Chandigarh, Ludhiana, Trivandrum, Patna, Jabalpur, Jaipur, Simla, Bhubaneshwar, Gauhati, Agartala, Rajkot, Surat, Baroda and Imphal. In addition Vocational Rehabilitation Centres are functioning, one each at Bombay, Hyderabad, Delhi, Kanpur, Jabalpur, Ludhiana, Calcutta, Madras, Trivandrum, Bangalore, Sitamarhi, Gauhati and Ahmedabad for vocational evaluation and imparting adjustment training to physically handicapped persons.

Apprentice Training Scheme: Under the Apprentice Act, 1961, it is obligatory on the part of employers in organised sectors to engage apprentices as per ratio fixed by Central Government. Persons possessing qualifications from 5th standard to 10th standard are

engaged as apprentices in 138 different designated trades in 217 industries. 122,610 trade apprentices were undergoing training as on April 30, 1982. Out of these roughly 40,334 belong to weaker section viz. Scheduled Castes, Scheduled Tribes, physically handicapped, minorities and women. Also 13,555 graduate and technician apprentices have been engaged.

Stipend: The present rate of stipend for various categories of apprentices is—Trade apprentices in the first year of their training get Rs. 230 per month, in the second year Rs. 260, in the third year Rs. 300 and in the fourth year Rs. 350. Engineering graduate apprentices get Rs. 450 per month, while sandwich course students having a degree get Rs. 320 per month and diploma-holders (for post institutional training) get Rs. 320 per month. Sandwich course students from Diploma Instt. get Rs. 250 per month.

Industrial Relations: The number of mandays lost due to strikes and bandhs in 1983 was 30,743 causing a loss of Rs. 7.91 million. The number of workers retrenched during 1983 was 485 in cotton textiles, 2,534 in engineering and 18.191 in all other industries.

Employment Situation: The employment in the Organised Sector increased from 22.879 million at the end of March, 1981 to 23.558 million at the end of March, 1982 registering a growth rate of 3.0% as against an increase of 2.6% during the preceding year 1980-81. An analysis of the employment data pertaining to different branches of the Public Sector revealed that all the branches of the Public Sector recorded an increase in employment during the year 1981-82. The highest growth rate was attained by the Central, Quasi Govt. establishments, being 9.7% followed by Local Bodies 2.4%, Central Govt. establishments and State Govt. establishments 1.7% each and State Quasi Govt. establishments 0.5%.

Employment in Private Sector: The employment in Private Sector increased by 2.9% during 1981-82 against a growth rate of 2.3% recorded in the preceding year 1980-81. In absolute terms, the employment increased from 7.395 million at the end of March, 1981 to 7.611 million at the end of March, 1982.

Employment in Public Sector: Employment in the Public Sector increased from 14.68 million at the end of March 1979 to 15.08 million at the end of March 1980 contributing a growth rate of 2.7 per cent during 1979-80 as against an increase of 3.4 per cent achieved during the previous year. An analysis of the different branches of the Public Sector showed that all the branches of Public Sector recorded an increase in employment during 1979-80. The highest rate of growth was in the State Quasi-Government establishments (7.0 per cent), State Government establishments (3.2 per cent), Central Quasi-Government establishments (2.3 per cent), local bodies (0.8 per cent) and Central Government establishments (1.4 per cent).

Unemployment: The total number of work-seekers on the live register of Employment Exchanges showed a rise of 10.7 per cent from 17.838 million in December, 1981 to 19.753 million in December, 1982. The total number of placements effected during the year 1982 was 473,000 as against 504,000 during the corresponding period of previous year, showing a decline of 6.2 per cent.

Out of the educated job-seekers, 5.56 million were Matriculates. 2.44 million under-Graduates (including Intermediate and Higher Secondary) and 1.77 million were Graduates and above.

The number of job-seekers belonging to the Scheduled Castes and the Scheduled Tribes on the live register of Employment Exchanges at the end of December 1982 was 2.21 million and 0.60 million respectively as against 1.97 million and 0.55 million respectively in December 1981.

Women work-seekers on the live register at the end of December, 1982 were 3.14 million as against 2.73 million in December 1981. During the period January-December, 1982 the number of placements effected in respect of women job-seekers was 63,000 as against 63,600 during January-December, 1981.

Wages: The per capita annual earnings of workers drawing less than Rs. 1,000 per month in the manufacturing industries increased from Rs. 5,614 in 1977 to Rs. 5,797 in 1978. The average daily employment of such workers in 1978 was 3,620,000. The figures exclude those for Railway workshop and groups of industries of seasonal nature consisting of food, beverages, tobacco and gins and presses but includes installations.

Trade Unions (See chapter on Trade Unions).

Employees' State Insurance Corporation: The ESI Scheme covers 7.3 million persons for provision of social security benefits and extends medical care to 28.2 million people. An amount of Rs. 916.66 million was disbursed to insured persons towards cash benefits and Rs. 808.67 million was spent on provision of medical care during 1981-82. The Corporation has paid Rs. 998 million out of Rs. 1,539 million sanctioned on construction of ESI Hospitals, annexes with 17,017 and 798 beds respectively have been commissioned.

Labour Education & Training (See chapter on Education).

Employees' Provident Fund & Miscellaneous Provisions Act, 1952.

Under this Act three Schemes have been framed:

(i) The Employees' Provident Fund Scheme, 1952;
(ii) The Employees' Family Pension Scheme, 1971; and
(iii) The Employees' Deposit-linked Insurance Scheme, 1976.

The salient features, in brief of these three schemes, are as follows:

(1) *The Employees' Provident Fund Scheme, 1952:* The Act and the Scheme have been made applicable to 172 specified industries classes of establishments upto December 31, 1982. All factories/establishments engaged in one or more of these industries/classes of establishments and employing 20 or more persons and having completed the infancy period (viz., 3 years for establishments employing 50 or more persons and 5 years for those employing more than 20 but less than 50 persons) are covered under the Scheme. The statutory rate of Provident Fund Contribution—employers' and employees' share each is 8 per cent of pay (i.e. basic wages, dearness allowance including cash value of food concession, if any, and retaining allowance, if any) in respect of factories/establishments (including 5 part industries) engaged in 95 specified industries/classes of establishments and employing 50 or more persons and 6.25 per cent in respect of the other factories/establishments.

The qualifying period of service for membership of the Provident Fund is three months' continuous service or 60 days of actual work during a period of three months or less or on becoming permanent, whichever is earliest.

Membership: At the end of December, 1982 the number of subscribers was 12.40 million in respect of 137,961 covered establishments (both exempted and unexempted) and the total Provident Fund contributions collected was Rs. 87,706.3 million.

(2) *The Employees' Family Pension Scheme, 1971:* The Scheme came into force w.e.f. 1st March, 1971 and covers the employees enrolled as members of the Employees' Provident Funds Scheme, 1952, thereafter, the existing subscribers of the E.P.F. Scheme, 1952 as on 28.2.1971, were given the option to join this Scheme. As on December 31, 1982, there were 7.40 million members of the Family Pension Scheme. The rate of contribution is 1.6 per cent of the pay of the employees, diverted out of both employer's and employees' shares of contributions to the Provident Fund with an equal share contributed by the Central Govt. who also bears the total administrative expenses of this Scheme. As on December 31, 1982 a total amount of Rs. 4,640.3 million was received as contributions' (including Central Govt.'s share) in respect of this Scheme.

(3) *The Employees' Deposit-linked Insurance Scheme, 1976:* This Scheme, which came into force w.e.f. August 1, 1976, is applicable to all employees who are members of the Provident Fund, both in exempted or unexempted establishments. The Scheme provides for the payment to the nominees/heirs of a member in the event of his

Rehabilitation of Bonded Labourers (1982)

State	Number of bonded Labourers							Those to be rehabilitated	Funds released to State Govts. (Rs. in million)
	Identified & freed	Under other on-going schemes	Rehabilitated so far under the centrally sponsored Scheme						
			during 1978-79	during 1979-80	during 1980-81	during 1981-82	Total covered

Uttar Pradesh	8,753	1,368	495	2,606	500	3,784	8,753	—	382,400
Total	133,550	76,907	5,947	6,858	19,300	17,658	126,670	6,880	2,553,080

death, of an additional amount equal to the average balance in the Provident Fund account of the deceased member during the preceding three years, but not exceeding Rs. 10,000, provided that the average balance (after August 1, 1979) in the account of the deceased member is not less than Rs. 1,000 during the preceding three years or during the period of his membership, whichever is less. Employees covered under this Scheme are not required to make any contribution to get the benefit under this Scheme. The Scheme is financed by the employees of the covered establishments @ 0.5 per cent of the pay of the employees, who are members of the Provident Fund and the Central Govt. also contributes an amount representing one half of the employer's contribution. The cost of administration of this Scheme is borne both by the employers and the Central Govt. @ 0.1 per cent and @ 0.5 per cent (respectively) of the pay of the employees. The employers of the exempted establishments however pay inspection charges @ 0.01 per cent of the pay of the employees. As on December 31, 1982, a total amount of Rs. 1,618.4 million and Rs. 363.5 million was received as contributions and Administration Charges respectively in respect of this Scheme, which includes Central Govt.'s share also.

Bonded Labour: The powers for enforcement of the Bonded Labour System (Abolition) Act, 1976 rest with the State Governments. According to reports from State Governments the number of bonded labourers so far identified and released is 161,075 till December 31, 1983. The 32nd round of the National Sample Survey (April 1979) indicated the number around 340,000.

Employment Publications: The Directorate of Advertising and Visual Publicity of the Government of India began in April, 1976, to bring out *"Employment News"* in English and *"Rozgar Samachar"* in Hindi every week

TRADE UNIONS

COLLECTIVE bargaining is an essential institution in a democratic set-up, helping to maintain a steady balance on the industrial front. However, factory regulations and legislation were introduced in India not because of the demands by labour but at the behest of the British textile industry which wanted to reduce the hours of work of labour. Ironically, it was workers who protested at the reduction of work-hours for they felt it would entail reduced wages.

The earliest labour legislation points to The Factories Act, 1881, which substantiates the Indian Labour Commission Report of 1908. Since the first labour law concerned the textile industry in Bombay, the city can claim to be the birthplace of the labour movement in India. By 1892 workers became conscious of their rights and in the initial stages resorted to petitions.

After World War 1, in 1918 the strike weapon was brought into play as a bargaining power. But this method gained only partial support among the workers. Collective bargaining was still away. It was only in 1919 that the labour movement received official recognition when labour was granted a seat in the Legislative Council. The birth of ILO gave a further impetus to trade unionism in Bombay and the first trade union, the All-India Trade Union Congress (AITUC) was established in 1920 while the All-India Railwaymen's Federation came up in 1925. The Indian Trade Union Act of 1926 granted legal status to all trade unions.

With the emergence of AITUC on the labour scene the British Government saw a threat to its policies through organised labour and in 1929 a Royal Commission of Labour was appointed.

Between 1925 and 1959, there was a radical change in the attitude of Government towards industry and its workers. Consequently, the number of diverse trade unions jumped from 29 in 1927 to 9,000 in 1955. Today Government is the largest employer in the public sector.

World War II and the influence of ILO compelled Government to play an active role in regulating industrial labour disputes. In 1945 the office of the first Chief Labour Commissioner was created. From 8,095 registered trade unions in 1955-56 the number shot up to 24,547 in 1975-76.

Significantly 1960s saw a spurt in employers' union, a big rise from 198 unions in 1961-62 to 555 in 1975.

Listed below are a few of the important trade unions.

All-India Port and Dock Workers' Federation, *Headquarters:* 9, Second Line Beach, Madras-600001.

Established: By P. D'Mello and Sibanlal Saxena in the year 1948.

President's Office: P. D'Mello Bhawan, P. D'Mello Rd., Carnac Bunder, Bombay 400038.

Regional Office: Port Shramik Bhawan, 26, Dr. Sudhir Basu Road, Calcutta-700023.

Total Membership: 201,000.

Number of Affiliated Unions: 32.

Present Office-bearers:

President: S. R. Kulkarni; *Vice-Presidents:* M.G. Kotwal, M. K. Raghavan, K. A. Khan, Parbati Das, Dr. S. Maitra; *General Secretary:* S. C. C. Anthony Pillai.

All-India Trade Union Congress: 24, Canning Lane, New Delhi 110001.

Established: 31-10-1920.

Regional Offices: State committees in all the States and Union Territories.

Total Membership: 0.34 million.

Number of Affiliated Unions: 3,004.

Present Office-bearers:

President: S. A. Dange; *Vice-Presidents:* M. S. Krishnan, B. D. Joshi, Mohd. Elias, J. Chittaranjan, M.L.A., K. G. Sriwastava, Homi F. Daji, N. K. Krishnan, M. Kalyanasundaram, M.P., Chaturanan Misra; *General Secretary:* Indrajit Gupta, M.P.

Centre of Indian Trade Unions: 6, Talkatora Road, New Delhi 110001.

Established: 30-5-1970.

Regional Offices at Hyderabad (A.P.), Gauhati (Assam), Patna (Bihar), Ahmedabad (Gujarat), Rohtak (Haryana), Sundernagar (H.P.), Bangalore (Karnataka), Trivandrum (Kerala), Bhopal (M.P.), Bombay (Maharashtra), Imphal (Manipur), Bhubaneshwar (Orissa), Jullundur (Punjab), Jaipur (Rajasthan), Madras (T.N.), Agartala (Tripura), Lucknow (U.P.), and Calcutta (W. Bengal) and in the Union Territories of Delhi and Goa.

Total Membership: 0.33 million.

Number of Affiliated Unions: 4,214.

Present Office-bearers:

President: B. T. Ranadive; *Vice-Presidents:* Jyoti Basu, Mohammed Ismail, S. Y. Kolhatkar, Sudhin Kumar, K. Ramani, Manoranjan Roy, C. Kannan, Susheela Gopalan (M.P.), P. Ramamurti, N. Prasad Rao, Har Sahay Singh; *General Secretary:* Samar Mukherjee; *Treasurer:* E. Balanandan.

Official Publications: 'The Working Class' (English), 'CITU Mazdoor' (Hindi), 'Sramik Andolan' (Bengali), 'Karmik Lokam' (Telugu), 'Shramik Ekta' (Oriya), 'CITU Sandesham' (Malayalam), 'Warga Yudha' (Marathi), 'CITU Saithee' (Tamil)—all monthlies and 'Voice of Working Women' (Bi-monthly).

Hind Mazdoor Sabha: Nagindas Chambers, 167, P. D'Mello Rd., Bombay 400038.

Established: 1948.

Total Membership: 0.73 million.

Number of Affiliated Unions: 1,500.

Present Office-bearers:

President: S. R. Kulkarni: *General Secretary:* D. D. Vasisht.

Indian National Trade Union Congress: 1B, Maulana Azad Rd., New Delhi 110011.

Established: 3-5-1947.

Total Membership: 2.23 million.

Number of Affiliated Unions: 3,863.

Present Office-bearers:

President: N. K. Bhatt, M.P.; *General Secretary:* G. Ramanujam.

Official Publications: 'Indian Worker', Weekly.

Rashtriya Mill Mazdoor Sangh: Mazdoor Manzil, G. D. Ambekar Marg, Parel, Bombay 400012.

Established: By late G. D. Ambekar on 19-5-1940.

Total Membership: 130,000.

United Trades Union Congress: 249, Bepin Behari Ganguly St., Calcutta 700012.

Established: By late Mrinal Kanti Bose, late K. T. Shah and Jatin Chakravorty in the year 1949.

Regional Offices: 780, Ballimaran, Delhi 110011; 11, McLean Street, Madras 600001; 119/75, Darshanpurwa, Kanpur 208012; Plamood, P.B. No. 1019, Trivandrum; Jakkanpur New Area, Patna 800001; 5th Rd., Santa Cruz East, Bombay 400055.

Total Membership: 417,461.

Number of Affiliated Unions: 540.

FOREIGN AID TO INDIA

INDIA'S agrarian economy had needed a prop in the initial stages to balance the external payments gap arising out of necessary imports meant to establish modern industries and the infra-structural facilities for their smooth operation. Thus foreign aid played a crucial role in our development process as it helped build the much-needed foreign exchange reserve.

Government-to-government assistance has flowed in, in the form of grants, loans, credits, collaboration ventures as well as plain gifts. These have helped us tide over our initial difficulties.

There has, however, been a significant shift in this role of foreign aid since the sixties. It became more committed to programmes which do not need foreign exchange expenditure. It was the only immediate solution to the threat of a fall in foreign exchange reserve. Today, foreign aid is a prop for internal equilibrium of the economy and a substitute for domestic resources raising ventures, easing the pressure on the rupee resources even as it provides for the foreign exchange needs to meet urgent imports.

Foreign Exchange Reserves: 1960-61: Rs. 3,040 million; 1970-71. Rs. 7,320 million; 1971-72: Rs. 8,490 million; 1972-73: Rs. 8,470 million; 1975-76: Rs. 10,237.3 million; 1980-81: Rs. 38,375.9 million. External assistance during 1982-83: Rs. 22,274.8 million. Foreign debt as on July 31, 1982: Rs. 159,498.7 million.

AID-GIVING COUNTRIES

United States: The total amount of U.S. economic assistance to India up to September 30, 1982 was 12,402.6 million dollars or, at the current rate of exchange 124,026 million rupees.

The break-up of this figure is as follows:

Grants (not repayable) 3,753.8 million dollars; Loans repayable in dollars 4,255.4 million dollars; Loans repayable in dollars or rupees convertible into U.S. dollars and/or third country currencies at the option of U.S. Government 423.8 million dollars; Loans repayable in rupees 3,371.0 million dollars (including PL 480 Title I rupee loans to Government of India equivalent to 2,494.5 million dollars, and Cooley Fund loans to private enterprises equivalent to 220.3 million dollars); housing investment guarantee for HDFC 20 million dollars; and amounts reserved from all rupee sale proceeds under PL 480 Title I sales agreement for U.S. Government uses equivalent to 578.6 million dollars.

The various U.S. Government programmes under which the aid funds are disbursed and the amounts sanctioned for each programme up to September 30, 1982 are as follows:

Programme (up to 30-9-1982)	U.S. Dollars (Million)	Equiv. Rupees at Current Rate* (Million)
1. USAID Tech. Assistance Programme:		
(*a*) Development Grants (not repayable)	518.7	5.187.0
(*b*) Loans (repayable in rupees)	148.1	1,481.0
2. USAID Development Loans:		
(*a*) Repayable in Dollars	3,091.8	30,918.0
(*b*) Repayable in Rupees	502.3	5,023.0
3. Wheat Loan of 1951 (repayable in dollars)	243.7	2,437.0
4. P.L. 480, Title I Rupee Payable Sales (grants, and loans repayable in rupees)	4,076.8	40,768.0†
5. P.L. 480, Title I Credit Sales (repayable in dollars, or rupees convertible to U.S. dollars and/or third country currencies)	423.8	4,238.0
6. P.L. 480 Title I Credit Sales (repayable in dollars)	244.9	2,449.0
7. P.L. 480 Title II Food Aid Grants (Donations through Voluntary Agencies and U.N. World Food Programme) (not repayable)	2,438.2	24.382.0
8. Emergency Flood & Famine Relief Grants (not repayable)	5.5	55.0
9. Disaster Relief Grants (not repayable)	7.8	78.0
10. Triangular Trade (repayable in rupees)	5.8	58.0
11. Housing Investment Guarantee Programme:		
(*a*) Grant for Housing & Urban Dev. Corpn. (HUDCO)	0.2	2.0
(*b*) Guarantee for Housing Dev. Finance Corpn. (HDFC)	20.0	200.0
12. U.S. Export-Import Bank Loans (repayable in dollars)	675.0	6,750.0
Total	12,402.6	124,026.0

*Rate of Conversion: $1.00 = Rs. 9.00

†Actual amount of P.L. 480 sale proceeds deposited by the Government of India under all rupee payable sales agreements totalled Rs. 22,430.8 million. Of this, actual amount utilised for Cooley Loans to private enterprises totalled

Rs. 1,244.0 million; for loans and grants to Government of India Rs. 18,118.2 million; and for U.S. Government uses Rs. 3,068 million. While rupee loans to Government of India have been fully repaid (pursuant to the Indo-U.S. Rupee Agreement), some of the loans to private borrowers (Cooley Loans) are still outstanding.

Note: The Indo-U.S. Rupee Agreement signed on February 18, 1974 between the Government of India and the U.S. Government provided for the disposition of U.S. owned P.L. 480 Title I rupees held in deposit with banks and those prepaid by the Government of India under all outstanding loans repayable in rupees. Under the terms of the agreement, the U.S. Government additionally granted Rs. 16,804 million to the Government of India — roughly two-thirds of India's rupees debt to the U.S. — which have been used for financing various economic development projects during the first three years (1974 to 1977) of India's Fifth Five Year Plan. (Roughly Rs. 8,000 million, mostly, of non-P.L. 480 funds were retained for U.S. Government uses.)

FY 1982 Programme: During U.S. Fiscal Year 1982 (October 1, 1981 to September 30, 1982), the U.S. Government aid funds were committed for the following projects and activities under various programmes:

COMMITMENTS IN U.S. FISCAL YEAR 1982
(October 1, 1981 to September 30, 1982)

	Project/Activity	Amount Obligated (In Million U.S. Dollars)
1.	**Development Loans (a)**	
	Madhya Pradesh Social Forestry (b)	10.0
	Maharashtra Social Forestry (c)	25.0
	Maharashtra Irrigation Technology & Management (d)	44.0
2.	**Development Grants**	
	Maharashtra Social Forestry (c)	5.0
	Maharashtra Irrigation Technology & Management (d)	3 0
	Alternative Energy Resources Development (e)	5.0
	Integrated Rural Health and Population (f)	4.05
	Development & Management Training (g)	2.4
3.	**Total Development Assistance**	**98.45**
4.	**PL 480 Food Aid**	
	Title II Gift Commodities — through U.S. Voluntary Agencies (h)	156.6
	Title II Gift Commodities — through World Food Programme (h)	23.0
	Title II Gift Commodities — through the Cooperative League of U.S.A. (CLUSA) (i)	17.7
	Sub-Total:	**197.3 (j)**
5.	**Other Grants**	
	HIG Grant to HUDCO for Design and Analysis of Shelter Projects	0.1(k)
	Grant to the Cooperative League of U.S.A. (CLUSA) to provide support for its continuing programme development and backstopping activities for the strengthening of the Indian cooperative sector	0.1
6.	**Disaster Assistance**	
	Grant to voluntary agencies for emergency relief and rehabilitation operations during cyclone in Orissa	0.2
7.	**U.S. Export-Import Bank Loans (Net)**	26.4 (l)
	GRAND TOTAL:	**322.55**

(a) Loans are repayable in 40 years with 2 per cent interest during the first 10 years grace period, and 3 per cent thereafter.

(b) Finances the establishment of a Social Forestry Directorate in the State of Madhya Pradesh to assist the state and the villages therein in managing non-traditional forest lands, community and private lands for increasing the supply of fuelwood, fodder and mixed plantation. The project is expected to supply 25 per cent of the current annual firewood needs in 5,000 villages in addition to other products from these plantations, to be planted on approximately 63,450 hectares of marginal or degraded land adjacent to villages.

(c) Supports expansion and strengthening of a social forestry extension organisation and reforestation programme in the state of Maharashtra to assist approximately 4,300 village *panchayats* in 27 districts in managing the lands to increase the supply of firewood, fodder, timber and other forest products. Also finances establishment of an information and technical unit to assist the State horticulture and social forestry departments in extension efforts; and helps in creation of nursery production, and plantation management skills in village communities. The project is expected to result in approx. 81,000 hectares of mixed plantation adjacent to rural villages.

(d) Finances design and construction of approximately 13 new prototype medium irrigation sub-projects, to test and demonstrate innovations in design, and construction and operation of irrigation systems involving farmers/irrigators more actively. Grant will finance training and technical assistance as well as studies related to the project and a resident project coordinator. The project is intended to improve the efficiency of surface irrigation in the state of Maharashtra.

(e) Finances professional and technical services, equipment, materials, and travel for carrying out collaborative research projects which will expand India's technical capacity to exploit its alternative energy resources and to develop selected energy technologies to a stage of application.

(f) This grant finances the construction of additional sub-centres, primary health centres, rural centres and quarters for female workers, training of additional village level workers, *dais*, and sub-centre level workers, and expanded services and support system including base-line survey and needs assessment, communications, management information, etc. The project is expected to contribute to the Government of India's Model Plan for improved access to health and family planning services that promote fertility and mortality reduction in 13 districts of Maharashtra, Gujarat, Punjab, Haryana and Himachal Pradesh.

(g) Finances training of middle and junior level government officials and a limited number of executives and technicians from the private sector, to strengthen the managerial and technical capabilities of public and private sector manpower in different areas. Most of the training will be short-term and will be conducted in India and, where appropriate, in the U.S. and other countries. Approx. 1,300 individuals are expected to be trained under this project.

(h) Gifts of U.S. blended food commodities of greater nutritional value have been imported for free distribution through U.S. Voluntary Agencies working in India and the U.N. World Food Programme. These agencies assist Government and private institutions in their programmes of maternal/child health, school feeding, mid-day meals, food-for-work, and to support humanitarian/relief activities.

(i) Gift imports of U.S. vegetable oil have been provided to the Cooperative League of U.S.A. in support of its programme of assistance in developing India's cooperative vegetable oil sector. Under this programme, U.S. donated oil is sold to generate funds for development of oilseed production and

marketing system owned and controlled by farmers' cooperatives. The project which is being implemented by the National Dairy Development Board, is expected to contribute to ease the supply of edible oils in India.

(j) Includes estimated ocean freight.

(k) The HIG grant assists Housing & Urban Development Corporation (HUDCO), a public organisation, and its clients to improve the analysis, design and implementation of low cost housing projects through the use of computers, technical services and training.

(l) Represents net total during January-December 1981, However, Exim-bank authorised total credits of $53.6 million during 1981 for Diesel Elec. Switchgears ($14.5 million); Dry-Kiln Cement Plant ($9.7 million); Goods and Services for Oil Exploration ($23.4 million); and for various industrial manufacturers ($6.0 million).

U.S.S.R.: The total value of Soviet long-term economic credits to India exceeds 1,475 million roubles. This amount is being utilised for the construction of more than 75 industrial and other projects in India. Among these projects there are steel plants in Bhilai and Bokaro with the capacity of 4 million tonnes of steel per annum each, oil refinery in Mathura with the capacity of 6 million tonnes of crude oil per year, two oil refineries at Koyali and Barauni with a capacity of 3 million tonnes each, Heavy Machine Building Plant in Ranchi, Heavy Electrical Equipment Project in Hardwar, power stations etc.

On April 27, 1977, the USSR sanctioned new 250 million roubles credit to India. This credit is repayable over a period of 20 years, including 3 years grace period, and will be utilised for a wide range of new projects in steel, coal and other industries.

On March 14, 1979 the USSR and India signed Long-term Programme of Economic, Trade, Scientific and Technical co-operation between the two countries. The Programme is intended for the period of 10-15 years and envisages both; further development of co-operation in such traditional areas as ferrous and non-ferrous metallurgy, oil and coal industry, machine building etc., and establishing co-operation in new areas, such as light, food, pulp & paper, building materials, industries, irrigation etc. The Programme also provides for setting up of production co-operation and specialisation, co-operation in designing and construction of projects in third countries, development of trade, scientific and technical ties.

In conformity with the long-term programme an inter-governmental agreement on co-operation in construction of metallurgical plant at Visakhapatnam was signed on June 12, 1979, a feasibility report for the construction of alumina plant in Andhra Pradesh was prepared, a working programme of co-operation in oil industry for 1980-85 was signed, new projects of co-operation in coal industry were chalked out, some measures for the improvement of production capacity utilisation of machine-building plants set up in India with Soviet assistance were worked out, etc. Working Programmes of co-operation in a number of new areas and a Protocol on co-operation in Science and Technology were signed. New Trade Agreement has been prepared.

Switzerland: *(i) Multilateral Development Aid:* About 40 per cent of the Swiss technical assistance are channelled through the U.N. specialised agencies like UNDP, FAO, WHO, UNICEF, etc. A part of the relief and humanitarian assistance is channelled through the World Food Programme.

(ii) Bilateral Development Aid to India:

Mixed Credits: As of today, Swiss Government has extended mixed and transfer credits to the extent of Swiss francs 238.5 million as well as a development loan of Swiss francs 35 million for a rural electrification project in U.P. In 1978, the Swiss Government decided to convert into grants the part of these credits and loans which was still to be paid back, *i.e.* 76.4 million Swiss francs.

Financial Assistance Loans: By end-1980, a contribution of 40 million Swiss francs had been made to the Agricultural Refinance & Development Corporation for its Credit Programme in favour of small farmers.

Technical Assistance Grants: From 1961 until 31 December, 1981, the Swiss Government had sanctioned a total of about 90 million Swiss francs for technical assistance grants to India. In 1981, SFr 8.4 million were disbursed under this head.

Relief and Humanitarian Assistance: For 1981, the Swiss Government disbursed an amount of 3.5 million Swiss francs for various activities in India.

United Kingdom: British aid to India has been granted through the Aid India Consortium since its formation in 1958. From June 1975, all British aid to India is in the form of grants. Upto 1982-83 British aid to India amounted to £1,854 million.

Some Major British Aided Projects in India are: *Power Sector:* 1. Rihand Super Thermal Power Station; (2) CESC's Titagarh Power Project; (3) Bandel Power Project; (4) Kolaghat Power Project; (5) Nagarjunasagar Power Project; (6) Durgapur Power Project. *Coal Sector:* (1) Longowall Mining Projects at Seetalpur, Pathakhera Moonidih. Murullidih; (2) Opencast Mining Project at Jayant Mine, *Industrial Sector:* (1) Thal Fertiliser Plant; (2) Hazira Fertiliser Plant; (3) Foot and Mouth Disease Vaccine Plant; (4) Security Paper Mill. *Others:* (1) Fertiliser Education Projects in six States in India; (2) Orissa Family Welfare Project; (3) National Bank for Agriculture and Rural Development Projects; (4) HUDCO Projects.

Canada: The Canadian development assistance programme in India began in 1951 with grants of $10 million for food aid, $5 million for projects and equipment, and a small amount of technical equipment. Until the mid-60s the programme averaged around $25 million per year. Then, with the onset of the famine years, it grew rapidly to the $100 million level. From 1974-75 onwards, Canadian Aid focussed specially on food grains, edible oils, fertilisers and small agricultural projects etc., keeping in view the Indian Govt.'s priority areas of development. In 1981-82 Canada expanded the programme into the energy and mining sectors and made new commitments totalling $154 million in development aid.

Commitments by Canada through the development assistance programme in India totalled $1,722.3 million as at the end (March 31) of fiscal year 1982-83. To this may be added export credits of $120 million, bringing the total programme of assistance to $1,842.3 million. Of the development assistance programme, which is administered by the Canadian International Development Agency, 60 per cent of commitments have been in the form of grants, and 40 per cent development loans (50-year maturity, 10-year grace period, with no interest or service charges). The export credits, administered by Canada's Export Development Corporation, have been on concessional terms varying with conditions at the time the credits were given.

India has become self-sufficient in foodgrains as is evident in the last few years, although agriculture remains a high priority sector for the Government of India. Canadian development assistance in India in future will concentrate on agriculture, energy and human resource development.

Among the major activities at present are lines of credit in the oil and natural gas sector, the power sector and the mining sector, as well as phase II of the Idukki hydro power station in Kerala, assistance to ICAR in dryland farming research, the provision of grants for edible oil and loans for agricultural refinancing.

In addition to the above there is an active and growing programme of activities by Canadian non-governmental organisations (NGOs) in India.

Canada has been the sixth largest bilateral donor to India, in 1981-82 in terms of net aid transfers to India during that year.

Some of the major projects which have received Canadian aid are: Idukki Hydro-electric Project (Kerala); Kundah Hydro-electric Project (Tamil Nadu); Synthetic Rubber Plant (Koyali, near Vadodara); bulk fertiliser handling equipment for the ports of Kandla and Calcutta; Earth Satellite Communications Station at Dehra Dun; Mining Exploration equipment for Geological Survey of India; Airport Navigation and Lighting Equipment for Delhi, Madras, Bombay and Calcutta.

Current Canadian financed projects are: $45 million Oil and Natural Gas sector loan—a line of credit for the procurement of equipment and services by the Oil and Natural Gas Commission and Oil India Ltd., $50 million loan to the National Bank for Agriculture and Rural Development (NABARD) for the provision of agricultural credit to the rural farmers in India; $4 million grant for the All India Coordinated Research Project for Dryland Farming in Hyderabad; $20 million loan for procurement of equipment and services by the mining sector; $30 million loan for procurement of equipment and services by the Power Sector and $88.7 million grant for the provision of Canola/rapeseed oil to the National Dairy Development Board.

New projects are in the planning stages in hydro-electric power, agriculture, provision of rapeseed oil as well as social forestry

Canadian Assistance to India During 1981-82 and 1982-83 Disbursed in Canadian Million $

Australia: Australian Development Assistance to India started in 1951. In the early years, assistance was in the form of commodities (wheat, flour, fertilisers, copper, milk powder and wool) and equipment (rail cars, rail wagons, trucks and radio equipment). Since the late 1960s however, Australia has tended to concentrate its aid in the agricultural field through bilateral projects.

Between 1951-61, wheat, electrolytic copper, sulphate of ammonia fertilisers, skimmed milk powder etc. were provided to meet shortages in India.

Food Aid: In response to food shortages in India, Australia made large gift shipments of food in 1965, 1966 and 1967. Following the series of successful harvests from 1967 to 1971, India announced termination of food grain imports on concessional terms from January 1972. However, due to increased cost of fuel and fertilisers and electricity shortages, etc., India sought further external supplies of food grains. In response Australia provided wheat to India as food aid during the period 1974-77. The value of wheat supplied in 1975-76 was approximately $A 7,500,000 and in 1976-77 $A 6,000,000.

Value of assistance received by India since the inception of the Development Assistance Programme to June 1982 (including Food Aid, Project Aid, and Training Aid) amounted to $A128 million.

Projects completed are: *(i) Bakeries Project*—1966-76 $A2.7 million; *(ii) Dairy Cattle*—1966-73 $A882,000, *(iii) Centrally Sponsored Exotic Cattle Breeding Farms*—1976-80 $A442,000; *(iv) Indo-Australian Cattle Breeding Project, Barapetta (Assam)*—1974-80 $A1.3 million; *(v) Indo-Australian Sheep Breeding Project, Hissar, Haryana*—1969-81 $A7.3 million; *(vi) Indo-Australian Apple Grading/Storage Project, Sopore, Jammu & Kashmir*—1978-82 $A 931,000; *(vii) Development Import Grants*—During 1978-79 Australia provided a grant of $A1.6 million for the import of developmental goods and services from Australia. The grant was utilised by the Government of India for the import of pig led and *(viii) Drought Relief-Water Drilling Equipment*—Australia has provided two truck mounted DTH rigs, accessories and spare parts valued at $A871,000 for use in the drought affected areas of Rajasthan.

The major Projects currently receiving Australian Assistance are: *(i) Indo-Australian Cattle Breeding Project, Hissar (Haryana):* Phase I of the Project (commenced on July 1974) concluded in July 1980 with an Australian contribution of $A 2.15 million. Australian expenditure during Phase II is currently estimated at $A 1.6 million.

(ii) Indo-Australian Fodder Seed Farm Project, Hessaraghatta (Karnataka): The $A 1.6 million project which commenced in August 1979 is to be completed in two years.

(iii) Indo-Australian Abattoir Project, Andul-Mourigram (West Bengal): The $A 2.2 million project which commenced in December 1982 is expected to be completed by the end of 1985.

(iv) Establishment of Plant Quarantine Facilities: Australia is providing equipment, expertise and training fellowships in the establishment of a Post Entry Plant Quarantine Station at Faridabad (near Delhi) at an estimated cost of $A 210,000.

(v) Indo-Australian Apple Technology Extension Project: The aim of this project is to assist the development of Kashmir's apple industry. At an estimated cost of $A 1.2 million Australia has to provide specialised equipment, vehicles, and advisory staff. The project is expected to be completed within four years.

Projects under consideration are: (i) Expansion of Frozen Semen Centres to assist in Assam's Cattle Industry; (ii) Assistance with Forestry Development; and (iii) Assistance with expertise in the Reclamation/Development of Arid Areas.

Australian Development Training Programme:

India has been participating in the training programme since 1946. Approximately 60 Indian personnel participate in the training courses offered under this Programme each year.

The Australian Development Assistance Courses (ADAC's) cover such fields as development economics, agricultural studies and community health.

Australia also arranges to conduct Special Training Courses to meet the specific needs of the developing countries. A Special Group Course was conducted in Sheep Husbandry and Dry Land Development during the years 1981 and 1982 for Indian officials actively engaged in managing Sheep Breeding Farms and Dry Land Development Projects.

West Germany: Aid to India for the financial year 1983-84 is envisaged to the tune of Rs. 1,350 million (DM 337 million). The break-up of the aid is as follows: Capital goods assistance (DM 47.5 million), General Commodity assistance (DM 53 million), Promotion of Indian development banks: IFCI (DM 20 million), ICICI (DM 20 million), NABARD (DM 55 million).

Under the project assistance of Rs. 780 million (DM 196.5 million) the following amounts have been earmarked; DM 65 million for Neyveli Lignite Corporation; DM 27.5 million for Super Thermal Power Plants at Korba and Ramagundam; DM 15 million for minor irrigation projects in Rajasthan; DM 20 million for schemes designed to meet the needs of economically weaker sections by HUDC and DM 14 million for other projects mutually agreed upon.

The technical assistance worth Rs. 130 million (DM 34.4 million) is made available for transfer of technology in different sectors of the Indian economy and covers areas like watershed management, technical training, pollution control and post harvest technology.

In addition to the allocations referred above an amount of Rs. 10 million (DM 2.72 million) has been offered to give scholarships to Indian candidates.

Overall German aid commitments to India since development assistance was taken up in the fifties amount to more than Rs. 32,000 million (DM 8 billion).

Netherlands: In 1983 an amount of Dfl 190 million (Rs. 540 million) has been made available to India. Of this amount, Dfl 96 million consisted of a loan on DAC conditions while Dfl 85 million was given as a grant and Dfl. 9 million (grant) was allocated for technical assistance. It is foreseen, however, that the level of disbursements in 1983 will be over Dfl. 200 million, due to commitments of former years.

Belgium: Belgium joined the Aid India Consortium in 1962 and upto 1982-83, it has extended State to State loan amounting to BF 4,410 million (1 BF —Re. 0.25) to India. The loan last granted for 1982-83 was of BF 350 million, inclusive of Debt Relief of BF 60 million

The terms and conditions of the loans have been liberalised progressively; at present the loan is available to India free of interest, with a repayment period of 30 years including an initial grace period of 10 years. Belgium has also extended to India suppliers' credit of more than BF 4,000 million to cover big purchases like ships.

Denmark: India has signed a loan agreement with Denmark in 1981 for a loan of Rs. 170 million (Danish Kroner 150 million), This amount will be utilised for the import of many items needed for the fertiliser industry and for the delivery of an incineration plant in New Delhi.

Besides technical co-operation is also rendered in various fields, such as animal husbandry, rural development, family welfare, preventive health, drinking water supply and small-scale industrial development. For the period 1979-82, a total of Rs. 430 million (Danish Kroner 380 million) has been disbursed as grants for technical assistance to India. For the period 1983-86, a total of Rs. 645 million (Danish Kroner 575 million) has been appropriated by the Danish Government as grants to support the implementation of development projects in the above-mentioned fields.

Japan: During the fiscal year 1981-82, Japan has agreed to pay an amount of 28,000 million yen as project loan at an interest rate of 2.75 per cent, and 30 years repayment period including 10 years grace period.

The projects for yen credit comprise Lower Mettur hydro-electric project, Hirakud hydro-electric project, and Thal Vaishet fertiliser project.

Japan has also agreed to extend an amount of 2,984 million yen as grant aid during the same fiscal year. The grant aid consists of social environment improvement (for purchase of small steel bars for construction of lower income group houses and hospitals etc.), debt relief, the project for encephalitis vaccine production, and supply of gymnastic and sports equipments

During the fiscal year 1982-83, Japan has agreed to extend an amount of 33,000 million yen as project loan at the above-mentioned condition.

The projects for yen credit comprise of the Anpara 'B' Thermal Power Station construction project, Oil and Natural Gas Commission off-shore supply vessel project, Calcutta Metro-Railways (Phase II) construction project, and Tamil Nadu State micro power stations construction project.

Japan has also agreed to extend an amount of 3,680 million yen as grant aid during the same fiscal year. The grant aids take care of debt relief, social environment improvement, and supply of audio-visual and photographic equipments.

As technical cooperation in 1982, Japanese Encephalitis Vaccine Production Project was started in 1982 as four year project to produce vaccine for two million people a year at the final stage, Remote Sensing Multi-Colour Data System was supplied to All India Soil and Land Use Survey, and Japan has accepted 48 trainees each in 1981 and 1982 from India to the Japan International Cooperation Agencies' courses.

Norway: Norway's bilateral technical assistance, by way of grants, to India for the four-year period beginning 1983 at a level of N. Krs. 140 million (Rs. 195 million) each year—totalling N. Krs. 560 million (Rs. 780 million).

Norwegian assistance will be utilised for the development of fisheries, family planning, science and technology and import of commodities like fertiliser and paper.

Sweden: Development Co-operation agreements providing Swedish aid—for fiscal year 1983-84 a total of SKr 340 million (about Rs. 550 million)—have existed and been renewed, usually on a biennial basis, since the mid-1960's. The entire assistance committed so far has been in the form of an outright grant.

The key portion of present development cooperation is projects/programmes for underserved rural areas in the fields of social forestry, primary health care and provision of potable water. For these purposes an increasing share of assistance funds, at present SKr 120 million per year, is set aside.

There is also a provision for general imports (SKr 95 million) and for imports to India of goods and services from Sweden (SKr 125 million), where out of the latter a substantial part is kept for energy projects.

France: France has granted India aid amounting to French Francs 6.080 million. French assistance has been permitted for the establishment of the following projects, viz. the Haldia refinery, Nasik thermal station, Khetri copper mines, caprolactum and polyethylene factories at Vadodara, fertiliser factory at Haldia, Kalpakkam reactor and two heavy water factories.

In 1982, India received French Francs 1.445 million as project credits and French Francs 90 million as non project credits. These credits include: (1) a loan of FF 870 million for the telecommunication project of Gonda (UP); (2) a loan of FF 445 million for various other projects mutually agreed upon.

The terms and conditions of these credits are: (a) 28 years repayment including 10 years grace period and 3 per cent interest for half of the loan; (b) Export credit of ten years duration for the other half.

IMPORT AND EXPORT TRADE

IMPORT and export trade patterns in India have undergone radical changes since independence. With the progress in industrial development she is no longer the mere exporter of basic raw materials. Exports cover a diversified spectrum of primary commodities and finished products, namely, jute manufactures, cotton fabrics, handicrafts, engineering goods, leather and leather manufactures, chemicals and allied products, etc. The markets abroad have expanded and spread to all parts of the globe, including the industrially-advanced countries.

Imports have also increased. Today we import scarce raw materials like oil and sophisticated machines which are the basic requirements for the infrastructure of our galloping industries.

The Government's export-import policy envisages a major role for large concerns as well as small entrepreneurs and hence provisions have been made for better incentives to small manufacturers through grant of loans, technological know-how, creation of exclusive export-oriented free trade zones, liberalisation of rules for the release of foreign exchange, tax holidays, incentives for foreign collaborations and joint ventures, etc. Stress is being laid on cost efficiency combined with maximum output to provide optimum benefits to the domestic economy. Recently an inter ministerial body called the Falta Export Processing Zone board has been set up.

During 1982-83, India's exports recorded a rise of 13 per cent to Rs. 88,140 million from Rs. 78,030 million in 1981-82. Imports increased by 5.4 per cent to Rs. 143,557.06 million in 1982-83 from Rs. 136,075.6 million in 1981-82. Consequently, India's trade deficit shrunk although negligibly to Rs. 54,470 million during 1982-83 from Rs. 58,680 million during 1981-82.

Trend in Exports

The growth in India's exports slackened during the recent years compared to that during the mid-seventies. India's exports rose by 27.2 per cent during 1976-77, by 5 per cent during 1977-78, by 6 per cent during 1978-79, by 12.8 per cent during 1979-80, by 3.9 per cent during 1980-81 and by 13.6 per cent during 1981-82. The composition of exports is presented in Table II.

Trend in Imports

India's import bill soared during 1980-81 and 1981-82. Though imports declined by 3.6 per cent in 1976-77, they rose by 18.7 per cent in 1977-78. Thereafter, again it climbed up by 13.1 per cent in 1978-79, 30.7 per cent in 1979-80, 40.6 per cent in 1980-81, 9.2 per cent in 1981-82 and 4.3 per cent during 1982-83. The detailed composition of imports is presented in Table III.

Regional Pattern of India's Foreign Trade

Table IV shows the regional pattern of our external trade. The U.S., Japan, the U.S.S.R., the U.K. and West Germany were our top five exporters and the U.S., West Germany, the U.K., the U.S.S.R. and Japan were the top five importers.

Table I: India's Foreign Trade and Foreign Exchange Reserves

(Rs. Million)

	Exports	Imports	Balance
1976-77	51,640 (27.2)	50,740 (−3.6)	+72
1977-78	54,040 (5.0)	60,250 (18.7)	− 6,210
1978-79	57,260 (6.0)	68,140 (13.1)	−10,880
1979-80	64,590 (12.8)	89,080 (30.7)	−24,490
1980-81	67,110 (3.9)	125,240 (40.6)	−58,130
1981-82	78,030 (13.6)	136,710 (9.2)	−58,680

Santa Cruz Electronics Export Processing Zone, Andheri East, Bombay 400096. It is a free trade zone created by the Ministry of Commerce, Govt. of India on Sept. 1, 1974 to encourage establishment of electronics industry for 100 per cent export, and to earn foreign exchange.

The Zone covers an area of 40.47 hectares and it can accommodate about 100 units. As on 31st March, 1983 the number of approved units amounted to 71 of which 45 are in operation. The total exports made from zone since its inception in September, 1974, till 31st March, 1983 were of the order of Rs. 1,279.3 million. The exports for the year 1982-83 were of the order of Rs.543.8 million.

SEEPZ Administration renders all assistance to entrepreneurs for setting up facilities in the Zone, after they are approved for setting up a project in the Zone by the SEEPZ Board. The clearances are given at a single point. Since the operations in SEEPZ are all for 100% export purposes there are certain relaxations in the application of local laws such as custom MRTP and FERA.

The SEEPZ units enjoy a five year tax holiday. A SEEPZ unit may also be permitted, subject to certain conditions to sell a part of its output in the local market on payment of appropriate duties.

Export Inspection Council of India, Pragati Tower, 26, Rajendra Place, New Delhi.

Estd. by the Govt. of India to advise the Govt. regarding the measures for enforcement of quality control and pre-shipment inspection in relation to the commodities intended for export and to draw up programmes with the object of improving the quality of export products and projecting a better image of India abroad. The Export Inspection Agencies at Bombay, Calcutta, Cochin, Delhi and Madras functioning under the administrative and technical control of the Export Inspection Council, have a total network of 58 offices throughout India.

EXPORT PROMOTION COUNCILS

Apparels Export Promotion Council: Textile Centre, Poona St., 34, P. D'Mello Road, Bombay 400009; Sahyog Bldg., 4th Floor, 58, Nehru Place, New Delhi 110019.

Basic Chemicals, Pharmaceuticals and Cosmetics Export Promotion Council: Jhansi Castle, 4th Floor, 7, Cooperage Road, Bombay 400039. Gram: "Chemexcil". Telex: 011-4047. *Regional Offices:* *(i)*No. 23/1&2, 6th Main Road, 3rd Cross, Gandhinagar, Bangalore 560009; *(ii)* Kankaria Estate, 9th floor, 6, Little Russell St., Calcutta 700071.

Cashew Export Promotion Council: Chittoor Road, Ernakulam, Cochin 682016.

Chemicals and Allied Products Export Promotion Council: 14/1B, Ezra St., Calcutta 700001. BANKING

BANKING is known to have been practised in India since the sixth century B.C. by money-lenders. They dealt in 'hundies' i.e. bills of exchange. During the 17th century A.D. the indigenous bankers used to make remittances of money, grant crop loans and property loans and also finance agriculture and internal trade.

With the arrival of the British East India Company, a great change took place in the monetary system in India. A few British merchants in Calcutta promoted Agency Houses which received deposits and granted advances and also issued paper currency. The Calcutta Agency Houses were the precursors of early Joint Stock Banking in India. To Alexander & Co. goes the credit of establishing the Bank of Hindustan in Calcutta in 1770.

In 1833 the Calcutta Agency Houses came to grief because of reckless speculation. Around that time a few banks were established which were based on the principle of unlimited liability. Between 1833 and 1860, 12 such banks were established and half of them had to close down due to speculation and frauds. In 1860, by an Act, the principle of limited liability was applied to the Joint Stock Banking. It was between 1806 and 1843 the Bank of Bengal, the Bank of Bombay and the Bank of Madras were established under a Charter. The Government were shareholders in these banks and deposited large funds with them. These three banks were renamed the Presidency Banks by an Act of the British Parliament in 1876 and in 1920 the three Presidency Banks were taken over by the Imperial Bank of India under a special legislation. The Imperial Bank acted as the banker to the Government till 1935 when the Reserve Bank of India was established as the Central Bank of the country.

As many as 3,484 (2,719 in unbanked centres) new branches were opened between July, 1981, and June, 1982, against 3,291 during the previous year. Of these, 1,230 branches were opened by 20 nationalised banks, 544 by the State Bank of India and its subordinates 182 by private sector banks, 1,527 by the regional rural banks and one by a foreign bank. The total number of bank offices stood at 39,180 on 30th June, 1982.

With the upsurge in **rural banking** there has been a significant diversification of bank credit to previously neglected sectors such as agriculture, small industries, transport, professionals and self-employed persons, retail trade, export and food procurement. Bank credit to these sectors had gone up from Rs. 9,050 million in June, 1969 to Rs. 291,590 million in March, 1982.

During the year gross bank credit increased by Rs. 43,550 million compared with an increase of Rs. 35,690 million during the corresponding period in 1980-81. There was an increase of Rs. 3,680 million in public food procurement credit as against a decline of Rs. 3,410 million during the previous year: Non-food gross credit also increased by Rs. 39,870 million against Rs. 39,100 million in the earlier year.

The total deposits of all scheduled commercial banks increased from Rs. 46,460 million in June, 1969 to Rs. 333,770 million in June, 1980, Rs. 405,490 million in June, 1981 and Rs. 458,310 million in June, 1982.

Average population served by the commercial banks is 17,500 at the end of June, 1982. It is 4,000 in Britain, 2,600 in France, 5,000 in the U.S., 5,500 in Japan and 1,300 in West Germany.

Working Results of Scheduled Commercial Banks: The working results of all 74 scheduled commercial banks indicate that their profits during 1981 increased by Rs. 126 million compared with the rise of Rs. 90 million in 1980.

Selected data for Scheduled Commercial Banks

Item	June 1980	June 1981	June 1982
No. of offices	32,419	35,707	39,180
Aggregate deposits (Rs. million)	335,770	405,490	458,310
Total bank credit (Rs. million)	220,680	265,510	301,040
Credit deposit ratio (%)	66.1	65.5	65.7
Investment in government and other approved securities (Rs. million)	118,240	142,220	168,830
Investment deposit ratio (%)	35.5	35.1	36.8
Cash in hand and balances with R.B. (Rs. million)	40,890	55,010	57,280

Progress of Banking

Item	June 1969	June 1982
BANK OFFICES (No.)	8,262	39,180
(a) Rural	1,832	20,398
(b) Semi-urban	3,322	8,763
(c) Urban	1,447	5,360
(d) Metropolitan centres	1,661	4,659

Earning of these banks during the year increased by Rs. 10,840 million to Rs. 53,055 million. The total expenses of these banks also increased by Rs. 10,710 million to Rs. 52,416 million or by 25.7 per cent during 1981.

Foreign Banks: The total income of 12 foreign banks increased from Rs. 1,831 million in 1980 to Rs. 2,212 million in 1981, showing a rise of about Rs. 381 million. The profit of the foreign banks thus showed an increase of about Rs. 144 million against Rs. 90 million in the previous year.

Nationalisation of Banks: Fourteen banks were nationalised by an ordinance on 20th July, 1969.

Nationalised Banks: The names of 14 banks and the names of the chairmen and managing directors are given below:

The Central Bank of India: B. V. Sonalkar; The Bank of India: Tarkeshwar Tiwari; The Punjab National Bank: S. L. Baluja; The United Commercial Bank: S. P. Sengupta; The Canara Bank: B. Ratnakar; The United Bank of India: C. R. Sengupta; The Dena Bank: M. N. Goiporia: The Syndicate Bank: H. N. Rao; The Union Bank of India; J. S. Bhatnagar; The Bank of Baroda: Y. V. Sivaramakrishnayya; The Allahabad Bank: R. Srinivasan; The Indian Bank: M. G. K. Nair; The Bank of Maharashtra: P. S. Deshpande; The Indian Overseas Bank: P. B. Srinivasan.

Besides, six more banks in the private sector were nationalised on April 15, 1980. The six banks and the names of chairmen and managing directors are: The Andhra Bank: K. G. K. Murthy; The New Bank of India: Vacant; The Oriental Bank of Commerce: Vacant; The Punjab and Sind Bank: S. Mohinder Singh; The Corporation Bank: Y. S. Hegde; The Vijaya Commercial Credit Ltd.: R. Vijayaraghavan.

Regional Rural Banks: There were 121 regional rural banks covering 207 districts in 19 states, as on June 30, 1982. These banks had set up 5,048 branches and had mobilised deposits worth Rs. 3,550 million towards the end of March, 1982.

Meanwhile, commercial banks continued the policy of expansion in unbanked and underbanked areas. The year ended June 1983 witnessed further expansion of branch network of commercial banks with emphasis on reduction of inter-regional disparities in the spread of banking facilities, increase in lending support to priority sectors particularly to weaker sections and larger mobilisation of deposits. Unbanked centres continued to receive special attention. Out of 2,030 new offices opened during the first nine months (July, 1982-March, 1983) of the year, 1,550 offices were in unbanked centres; the remaining 480 offices were in banked centres.

With the establishment of 2,030 new offices, the average population per bank office for the country as a whole declined to 17,000 in March, 1983.

The table below shows selected data of the six banks nationalised on April 15, 1980 (December 31, 1983):

(Rs. Million)

Name	No. of Branches	Total Deposits	Total Advances	Total Investment
Andhra Bank	728	9,055	5,265	2,713
Corporation Bank	348	4,060	2,168	1,225
New Bank of India	481	6,977	3,750	1,948
Oriental Bank of Commerce	386	4,873	2,652	1,458
Punjab and Sind Bank	576	8,361	5,228	1,786
Vijaya Commercial Credit Ltd.	607	6,045	3;370	1,861

Export-Import Bank of India, Mittal Court, 'B' Wing, 2nd Flr., 224, Nariman Point, Bombay 400021. An apex financial institution set up by the Govt. of India to provide financial assistance to exporters of goods and services from our country, and to co-ordinate the activities of other financial institutions engaged in the field of international finance.

Chairman & Mg. Director: R. C. Shah.

National Bank for Agricultural and Rural Development (NABARD): It has been formed by combining the Agricultural Refinance and Development Corpn; and two departments of Reserve Bank of India, dealing in rural credit. It was inaugurated on 5.11.82. It would provide an integrated structure for credit for rural and agricultural development.

The State-wise distribution of bank offices at the end of June 1969, June 1981 & June 1982.

BULLION

GOLD: The quest for gold is centuries old, but it has been available in bulk quantity only for the last 130 years. The gold mined between 1492 and 1975, is estimated to be 80,000 tonnes. But more gold had been mined from 1800 to 1975 than in the preceding 5,000 years, following more discoveries in Brazil, Russia, South Africa, California (U.S.A.), Australia and South America. More than three quarters of the total gold had been mined in the 20th century and little more than two-thirds of it since 1931. Since 1976 it is estimated that the gold production outside the communist world was 7,000 tonnes.

International Price of Gold: The price of gold in the free markets fluctuated between $124 an ounce in January 1976 to $132 in January 1977 and later went up to $243.65 in October 31, 1978. The year 1979 ended with a record price of $524 an ounce in London and $534.5 in Comex (New York). The year 1982 began with $383.9 and ended with $444.9

In January, 1975, the 126 countries of the International Monetary Fund (IMF) agreed to abolish the official price of gold, thus putting an end to the privileged role gold had been enjoying in the international monetary system since the end of World War II. The decision paved the way to the elimination of any reference to gold in the IMF statutes and amounted to a new step towards the release of gold stocks held by central banks.

The decision of the IMF to sell one-sixth of its gold to the market over a period of four years had a psychological impact on the Gold Market during 1976 and 1977; but in fact these sales represented less than eight per cent of total supplies.

Official Gold Holdings: The following table shows the value of gold holdings of central banks all over the world (except China, U.S.S.R. and associated countries) and of the I.M.F. in millions of Special Drawing Rights at 35 S.D. Rs. per fine ounce.

	1981	Sept. 1982
Central Banks	33,316	33,304
I. M. Fund	3,620	3,620
Total	36,936	36,924

Gold Production and Consumption: Gold production in the free market in 1982 was 994 tonnes. In the non-communist countries only 720 tonnes of gold was used for jewellery during the year. The sales of the Soviet Union, the world's second largest producer after South Africa, came down to 180 tonnes in 1982 from 280 tonnes in 1981.

The demand for gold touched 1,381 tonnes in 1970 while in 1973 it came down to 1,350 tonnes. Absorption of this in Europe was 780 tonnes, and in the rest of the world 570 tonnes.

India absorbed about 63 tonnes in 1973 compared to 110 tonnes in 1972, 179 tonnes in 1971 and 217 tonnes in 1970. The demand in 1974 was only 14 tonnes while in 1975 and 1976 it went to 25 and 33 tonnes respectively. In 1977 and 1978 India absorbed a total of about 65 tonnes. In 1979 the gold demand was estimated at 120 tonnes and in 1980 at 80 tonnes due to consumer resistance against high prices. Most of the gold that came to India in the past was through unauthorised imports. In 1981, about 20-30 tonnes of gold came into India and in 1982 about 66 tonnes.

Gold Standard: The true gold standard existed only in the 50 years preceding World War I. Till the 19th century most countries were on silver or bimetallic (silver 15 or 16 part, gold one part) standard. Britain went into a formal gold standard in 1816. Europe followed in 1870s and U.S.A. started after 1900—same as India. However, gold standard was only a phase and was over by 1914.

International gold exchange standard prevailed since the last war till 1973. It meant a country's monetary authority responsible for determining and managing the supply of gold to supplement their resources with key currencies, notably dollars and sterling, which could be redeemed for gold.

This pattern, however, changed when in February, 1973 the U.S.A. devalued its dollar for the second time in 14 months by 10 per cent.

An ounce of gold that for 37 years cost only $35 and which went, officially, to $38 in 1972, was worth $42.22 towards the end of 1973. In reality, no gold was traded at that price. In the wake of U.S. devaluation, the price of gold in London market shot up beyond expectations and the free price of gold at one time touched $198 per ounce in 1974.

In 1974, the U.S. withdrew the free convertibility of dollars with gold. Except. in France, there had been no restoration of an international gold standard thereafter.

In the outside world, 1978 and 1979 were the years of much uncertainty and great fluctuations in the fortunes of gold.

In 1978 the price of gold in the international market fluctuated between $172.50 and $226.60 per ounce and in 1979 between $219.34 and $426.37. In 1980, the gold price was between $850 and $975, and in 1981, between $600 and $390 per ounce. In 1982 the gold price fluctuated between $320 and $460 per ounce.

India and Gold: The Indian gold market is different from the international market. India has the world's largest stock of privately hoarded gold estimated unofficially at 5,400 tonnes against the aggregate world stocks of 87,000 tonnes. The mobilisation of this gold could affect the international market also, besides improving the economic conditions in the country. But this is unlikely to happen unless a social revolution takes place. As a protective measure, India's hoarded gold should be coaxed into the market and also her output of 2.6 tonnes per year should be stepped up. The demand for jewellery is about 100 tonnes per year in India. About 60 per cent of this is supplied through recycling of fabrication.

GOLD PRODUCTION: The following table shows the revised production of gold in various countries in fine kilos:

Countries	1982	1981	1980	1979
South Africa	6,64,000	6,57,000	6,74,000	7,03,300
Ghana	13,000	14,000	13,000	11,500
Other African	27,000	23,000	17,000	18,000
Canada	62,000	52,000	48,000	49,000
U.S.A.	44,000	43,000	30,000	28,300
Latin America	98,000	92,000	86,000	67,700
Philippines	25,000	23,000	22,000	19,100
Papua/ New Guinea	18,000	17,000	14,000	19,700
Australia	23,000	17,000	17,000	18,500
Other Asian/ Oceana	12,000	11,000	12,000	31,800
Europe	8,000	9,000	12,000	10,000
	9,94,000	9,58,000	9,45,000	9,77,000
South Africa (Per cent)	67	69	71.3	71.9

Stocks of Gold in India: It was estimated that the total stocks of gold in the country in 1951 was 85.4 million ozs. Since 1951 to December, 1972, the smuggled gold was estimated at 58.1 million ozs. bringing the total stock to 143.5 million ozs. (4,600 tonnes or 4,600,000 kg.) as on December 31, 1972. The present stock of gold in India is estimated at 5,400 tonnes.

Gold Auction by Government: Before the auction took place in the first week of May, 1978 there was a tendency towards a fall in the price of gold. However, after an initial fall the unofficial price of gold went up to as much as Rs. 720 per ten grammes. Slight fluctuations were recorded during May but the price never reached a level anticipated by the Government.

Unfortunately, by reason of the unprecedented world-wide speculation in gold that gathered momentum after August, 1978, the price of gold in the country went up by leaps and bounds and the Government was forced to suspend the gold auctions at the end of October after 14 auctions of which two were infructuous. The amount of gold sold by the auctions was 12.89 tonnes estimated at Rs. 365.5 million at the then prevailing price.

Since then the price of gold had gone up to as much as Rs. 1,800 per ten grammes in 1980 and at present ruling between Rs. 1,800 and Rs 1,900.

Silver

The year 1980 was the first time since 1971 the silver prices were lower at the end of the year than at the beginning. The frequency and violence of price fluctuations in the year were even greater than during 1979. The New York silver price (New York is the world's premier spot and future market for the white metal) reached a new all-time high of $48.00 per ounce and fell to $10.80 per ounce four months later. Investor and privately-held stocks increased by very large amounts in spite of record high prices, and finally, silver delivered to the market from secondary sources exceeded new mine production for the first time in history.

The 1980 average New York silver price of $20.63 per ounce was the highest in history and represented 86 per cent increase over the previous year. In December 1982, the price of silver was the highest in the New York silver market of $11.21 for the year and the lowest was $8 per ounce

It is estimated that in 1980, new production was 8,665 metric tonnes against an aggregate demand for 335 million ounces for industrial uses-out of this latter, India's share is estimated about 14.80 million ounces.

Gold & Silver Prices

(a) Spot prices relate to gold bullion upto 1963, 14 carat gold upto 1966 and to standard gold from 1967 onwards.
(b) Average relating to closing quotations for working days.
(c) The quotations from 1955-56 onwards are in Rupees and Naye Paise.
(d) The quotations from 1960 onwards are per 10 gms. of gold and per kg. of silver instead of tola and 100 tolas respectively.
(e) Spot prices of silver relate to 0.996 fineness.

Among the principal reasons for this spectacular rise in the price of silver is the persisting imbalance between the demand for industrial uses and primary supply (i.e. newly mined production) It is estimated that in 1980, new production was 255 million ounces against the aggregate demand for 355 million ounces for industrial uses—out of this latter, India's share is estimated about 16.00 million ounces.

For many years India has been an important source of silver to world markets. However, silver is not produced in India and whatever silver is exported comes out of stocks which were accumulated through the centuries. The Government is conscious of this fact and hence the attempt to regulate the export of silver. On February 20, 1979 it was decided to ban export of silver. However, according to Handy & Harman, perhaps 25.7 million ounces were shipped to the world markets during 1980, an increase of about 11.2 million ounces from the previous year. If prices remain at the present levels, a continuing outflow of silver from India may be expected.*

The consumption of silver in India during 1982 amounted to about 16 million ounces against 18 million ounces in 1980.

NATIONAL INCOME

NATIONAL income and related aggregates constitute some of the key economic data of any country. They provide a money measure of all economically meaningful activity, of savings, capital formation and consumption in addition to such standard information about the rate of economic growth, per capita income, net product by industry of origin and factor incomes by sectors. In the words of the first report of the National Income Committee, "a national income estimate measures the volume of commodities and services turned out during a given period, counted without duplication."

Usually, the estimates of national income are prepared both at current prices as well as in relation to a base year (that is, national income at constant prices) so that it is possible to evaluate the performance of the economy in real terms, thereby neutralising the impact of inflation. In many of the advanced countries which have a well developed statistical system, national income statistics are compiled on a quarterly basis and are available within 6 to 8 weeks from the period of reference. In India, however, these data are published only after a considerable time, though of late, the delay is somewhat less. These estimates for the country are prepared by the Central Statistical Organisation (CSO), usually in two stages. First, CSO issues what has been called the "Quick estimates" which is followed by a detailed White Paper entitled National Accounts Statistics.

According to the quick estimates released by CSO, the national income at constant (1970-71) prices registered an increase of 1.7 per cent during 1982-83 as against 4.9 per cent in 1981-82. In absolute terms, real national income during 1982-83 stood at Rs. 504,860 million as compared to Rs. 496,390 million in 1981-82. At current prices, India's national income rose by 9.9 per cent to Rs. 1,340,660 million in 1982-83 from Rs. 1,219,890 million in 1980-81.

The per capita income in real terms is estimated at Rs. 712 for 1982-83 as against Rs. 715 in 1981-82, showing a decline of 0.4 per cent. The per capita income at curent prices works out to Rs. 1,891 in 1982-83 as against Rs. 1,758 in 1981-82, an increase of 7.6 per cent.

Selected data on national income and related aggregates are presented in the following tables.

TABLE 1: TRENDS IN GROSS NATIONAL PRODUCT, NET NATIONAL PRODUCT AND PER CAPITA INCOME

Year	Gross National Product (Rs. million)		Net National Product (i.e. National income) (Rs. million)		Per Capita National Income (Rs.)

*As per cent of gross/net domestic product at market prices.

ECONOMIC SITUATION

OPTIMISM marks the economic situation during 1983-84, in contrast to the very poor showing in 1982-83. After a period of relative stagnation, the output of major food and cash crops is expected to touch new levels during the year thanks to the exceptionally good performance of the monsoon, aided by smooth and adequate supplies of key inputs. In particular, the harvest of foodgrains is likely to exceed the target of 142 million tonnes by a good margin. The industrial sector, based on preliminary data, is however, facing difficulties and no appreciable pick-up in growth rate as compared to the previous year is envisaged during 1983-84.

In any case, the targeted growth rate of 8 to 9 per cent is almost certain to be missed. But the performance is expected to be good in respect of the key industries like coal, cement and petroleum as well in the energy sector. The foreign trade picture is mixed with exports growth rate lagging behind the target but even so, with import bill more or less manageable, the trade deficit during 1983-84 may be smaller than in 1982-83. The price situation is causing anxiety with no abatement of inflationary pressures in evidence. Taking an overall view, the economic growth rate during the year may be an impressive 6 to 7 per cent as compared to around 2 per cent in the previous year. But this heartening factor should not obscure the fact that in the recent past economic performance has been uneven.

The economy showed a significant recovery in 1980-81 and made further substantial progress in 1981-82. The gross domestic product in real terms, which had declined by about 5 per cent in 1979-80, registered an increase of 7.9 per cent in 1980-81 and of another 5.2 per cent in 1981-82. Furthermore, the growth was accompanied by a marked decline in the rate of inflation in 1981-82. However, the weather conditions turned out to be unfavourable in 1982-83. Widespread drought and floods in certain parts of the country had a serious adverse effect on *kharif* output and the economy as a whole. The industrial growth rate declined. On the whole, the gross domestic product is expected to increase by about 2 per cent only in 1982-83. On this basis, the average real rate of growth during the three years 1980-81 to 1982-83 would work out to about 5 per cent, which is fairly close to the annual average of 5.2 per cent envisaged in the Sixth Plan.

Despite the fall in *kharif* output and slower industrial growth, the price situation was by and large kept under control through an appropriate mix of policies. The infrastructural sectors of energy, irrigation and transport showed substantial improvement, thereby providing a firm base for further development. The balance of payments position, however, continued to be under strain and the country had a substantial overall deficit although it was lower than in 1981-82.

Foodgrains production, which had declined to 109.7 million tonnes in 1979-80, rose to 129.6 million tonnes in 1980-81 and further to 133.1 million tonnes in 1981-82. In 1982-83, however, the *kharif* output received a serious setback due to severe drought over vast areas and floods in certain parts of the country. Drought affected some 48 million hectares in 1979-80. Efforts were made to minimise production losses during the *kharif* season and increase production during the *rabi* season through optimum utilisation of irrigation facilities and streamlined arrangements for the supply of other inputs.

An additional irrigation potential of 2.34 million hectares was created during the year, against 2.23 million hectares in 1980-81 and 2.24 million hectares in 1981-82. It is expected that *rabi* production would reach a record level of 56 to 57 million tonnes as against the previous high of 54 million tonnes in 1981-82. Wheat production is expected to touch a new peak of level of more than 41 million tonnes. On the whole, the total foodgrains production in 1982-83, is expected at 126.8 million tonnes, representing a decline of 6.3 million tonnes as compared to the preceding year. This decline is much less than the loss of 22.2 million tonnes suffered in 1979-80, even though the drought in 1982-83 was more severe than in 1979-80. This is indicative of the vigour and resilience of Indian agriculture and the timely and vigorous efforts of Government. Furthermore, the production of pulses in 1982-83 is expected to be slightly higher than in the preceding year. Among commercial crops, the production of sugarcane is at the same level as in 1981-82, of cotton higher by 2.2 per cent, of oilseeds lower by 10.4 per cent and of jute and mesta lower by 14.6 per cent.

With substantial efforts, the infrastructure showed a further improvement. Production of coal, which had increased from about 104 million tonnes in 1979-80 to as much as 124.9 million tonnes in 1981-82, is estimated to have risen further to about 130.6 million tonnes in 1982-83. Although this represents a shortfall of about 2.4 million tonnes as compared to the target, the production was more than adequate to take care of the requirements and the pit-head stocks are estimated to have gone up by about 2 million tonnes during the year.

Production of crude oil, which had increased from 11.8 million tonnes in 1979-80 to 16.2 million tonnes in 1981-82, is estimated to have risen further to over 21 million tonnes in 1982-83 as a result of the accelerated oil development programme. In fact, it was fairly close to the target of 21.6 million tonnes originally fixed for last year of the Sixth Plan. The corresponding figures for refinery throughout were 27.5 million tonnes in 1979-80, 30.16 million tonnes in 1981-82 and 33.16 million tonnes in 1982-83. On the whole, the prospect for oil development are now far better than at the time of the formulation of the Sixth Plan. The increase of domestic production of oil has contributed significantly to containing the import bill and keeping the balance of payments deficit within manageable limits.

Power generation, which had increased by 9.8 per cent during 1981-82, rose further by 6.5 per cent during 1982-83. In absolute terms, power generation in 1982-83 was 139.5 billion units, which was close to the target of 140 billion units. Thermal generation registered an impressive growth of 15.5 per cent during 1982-83 due to close monitoring better availability of coal, adequate supply of spares and improved maintenance of plant and equipments. Capacity utilisation in thermal plants increased from 46.8 per cent in 1981-82 to 49.8 per cent in 1982-83. The installation of new generation capacity increased from 1,823 MW in 1980-81 and 2,175 MW in 1981-82 to 3,060 MW in 1982-83, due partly to the measures taken to improve management, avoid delay in the execution of civil works and ensure delivery of plant and equipment according to the agreed schedules. Nevertheless, the actual installation of new capacity in 1982-83 still fell short of the target by 422 MW. Efforts for improving the performance in this area are, therefore, being further intensified.

The movement of revenue earning freight traffic by the railways, which reached the record level of 221 million tonnes in 1981-82, rose further to 228 million tonnes in 1982-83. Capacity utilisation by railways, as measured by net tonne kilometres per wagon per day, showed a further improvement and is estimated to have reached an all time high of 1,125 net tonne kilometres per wagon per day on the broad gauge section during 1982-83 as compared to 1,112 net tonne kilometres per wagon per day in 1981-82. The increased movement of traffic by the railways contributed materially to the maintenance of supply of various commodities at reasonable level in different parts of the country and had an all-round beneficial effect on the economy.

Industrial production, which increased by 8.6 per cent in 1981-82, recorded an increase of 3.7 per cent in 1982-83 over the previous year. The reasons for this relatively low growth rate vary from industry to industry. The growth is, however, by no means insignificant when viewed against the fact that it has been achieved on the relatively higher base of the previous year and also in spite of the sluggish output in many industries, which had achieved peak levels during the previous year, and a prolonged strike in textile industry. It is also encouraging to note that significant increases were recorded in the output of certain key industries like fertilisers, cement, sugar, vanaspati, newsprint etc. Besides, high growth rates were recorded in the case of industrial machinery like boilers, mining machinery, sugar machinery and chemicals and pharmaceutical machinery, earth moving equipment and transport equipment like scooters, motor cycles, mopeds and three-wheelers. There was, however, a decline in the case of railway wagons and coaches, locomotives and certain items relating to drugs and pharmaceuticals, basic chemicals and intermediates, machinery and consumer durables.

Although the overall growth of industrial production showed a substantial decline in 1982-83, there was no generalised recession in the economy. Several industries experienced a shortfall in output, but the causes of the shortfall were specific to each industry. The stringency of bank credit during the closing months of 1981-82 also affected the offtake of industries, which had recorded high levels of output in the previous year. Certain industries suffered due to power cuts or export constraints. In the case of the cotton textile industry, the prolonged strike in the Bombay mills further aggravated the situation and led to a significant decline in output.

Despite larger additional resource mobilisation by the Centre and the States in 1982-83 as compared to the original estimates, the total contribution to the Plan from the normal budgetary resources of the Central and State Governments and by way of internal resources of public enterprises fell short of the plan estimates. As a result, deficit financing is estimated to have been higher than originally envisaged. The budget deficit of the Centre is estimated to have increased from the original estimates of Rs. 13,710 million to Rs. 36,780 million. This includes an amount of Rs. 17,430 million on account of the medium-term loans given to the States to clear their deficits as on April 1, 1982, which did not have any economic impact in 1982-83. Excluding this amount, the budget deficit of the Centre shows an increase of Rs. 5,640 million over the original estimates. As for the States, all except six agreed in the discussions with the Planning Commission to close the year without any deficit. The agreed deficit of these six States is Rs. 850 million.

Since the unanticipated deficits of the States have a disturbing effect of the economy, particularly on the price situation, the Centre, in consultation with the Reserve Bank of India, evolved and introduced a new Overdraft Regulation Scheme from July1, 1982. It was made clear to the State Government that in case there were deficits at the close of the year 1982-83 or there was an excess in the deficit over what had been agreed to, this would be adjusted against the Annual Plan, 1983-84. However, in order to provide a cushion against temporary imbalances between receipts and expenditure, the State Governments' limits for ways and means advances from the Reserve Bank of India have been doubled. The new Overdraft Regulation Scheme has been working successfully so far and the State Governments have shown a satisfactory measure of co-operation in avoiding the recourse to accommodation from the Reserve Bank to finance their normal expenditure.

Money supply increased by 12 per cent during 1982-83 as against 6.5 per cent in 1981-82. The increase in aggregate monetary resources (M3) at 14.8 per cent was, however, only a little higher than the increase of 12.6 per cent in the preceding year. The higher rate of increase in money supply in 1982-83 was mainly on account of the contraction of the net decline in the banking sector's foreign exchange assets.

Judicious use of fiscal and monetary policies with efficient supply management helped in keeping the inflationary pressures under control despite the severe setback to kharif output on account of the adverse weather conditions. Although on a point-to-point basis, the index of wholesale prices showed an increase of 6.2 per cent in 1982-83 as against 2.4 per cent in the preceding year, the average index for 1982-83 showed an increase of only 2.5 per cent over the preceding year. The corresponding increase in the average index in 1982-83 was as much as 9.3 per cent. The consumer price index on a point-to-point basis, shows an increase of 9.8 per cent during 1982-83 as against 8.8 per cent in the preceding year. The increase in 1982-83 in the average consumer price index was, however, 7.7 per cent which is lower than the increase of 12.5 per cent in the preceding year.

The increase of 6.2 per cent in the index of wholesale prices during 1982-83 on a point-to-point basis was due largely to the increase in the prices of agriculture-based commodities primarily because of the unfavourable monsoon and its adverse impact on kharif output. Cereals accounted for as much as 21.6 per cent, fruits and vegetables for 12.3 per cent and tea for 7.8 per cent of the price rise. Among non-agricultural commodities, fuel, power, light steel and other ferrous metals accounted for 23 per cent of the price rise.

The increase in the consumer price index during 1982-83 was higher than in the index of wholesale prices. This seems to be mainly due to the fact that there was a substantial increase in the prices of some essential commodities, which have a much higher weight in the consumer price index than in the wholesale price index.

The domestic saving rate in 1982-83 is estimated to have remained more or less at the same level as in 1981-82. The investment rate is, however, expected to have been somewhat lower, due mainly to a smaller inflow of resources from abroad.

The pressure on the balance of payments situation was contained in 1982-83, despite a setback to exports caused largely by an unfavourable international economic environment, characterised, among other things, by near stagnation of world trade and increasing protectionism. However, the progress of import substitution, notably in the energy sector, restrained the growth of the import bill and the trade deficit is estimated to have narrowed a little during the year. The overall balance of payments position also recorded an improvement, though partly as a result of some transient inflows.

Taking into account net invisibles, net aid receipts and other inflows, the overall balance of payments deficit in 1982-83 was significantly lower than in 1981-82. This improvement on external account, along with a withdrawal of Rs. 18,910 million from the International Monetary Fund resulted in an increase of Rs. 9,110 million in the country's gross foreign exchange reserves between April, 1982, and March, 1983.

CENTRAL BUDGET 1984-1985

THE total receipts of the Centre are budgeted at Rs. 405,004 million and disbursements at Rs. 425,355 million at the existing level of taxation, leaving a budgetary deficit of Rs. 20,351 million. As a result of additional resource mobilisation, this deficit is expected to drop to Rs. 17,622 million. According to the revised estimates, the uncovered gap rose from the budgeted Rs. 15,862 million to Rs. 20,954 million during 1983-84 mainly because of the clearance of the deficit of states as of March 31, 1983.

The budget for 1984-85 contains several concessions and reliefs in income-tax, corporate tax and union excise duties. The entire additional resource mobilisation has come from customs duties which are expected to net Rs. 4,582 million and, on the other hand, the revenue loss because of the lowering of tax rates would amount to Rs. 1,893 million in union excise duties, Rs. 200 million in corporate taxes and Rs. 550 million in income-tax. Because a major tax effort has come only from customs duties which are not sharable with states, as a result of the budget proposals for 1984-85, there would be a loss of Rs. 791 million in the amount accruing to the states from the sharable taxes. While, the additional tax revenue for the Centre is placed at Rs. 1,938 million for 1984-85, if account is taken of the revenue loss to the states, the net effect of the proposals would be that an additional yield of Rs. 2,729 million would accrue to the Centre as per the budget estimates for 1984-85.

The receipts under revenue account are placed at Rs. 240,164.1 million during 1984-85 as against the revised estimates of Rs. 209,643.2 million during 1983-84. Capital receipts for 1984-85 are estimated at Rs. 167,569.3 million as against Rs. 159,643.1 million during 1983-84. On the disbursement side, the expenditure under revenue account is budgeted at Rs. 263,419.9 million during 1984-85 against the revised figure of Rs. 233,394.3 million during 1983-84 while the capital disbursements are envisaged at Rs. 161,935.4 million in 1984-85 against Rs. 156,846.3 million in the preceding year. Tables 1 and 2 give a summary of the budgetary receipts and disbursements under revenue and capital account.

PLAN OUTLAY

The annual Plan for 1984-85 envisages a total public sector outlay of Rs. 301,321 million which represents an increase of 18.3 per cent over the approved outlay of Rs. 254,800 milllion for 1983-84. The budgeted outlay for the Central Sector is Rs. 173,510 million for 1983-84 and for the States and Union Territories, the total outlay for 1984-85 is Rs. 127,811 million.

The step-up in the plan outlay for 1984-85 in the Central Sector is just over 25 per cent and for the States and Union Territories 9 per cent as compared to 1983-84. The allocation of the 1984-85 outlay in the public sector among the different sectors has been made keeping in view the objectives and priorities of the Sixth Plan. Accordingly, the plan accords high importance to programmes that support weaker sections, especially in the rural areas. Thus, it provides adequate outlays for poverty alleviation programmes which form an important segment of the Sixth Plan.

The allocation for the energy sector (including power, coal and petroleum) accounts for nearly 32 per cent of the total public sector plan outlay for 1984-85. As much as 67 per cent of the total outlay is accounted for by the following four sectors: energy, industry & minerals, transport and irrigation (Table 3).

Table 1: Summary of Receipts—Revenue and Capital Account

(Rs. million)

Item	1983-84 (Budget)	1983-84 (Revised)	1984-85 (Budget)

SIXTH FIVE-YEAR PLAN (1980-85)

THE Sixth Plan has been formulated taking into account both the achievements and the shortcomings of the past three decades of planning, the recent economic developments which have a bearing on the growth prospects of the economy in the medium term as well as the vision of the future as reflected in the long term perspective. The Plan will cover a period of five years from April 1980 to the end of March 1985.

While the broad goals, objectives and strategy of the Sixth Plan as originally formulated by the Planning Commission have not undergone any basic changes, more recently the Planning Commission has issued a mid-term appraisal of the Sixth Plan. In this review, the Planning Commission takes stock of the performance of the Sixth Plan during the first three years and the likely trends during 1983-84. In the light of these developments, the planning exercise has been somewhat recast to some extent and the details of these are furnished after the following overall review of the Sixth Plan

The objectives of the Sixth Plan and the major areas of effort required for fulfilling these objectives are as follows:

(i) A significant step up in the rate of growth of the economy, the promotion of efficiency in the use of resources and improved productivity;

(ii) strengthening the impulses of modernisation for the achievement of economic and technological self-reliance;

(iii) a progressive reduction in the incidence of poverty and unemployment;

(iv) a speedy development of indigenous sources of energy, with proper emphasis on conservation and efficiency in energy use;

(v) improving the quality of life of the people in general with special reference to the economically and socially handicapped population, through a minimum needs programme whose coverage is so designed as to ensure that all part of the country attain within a prescribed period nationally accepted standards;

(vi) strengthening the redistributive bias of public policies and services in favour of the poor contributing to a reduction in inequalities of income and wealth;

(vii) a progressive reduction in regional inequalities in the pace of development and in the diffusion of technological benefits;

(viii) promoting policies for controlling the growth of population through voluntary acceptance of the small family norm;

(ix) bringing about harmony between the short and the long term goal of development by promoting the protection and improvement of ecological and environmental assets; and

(x) promoting the active involvement of all sections of the people in the process of development through appropriate education, communication and institutional strategies.

The strategy adopted for the Sixth Plan consists essentially in moving simultaneously to strengthen the infrastructure for both agriculture and industry so as to create conditions for an accelerated growth in investments, output and exports, and to provide through special programmes designed for the purpose, increased opportunities for employment especially in the rural areas and the unorganised sector and meet the minimum basic needs of the people.

The attack on the problem of poverty is most effective only in the conditions of an expanding economy. Since growth by itself may not suffice, other programmes and policies will be adopted with the specific aim of improving the living conditions of the masses and to bring about a reduction in inequalities of income and wealth. The scheme of the Sixth Plan outlays provides specific allocations for such programmes.

The Sixth Plan aims at a growth in gross domestic product of 5.2 per cent a year and per capita income by 3.3 per cent per annum. Thus by 1984-85 per capita income is expected to reach Rs. 1,744 at 1979-80 prices compared with Rs. 1,488 in the base year.

AVENUES OF PUBLIC EFFORT

The realisation of the growth targets of the Sixth Plan will involve a significant acceleration of the pace of development both in agriculture and in industry. An effective implementation of the Plan will require a significant increase in investment rate—from 21.8 per cent of GDP at market prices in 1979-80 to 25.1 per cent in 1984-85. Correspondingly, the domestic savings rate will have to go up from 21.2 per cent of GDP in 1979-80 to 24.5 per cent in 1984-85.

In addition vigorous efforts will be necessary to secure a significant improvement in the utilisation of the existing assets—both in agriculture and in industry. To this end, the plan lays great emphasis on fuller utilisation of the existing irrigation potential as well as on improved functioning of infrastructure consisting of power, coal and transport.

The plan lays particular attention to the investment needs of these sectors so that the future growth of the economy is not hampered by shortages of critical inputs. In addition, the plan contains a comprehensive outline of the basic policy framework designed to promote savings, productivity and greater efficiency.

An aggregate outlay of Rs. 1,722,100 million is envisaged for the Sixth Five-Year Plan. Of this the public sector outlay has been estimated at Rs. 975,000 million while the balance of Rs. 747,100 million would be in the private sector.

The total outlay in the public sector of Rs. 975,000 million includes current outlay, i.e., outlay mainly for the maintenance of services created during the Plan period and which does not create assets of Rs. 135,000 million. Thus, the public sector investment outlay in the Plan will be Rs. 840,000 million.

In comparison with the Fifth Five-Year Plan (1974-1979), the outlay for the Sixth Plan represents an increase of 148 per cent in nominal terms. Even after allowing for the rise in the price level in the intervening period, the increase comes to more than 80 per cent.

Of the total public sector outlay of Rs. 975,000 million, Rs. 472,500 million is in the Central sector and the balance of Rs. 502,500 million is in the States and Union Territories. The share of the latter in the total works out to 51.54 per cent.

The public sector outlays separately for Centre, States and Union Territories (UTs) are given in Table 1.

The details of financing of the public sector plan outlay are presented in Table 2.

The mid-term appraisal of the Sixth Plan makes a cautiously optimistic assessment about the success of the Plan. Taking the first four years of the plan, the total actual or approved outlays account for

Resources available for Plan (A - B)	489,000	486,000	975,000

(*)—Inclusive of Union Territories.

Rs. 798,800 million which constitutes as much as 83 per cent of the total public sector outlay of Rs. 975,000 million. The document however points out that inflation, particularly in imported capital goods has eroded the real value of plan investments. At 1979-80 prices, this represents 62 per cent of the plan outlay. To offset this shortfall, for 1983-84, the Centre has stepped up its investments by Rs. 8,000 million mostly in the core sectors. The appraisal also stresses the need to improve the efficiency of utilisation of the investment in infrastructure and in productive equipment as also the need for public enterprises to maximise their surplus.

As regards the fiscal targets, the mid-term appraisal has revised some of them in the light of the trends that have emerged during the first three years of the Sixth Plan. These are indicated in Table-3 which gives selected macro economic indicators as originally envisaged and which have been now revised and in Table-4 which gives the targets of production for principal commodities/services based on the original Sixth Plan projections and as modified in the mid-term appraisal.

TABLE 3: SELECTED MACRO-ECONOMIC INDICATORS

Indicator	1979-80 (actual)	Plan 1984-85	1984-85 (revised)
Growth rates (%)			
Gross domestic product at factor cost	—	5.20	4.98
Private final consumption expenditure	—	4.69	3.14
Gross domestic capital formation	—	9.27	7.16
Import of goods	—	7.89**	6.0
Export of goods	—	9.0	3.9
Ratios and Propensities (%)*			
Saving ratio	22.5	24.48	24.00
Ratio of current account balance to investment over the plan period (balance of payments)	—	5.71	6.34
Marginal propensity to save over the Plan period	—	33.75	29.42
Marginal propensity to consume over the Plan period	—	64.37	67.32
Import elasticity (Merchandise) over the Plan period	—	1.27	1.20
Import to GDP (market prices) ratio	8.54	8.77	8.97

(*)—All ratios and propensities are with respect to GDP at 1979-80 market prices.

(**)—Excluding contingency imports.

COMPANY AFFAIRS

As on 31st March 1982, there were 71,689 companies limited by shares at work in various States and Union Territories with an aggregate paid-up capital of Rs. 196,621 million. Of these, the Government companies numbered 894 and the paid-up capital amounted to Rs. 128,791 million. The non-Government companies were 70,795 in number with a total paid-up capital of Rs. 40,830 million. Thus, of the total number of companies limited by shares at work during 1981-82, the Government companies accounted for 1.2 per cent but the paid-up capital of these Government companies claimed a share of as high as 75.9 per cent of the total paid-up capital of all the companies at work and which were limited by shares during the year ending March 1982. On the other hand, the non-Government companies constituted as much as 98.8 per cent of the total number of companies limited by shares but only for 24.1 per cent of the aggregate paid-up capital.

In additon to these companies limited by shares, there were 219 companies with unlimited liability as of 31st March 1982, 1,496 companies limited by guarantee and associates not for profit and 311 foreign companies as defined under section 591 of the companies Act 1956.

New Registration: During the year 1981-82, 41 Government companies and 9,978 non-government companies with liability limited by shares, 43 non-government companies with unlimited liability and 21 non-government companies with liability limited by guarantee were registered under the companies Act 1956, making a total of 10,083 companies. The government companies registered during 1981-82 had an authorised capital of Rs. 22,646 million.

The 9,978 non-government companies registered during 1981-82 had an authorised capital of Rs. 8,878 million. Of these, 845 were public limited companies with an aggregate authorised capital of Rs. 3,177 million and 9,133 were private limited companies with total authorised capital of Rs. 5,701 million.

Liquidations: During 1981-82, 330 non-government companies limited by shares were declared defunct and their names were struck off the registers maintained by the Registrar of Companies. Of these, 68 companies went into voluntary liquidation, 42 were liquidated under Court orders and 220 were struck off the registers by the Registrar of Companies.

Capital Raised: During 1981-82, an amount of Rs. 20,281 million was raised by way of paid-up capital by Government companies. During the same year, an amount of Rs. 2,647 million was reported to have been raised by way of paid-up capital by non-government companies which included Rs. 159 million as bonus issues.

PUBLIC SECTOR

THE Public Sector covers those undertakings which are owned or managed by the Government. These are departmental undertakings like the railways and statutory corporations under which come the Damodar Valley Corpn., financial instts. which cover the Film Finance Corpn., public utility undertakings like transport and electricity, which come under the purview of the Indian Companies Act, etc. Prior to independence private companies were by far a large controller of most of the industrial and commercial undertakings with the exception of the railways. The Govt.'s 1948 resolution on the economic policy projected the ideal of mixed economy where both the private sector and the public sector had each an important role to play in the industrial development of the country. The public sector activates the whole economy by promoting crucials and key sector which, due to heavy investment and low returns does not provide enough incentive to the private sector.

The growth of public sector has been impressive. From a figure of Rs.290 million as on 31st March 1951, the investment stood at Rs. 211,020 million as on 31st March 1981 and increased further to Rs. 247,610 million as on 31st March 1982. The number of enterprises has also gradually increased from 5 to 221 during these 3 decades. The growth rate of capital investment in the public sector during the current year was 17.3 per cent. The maximum investment in the current year was made in the steel group, followed by the chemical fertilisers and pharmaceuticals group. During 1981-82, the turnover of operating enterprises (187) touched the figure of Rs. 364,431.4 million from Rs. 286,348.8 million in 1980-81.

The value of goods produced and services rendered in 1981-82 by these 187 enterprises stood at Rs. 352,700 million as against Rs. 265,590 million by 168 enterprises in 1980-81. However, it should be noted that much of this increase in production has come about due to the periodic revisions in the prices of some of the products and only to a smaller extent from a real increase in quantity produced.

The foreign exchange earned by these enterprises increased by 23.9 per cent to Rs. 27,460 million in 1981-82 from Rs. 22,160 million in 1980-81. It accounted for 35.2 per cent of the country's total export earning. During 1981-82, 107 enterprises earned a pre-tax profit of Rs. 18,860 million and 78 enterprises incurred a loss of Rs. 8,120 million; thus showing a record net pre-tax profit of Rs. 10,740 million. This situation stands favourable when compared with the losses incurred in 1980-81. After making a provision of Rs. 5,900 million towards income-tax the public enterprises made a net profit of Rs. 4,850 million in 1981-82 as against a net loss of Rs. 2,030 million in 1980-81. Since 1977-78 the public sector enterprises were able to come out of the red only in 1981-82.

Companies which have increased their profits with the current year's profits (in Rs. million) as compared to the previous year:

GOVERNMENT OF INDIA UNDERTAKINGS

The public sector has played a vital role in India's mixed economy and its growth has been impressive since independence. This sector covers public utility undertakings which are owned or managed by the Government, and which, because of heavy investment and low returns, do not provide enough incentive to the private sector.

The number of enterprises have increased from five to 221 during the last three decades. The growth rate of capital investment during 1983 was 17.3 per cent, the maximum investment being in the steel group followed by chemical fertilisers and pharmaceuticals group.

The following are the undertakings:

Agricultural Finance Corpn. Ltd., Dhanraj Mahal, Chhatrapati Shivaji Maharaj Marg, Bombay 400039.

Eastern Region Office: Calcutta; Northern Region Office: Lucknow; Southern Region Office: Madras; Branch Offices: Patna, Kota, Shillong, Ahmedabad, Trivandrum and Chandigarh; Project Offices: New Delhi, Bhopal (Temporary).

Functions: The Corporation offers services to World Bank/Food & Agriculture Organisation, Asian Development Bank, International Fund for Agricultural Development, Central and State Governments, commercial banks, institutions and individuals. AFC undertakes promotional activities including publication of a journal 'Financing Agriculture', holding of seminars on industries, participation in rural development etc., training/orientation programmes for bankers, Govt. officers and those involved in financing activities both in India and in the Third World countries, mounting of missions to flood/cyclone affected areas for supporting economic activities, etc.

Chairman: V. M. Bhide; *Mg. Director:* Ghulam Ghouse.

Air India (See chapter on "Civil Aviation").

Air India Charters Ltd. (See chapter on "Civil Aviation").

Alloy Steels Plant, Durgapur 713202, is a subsidiary of Steel Authority of India Ltd.

Andaman and Nicobar Islands Forest & Plantation Devpt. Corpn. Ltd., Port Blair 744102 (Andamans).

Functions: At present the Corporation is engaged in: *(i)* logging, regeneration and forest plantation, *(ii)* commercial plantations and extraction of Red Oil Palm, *(iii)* commercial plantations of rubber and also processing of the same, *(iv)* establishment of wood based industries in Little Andaman and North Andaman islands. The Corporation has also taken up cultivation of spices and aromatic plants etc.

Chairman: M. L. Kampani; *Managing Director:* D. K. Ganguly.

Andrew Yule & Co. Ltd., Yule House, 8, Clive Row, Calcutta 700001.

Artificial Limbs Manufg. Corpn. of India, G. T. Rd., Kanpur 208016, (Dept. of Social Welfare, Min. of Educ. & Social Welfare).

Functions: To mass produce prosthetics, orthotics and rehabilitation aids for the less privileged and physically handicapped.

Chairman: Dr. B. Mukhopadhyaya; *Mg. Director:* Lt.-Col. A. K. Tewari. V.S.M. (Retd.).

Ashoka Hotel, Chanakyapuri, New Delhi 110021. (Five star deluxe hotel.)

No. of rooms 589; no. of beds 1,006. The highest and lowest Charge per day: Rs. 2,000 & Rs. 550. (Presidential Suite for Rs. 4,000 per day.)

General Manager: P. B. Mathur.

Atomic Reactors, Trombay, Bombay 400071. (See chapter on "Atomic Energy").

Balmer Lawrie & Co. Ltd. (Containers Division), P-4/1, Oil Installation Rd., Paharpur, Calcutta 700088.

Bengal Chemicals & Pharmaceuticals Ltd., 6, G. C. Avenue, Calcutta 700012.

Bengal Potteries Ltd., 45, Tangra Rd., Calcutta 700015.

Bharat Aluminium Co. Ltd., Registered Office: Punj House, 18, Nehru Place, New Delhi 110019.

The company is involved in constructing and operating the Korba (Madhya Pradesh) aluminium project and planning for export oriented alumina/aluminium projects based on bauxite deposits in Andhra Pradesh.

Korba Aluminium Project: It consists of a 200,000 tonnes per annum capacity alumina plant, a 100,000 tonnes per annum capacity smelter for production of aluminium metal and facilities for manufacture of aluminium semis. The project has technical assistance from Chemokomplex of Hungary up to the alumina stage and from Messrs. Tsvetmetpromexport of the U.S.S.R. for the smelter and fabrication facilities.

Chairman-cum-Mg. Director: I. M. Aga.

Bharat Brakes & Valves Ltd., 22, Gobra Rd., Calcutta 700014

Functions: Design, engg. & turnkey execution of slurry handling, vacuum/air braking system, fuel oil & lub oil system, and manufacturers of industrial valves, pumps, etc.

Bharat Dynamics Ltd., Kanchanbagh P.O., Hyderabad 500028.

The company was established in July 1970 to manufacture sophisticated guided missiles and light precision mechanical and electronic equipment.

Mg. Director: Z. P. Marshall.

Bharat Earth Movers Ltd., Unity Bldg., J. C. Rd., Bangalore 560002.

BEML was set up in 1964 under the Ministry of Defence with the transfer of HAL's Railcoach Division. In 1967 the Earth Mover Division commenced production at Kolar Gold Fields.

The railcoach factory at Bangalore manufactures, besides heavy duty transportation trailers, different models of 2nd class broad-gauge Integral Coaches, thus meeting about 25 per cent needs of the Indian Railways. The earth mover factory manufactures 18 different types of heavy earth moving equipment like dozers, scrapers, graders, shovels, loaders and dumpers and now hydraulic excavators. BEML holds a dominant position in the earth moving industry in India. BEML's sales turnover during 1982-83 touched the all-time high of Rs. 335 crores.

Chairman & Mg. Director: Maj. Gen. S. N. Bhaskar.

Bharat Electronics Ltd., Regd. Office: Trade Centre, 29/4, Race Course Rd., Bangalore 560001.

Factories: P.O. Jalahalli, Bangalore 560013; Bharat Nagar P.O., Ghaziabad 201008; 14, Ramnagar Colony, NDA Rd., Pashan, Pune 411021; Ravindranath Tagore Road, Post Box No. 26, Machilipatnam 521001.

Regional Offices: Chandralok, 2nd Floor, 36, Janpath, New Delhi 110001; Arcadia, 11th Floor, Office No. 5 & 6, Plot No. 195, Nariman Point, Bombay 400021; Block A2/A3/A4, 5th Floor, Chatterji International Centre, 33A, Jawaharlal Nehru Road, Calcutta 700071; SIET Building, 312, Mount Road, Madras 600018.

The Bangalore unit manufactures: *(i)* Electronic Equipment: Communication equipment in the HF, VHF, UHF and Microwave ranges, high power HF, SSB and ISB transmitters, high stability communication receivers, medium wave broadcast transmitters upto 100 KW output, television transmitters and studio equipment, fire control radars, functional radars of various types for naval ships, wind finding, storm and cyclone warning radars, gun control equipment for tanks, 3 KW FM broadcasting transmitters, mini computers and 4 GHz microwave radio relay system. *(ii)* Components: Receiving and transmitting tubes, X-Ray tubes, TV picture tubes, magnetrons, germanium and silicon transistors and diodes, hybrid microcircuits, integrated circuits, ceramic and vacuum capacitors, quartz crystals, crystal filters, liquid crystal displays, plasma displays, solar cells, transformers and coils and printed circuit boards.

The Ghaziabad unit manufactures: 3-D static and mobile radars, secondary surveillance radars, troposcatter and line of sight microwave equipment, and VHF transreceivers. The Pune unit manufactures image converter tubes and magnesium manganese dioxide batteries.

Chairman & Mg. Director: N. L. Krishnan.

Bharat Gold Mines Ltd., Regd. Office: Suvarna Bhavan, Oorgaum (KGF) 563120, Karnataka.

This public sector enterprise has taken over from April 1, 1972 the assets and liabilities of the Kolar Gold Mining Undertakings.

It is the principal gold producing enterprise. The gold production during 1982-83 was 1,370 kgs. worth Rs. 216 million.

Chairman-cum-Mg. Director: P. D. Gupta.

Bharat Heavy Electricals Ltd., Regd. Office: 18-20, K. Gandhi Marg, New Delhi 110001.

The company has under it the following seven manufacturing units:—(1) Two plants in Hardwar; (2) Hyderabad; (3) Tiruchirapalli; (4) Bhopal; (5) Jhansi and (6) Bangalore.

BHEL offers a comprehensive range of equipment and services for thermal, hydro electric & nuclear power generation, transmission and distribution.

The production of equipment during 1981-82 was worth Rs. 2,018.2 million.

Chairman & Mg. Director: K. L. Puri.

Bharat Heavy Plate and Vessels Ltd., B. H. P. V., P.O. Visakhapatnam 530012, Andhra Pradesh.

The factory produces sophisticated equipment required by the process industry. The equipment manufactured include high pressure heat exchangers, multilayer high pressure vessels, columns, storage spheres, air & gas separation plants, cryogenic storage vessels and transportation tanks, continuous pulp digester plants, evaporators, water feed deaerators, industrial boilers, titanium anodes etc.

Chairman & Mg. Director: M. R. Naidu.

Bharat Leather Corporation Ltd., Hemkunt House, 10th Floor, 6, Rajendra Place, New Delhi 110008. *Regd. Office:* B-113, Sector 18, NOIDA, Ghaziabad Dist. (U.P.).

Chairman: S. L. Atal; *Mg. Director:* S. H. Jadhav.

Bharat Ophthalmic Glass Ltd., Lenin Sarani, Durgapur 713210, West Bengal.

Manufactures ophthalmic blanks for spectacle lenses and optical glasses required for Defence and other optical instruments and coloured glasses.

Mg. Director: P. K. Roy.

Bharat Petroleum Corpn. Ltd. (See Chapter on "Petroleum Industry" under Bharat Refineries Ltd.).

Bharat Process & Mechanical Engineers Ltd., Chartered Bank Buildings, Calcutta 700001.

Bharat Pumps & Compressors Ltd., Regd. Office: Naini, Allahabad 211010.

Established in 1970 with objective of import substitution, the company is producing sophisticated/heavy duty reciprocating compressors, centrifugal and reciprocating pumps, high pressure industrial, medical and low pressure welded gas cylinders.

Chairman & Mg. Director: K. L. Puri.

Bharat Wagon & Engg. Co. Ltd., 66, Patliputra Colony, Patna 800013.

Bhilai Steel Plant, Bhilai 490001.

This is the biggest operating steel plant in India with an annual capacity of 2.5 million tonnes of ingot steel currently under expansion to 4 million tonnes. See also "Steel Authority of India Ltd."

Mg. Director: N. K. Mitra.

Biecco Lawrie Ltd., 6, Mayurbhanj Rd., Calcutta 700023.

(Works: P54, Hide Rd. Extn., Calcutta 700027; 6, Mayurbhanj Rd., Calcutta 700023).

Functions: Manufactures electric motors upto 250 H.P. for crane duty and industrial applications; bulk oil LT & HT switchgear upto 11 KV 350 MVA; repair service of electrical rotating machines upto 10 MW at 11 KV.

Mg. Director: A. K. Sircar.

Bihar Industrial and Technical Consultancy Organisation Ltd.

(A subsidiary of Industrial Development Bank of India), Udyog Bhawan, East Gandhi Maidan, Patna 800004.

To identify industrial potential through surveys or otherwise; identify suitable entrepreneurs; prepare project profiles/feasibility reports; assist in location/transfer of suitable indigenous & foreign know-how; arrangement of financial tie-ups; turn-key implementation of projects; monitoring of on-going and sick industrial projects; conduct training programmes, etc., and to act as industrial, management and financial consultants.

Chief Executive: Shri S. K. Gupta.

Bird & Co. Ltd., Chartered Bank Bldgs., Calcutta 700001.

Bokaro Steel Plant, Bokaro Steel City 827011. Dhanbad Dist., Bihar (A subsidiary of Steel Authority of India).

Bongaigaon Petro-Chemicals Ltd., Bongaigaon Dist., Goalpara, Assam.

Braithwaite & Co. Ltd., 5, Hide Rd., Calcutta 700043.

Bridge & Roof Co. (India) Ltd., 427/1, Grand Trunk Rd., Howrah 711101. *(Regd. Office:* 21, Netaji Subhas Road, Calcutta 700001.)

Functions: Complete erection and civil engg. construction of refineries, fertilizer plants, steel plants, power plants, storage tanks etc., fabrication of steel structures, fabrication and erection of steel bridges, design and construction of R.C.C./prestressed bridges and erection of pipelines.

Chairman: Dr. S. Varadarajan; *Mg. Director:* Dr. P. K. Chaudhuri.

Burn Standard Co. Ltd., 10-C, Hungerford St., Calcutta 700017.

Functions: The company has two engineering units at Howrah and Burnpur respectively and seven refractory units in different parts of the country. The company specialises in the manufacture of railway rolling stock & components, railway track materials, special crossings, steel castings, SG iron castings, structural steel work, pressed steel tanks, technological structures, springs, forgings, stampings & pressings, mining accessories & equipment, turnkey coal handling plant, transfer cars, tram cars, turnkey ash handling plant, special type of wagon for carrying powdery material and rapid bottom discharge wagons.

The seven refractory units manufacture basic refractories (magnesite, chrome, mag chrome, chrome mag bricks), calcined magnesite & cupels. silica refractories, insulating bricks, chemical stoneware, stoneware pipes & fittings, fireclay refractories.

Chairman & Mg. Director: Prasanta Chandra Sen.

Calcutta Tramways Co. Ltd., 12, R. N. Mukherjee Rd., Calcutta 700001.

Cashew Corpn. of India Ltd., P. B. 1261, M. Gandhi Rd., Cochin 682011. (Regd. Office: 'Chandralok', 36, Janpath, New Delhi 110001).

Functions: A wholly owned subsidiary of STC. Handles import and distribution of raw cashewnuts to the export-oriented cashew processing industry. Also supplements industry's efforts in increasing export of cashew kernels with emphasis on diversification of markets.

(Also see Chapter on 'Cashew Industry').

Chairman: K. N. Venkatasubramaniam.

Cement Corporation of India Ltd., Shakuntala Apartments, 59, Nehru Place, New Delhi 110019.

Functions: To set up cement factories in various parts of the country and to survey and prospect for limestone deposits in the country. The Corporation has nine cement plants of annual installed capacity of 2.34 million tonnes at Mandhar, Madhya Pradesh (0.38 M.T.), Kurkunta, Karnataka (0.20 M.T.), Bokajan, Assam (0.20 M.T.), Rajban, Himachal Pradesh (0.20 M.T.), Neemuch, Madhya Pradesh (0.40 M.T.), Akaltara, Madhya Pradesh (0.40 M.T.), Yerraguntla, Andhra Pradesh (0.40 M.T.), Charkhi Dadri, Haryana (0.16 M.T.) and Adilabad (0.4 M.T.). Nemuch and Yerraguntla are proposed to be expanded by 1.1 million tonnes each. The work at Tandur, Andhra Pradesh (1 M.T.) is also in progress. CCI also offers consultancy services.

(Also see Chapter on 'Cement Industry').

Chairman & Mg. Director: A. P. Maheshwary.

Central Coalfields Ltd., Darbhanga House, Ranchi 834001.

Central Coalfields Ltd., a subsidiary of Coal India Ltd., was set up on November 1 1975. It owns 64 collieries, 4 coal washeries, one coke-oven and by-product plant, one beehive coke plant and one Central Workshop spread over the states of Bihar, Orissa, Madhya Pradesh and Uttar Pradesh. The manpower of CCL at present is 117,000. The production of CCL was 33.11 million tonnes in 1982-83. CCL earned a net profit of Rs. 780.6 million in 1980-81, Rs. 1,176 million in 1981-82 and Rs. 1,265 million in 1982-83. *Chairman-cum-Mg. Director:* Rajendra Singh.

Central Cottage Ind. Corpn. of India Ltd., Janpath, New Delhi 110012.

Central Electronics Limited, Factory: 4, Ind. Estate, Sahibabad 201010, U.P.

Manufactures professional ferrites for television, communication and power electronic applications viz. potcores, RM cores, E&I cores, UU&UI cores, piezoelements for ultrasonic transducers and gaslighters, cartridges, high purity alumina ceramics for power rectifier housing, substrates for cement potentiometers and feed-thrus for vacuum coating units, combustion boats, crucibles etc. Solar photovoltaic cells, solar panels for power supplies, light emitting diodes and displays for panel indicators, digital instruments, calculators and clocks etc., nitrogen laser for UV radiation, holographic gratings for instruments, high intensity monochromators, photon counters, automatic slide projectors, synchronised projection systems for audio visual aids etc.

CEL is India's seventh public sector unit manufacturing sophisticated electronic components and systems using purely indigenous know-how and technology.

Mg. Director: U. Venkatswarlu.

Central Inland Water Transport Corpn. Ltd., Regd. Office: 4, Fairlie Place, Calcutta 700001.

Branches: Fancy Bazar, M. Gandhi Road, Gauhati 781001; Dhubri Steamer Ghat, P.O. Dhubri, Goalpara Dist. 783301; Karimganj Steamer Ghat, Karimganj, Cachar 788710.

Functions: (i) Ship-building, ship repairing and general engineering; *(ii)* River transportation of goods from Calcutta to Pandu (Gauhati) and Karimganj in Assam; Calcutta to Bangladesh and Calcutta to Farakka and Haldia; *(iii)* River conservancy and dredging.

Chairman & Mg. Director: S. K. Ghosal, I.A.S.

Central Institute of Plastic Engg. & Tools (Min. of Petroleum), Guindy, Madras 600032.

A Government of India Society in the Department of Petroleum conducts training courses in various disciplines of Plastics Engineering. Conducts Short-term courses on Quality Control, Design and other refresher courses for men in Industry. Offers consultancy services to the small-scale industry and undertakes physical testing and assessment of plastics materials.

Chairman: V. R. Deenadayalu.

Central Mine Planning & Design Institute Ltd., Gondwana Place, Ranchi 834008.

Functions: To render mine planning, designing, consultancy, library and documentation services, prepare projects and to carry out R & D work for coal, lignite, rock phosphate and other minerals for mining, handling, beneficiation and utilisation of such minerals. Also offer consultancy on construction, project management and training of personnel.

Chairman & Mg. Director: R. G. Mahendru.

Central Warehousing Corporation, "Warehousing Bhawan", 4/1, Siri Institutional Area, Hauz Khas, New Delhi 110016.

Functions: To build and run warehouses for the storage of agricultural produce and notified commodities; to arrange transport of commodities to and from warehouses; to provide disinfestation services; to act as agent of Government, Public Sector Organisations, Cooperatives and Registered Companies for the purpose of purchase, sale, storage and distribution of agricultural produce, inputs and notified commodities, etc.

At the end of June, 1983 Central Warehousing Corpn. was running 368 warehouses with a total capacity of over 4.6 million tonnes, including its own modern warehouses of 2.8 million tonnes.

Mg. Director: M. K. Garg.

Chittaranjan Locomotive Works, Head Office & Works: Chittaranjan 713331, Burdwan Dist., W. Bengal; Calcutta Office: 4, Chittaranjan Avenue, Calcutta 700013.

Chittaranjan Locomotive Works was set up in 1950 for the production of steam locomotives. With the rolling out of the 60th YG class metre gauge steam locomotive in February 1972 the Works stopped the production of steam locomotives and has switched over completely to the manufacture of electric and diesel locomotives. The Works had, upto the end of March 1982, produced 3,705 locomotives—steam 2,351, electric (both AC and DC) 878, and diesel 476.

At present Chittaranjan is engaged in the manufacture of AC mixed traffic electric locomotives, diesel shunting-cum-shuttle locomotives and WAPI AC electric locomotive for hauling Rajdhani Express and diesel electric shunters.

Coal India Limited, Coal Bhawan, 10, Netaji Subhas Road, Calcutta 700001.

Subsidiary Companies: **Eastern Coalfields Ltd.,** Sanctoria, P.O. Dishergarh 718333, Dist. Burdwan, West Bengal; **Central Coalfields Ltd.,** Darbhanga House, Ranchi 834001, Bihar; **Western coalfields Ltd.,** Coal Estate, Civil Lines, Nagpur 440001, Maharashtra; **Bharat Coking Coal Ltd.,** Koyla Bhawan, Koyla Nagar, Dhanbad, Bihar; **Central Mine Planning & Design Institute Ltd.,** Gondwana Place, Kanke Road, Ranchi 834008.

Regional Offices: Navdeep Building (2nd Floor), Ashram Road, Ahmedabad 380014; Geetha Mansion (4th Floor), 40, Kempe Gowda Road, Bangalore 560009; 32, Shamla Road, Civil Lines, Bhopal 462002; 1, Ganga Nagar Unit-VI, Bhubaneswar 751009; Kumud Niwas, Ramdas Road, Tikrapaara, Bilaspur 495004; Hotel Waldorf (2nd Floor), 16, Arthur Bunder Road, Colaba, Bombay 400005; 10, Camac Street (10th Floor), Calcutta 700017; SCO 192-193, (2nd Floor), Sector 17-C, Chandigarh 160011; 407/408, Surya Kiran Building, 19, Kasturba Gandhi Marg, New Delhi 110001; Srinath Complex (1st Floor), Sorojini Devi Road, Secunderabad 500003; K-11(B), Ashok Marg, 'C'-Scheme, Jaipur 302001; 113/131-A(I), Swaroop Nagar, Kanpur 280002; Allahabad Bank Building (2nd Floor), New Block Hazratganj, Lucknow 226001; Kannammai Building (5th Floor), 611/612, Mount Road, Madras 600006; 220, Dak Bungalow Road, 1st Floor, Patna 800001; Burdwan Road, Mahananda Para, Siliguri, Darjeeling; North Eastern Coalfield, P. O. Margheritta 786181.

Cochin Refineries Ltd., P. Bag 2, Ambalamugal 682302, Ernakulam Dist. (See Chapter on "Petroleum Industry").

Cochin Shipyard Ltd., P. Bag 1653, Cochin 682015.

Ship building, ship repairs and allied activities. It went into production on February 11, 1976. The first ship 75,000 DWT bulk carrier was launched in January 1980.

Chairman & Mg. Director: D. Jayachandran; *Gen. Manager:* P. U. Cariappa.

Computer Maintenance Corpn. Ltd., Regd. Office: 115, Sarojini Devi Rd., Secunderabad 500003; Corporate Headquarters: The Arcade, World Trade Centre, Cuffe Parade, Bombay 400005.

Function: To provide one point total support services' to computer users.

Chairman: A. Krishnaswami; *Mg. Director:* P. D. Jain.

Cotton Corpn. of India Ltd., Air India Bldg., 12th Fl., Nariman Point, Bombay 400021.

Functions: Serves as an agency for purchase, sale and equitable distribution of domestic cotton and cotton staple fibre imported from abroad. It exports staple and Bengal Desi cotton.

Chairman-cum-Mg. Director: N. S. Kulkarni.

(Also see chapter on 'Cotton and Cotton Textiles').

Deposit Insurance and Credit Guarantee Corpn., *Head Office:* New India Centre, 17, Cooperage Road, Bombay 400039.

Functions: The Corporation performs twin functions of giving protection to small depositors and providing guarantee cover to credit facilities extended to certain categories of small borrowers belonging to the weaker sections of society.

The Corporation provides insurance to the extent of Rs. 30,000 to a depositor in respect of all deposits held by him in an insured bank in the same right and capacity.

Ferro Scrap Nigam Ltd., Post Box 73, Jamshedpur 831001.

Functions: The Corporation is engaged in recovery of scrap from steel melting shop slag and debris in steel plants at TISCO, Jamshedpur, IISCO, Burnpur, Rourkela Steel Plant, Rourkela & Bhilai Steel Plant, Bhilai. The Company is rendering specialised service to the steel plants in processing slag and debris from steel melting shops and recovering iron & steel scrap for remelting in their furnaces. It also proposes to take similar work in other steel plants and also in some foreign countries in future.

Mg. Director: M. N. Khanna.

Fertilisers And Chemicals Travancore Ltd., Udyogamandal 683501, Kerala.

The first factory in India to manufacture chemical fertilisers on a commercial basis. It consists of two production units: One at Udyogamandal and the other at Ambalamedu; a design and consultancy division called FACT Engg. and Design Organisation (FEDO); a fabrication and erection division called FACT Engg. Works (FEW); and a Marketing Division. The Udyogamandal Division produces ammonium sulphate, superphosphate, ammonium phosphate 16:20 and 20:20, ammonium chloride and synthetic cryolite. The Cochin Division produces Urea and NPK complex fertilisers. FEDO is equipped to take up turnkey contracts for the design and engg. of chemical and fertiliser plants, hydrometallurgical processing and pharmaceutical plant, etc. FEW caters to the specialised needs of the chemical and fertiliser industry in the field of fabrication of plant and equipment as well as structural and erection works.

Chairman & Mg. Director: N. B. Chandran.

Fertilizer Corporation of India Ltd., Madhuban, 55, Nehru Place, New Delhi-110019.

Production Units: Sindri, Gorakhpur, Talcher, Ramagundam. *Project:* Korba; *Fertilizer and Industrial Products:* Urea, Triple Super Phosphate and Ammonium Sulphate, Argon, Guanidine Nitrate, Prilled Ammonium Nitrate, Nitric Acid, Sulphuric Acid, etc.

Chairman & Mg. Director: P. L. Kukreja; *Director (Finance):* D. K. Jain; *General Manager (Marketing):* N. M. Vachhrajani; *General Manager (Technical):* J. S. Bhalla; *General Manager (Personnel & Administration):* B. N. Kapoor; *General Managers:* M. J. Sharma (Sindri); S. K. Malik (Gorakhpur); T. V. Doraswamy (Talcher); K. C. Madan (Ramagundam); *General Project Manager:* K. P. Tiwari (Korba).

Food Corpn. of India, 16-20, Barakhamba Lane, New Delhi 110001.

Functions: To provide the farmer an assured price for his produce, supply quality foodgrains to the consumer at reasonable prices.

Manned by over 73,000 people with 135 district offices, 2,044 storage points, 130 quality testing laboratories, the Food Corporation of India is the single largest foodgrains distributor in the world.

Chairman: S. S. Sisodia; *Mg. Director:* Vacant.

Garden Reach Shipbuilders & Engineers Ltd., 43/46, Garden Reach Rd., Calcutta 700024.

The company has its main workshops at Garden Reach Road, and branch units at Baranagore, Taratala Road, Netaji Subhas Dock (Calcutta Port Trust); 61, Garden Reach Road, Belur and Sinthee in West Bengal, at Nagpur in Maharashtra and a marine diesel engine plant at Ranchi, Bihar.

The company has 3 slipways and 2 building docks. It is one of the major ship-building and ship-repairing yards in India and is fully equipped to undertake all types of marine repairs of sea-going vessels as well as inland and harbour crafts. It builds all types of inland and harbour crafts and the smaller coastal vessels, and has specialised in the building of dredgers, tugs, barges and has started building ocean-going vessels upto 26,000 DWT with its own design. This is a major effort for the first time in the country to develop the basic design of an ocean-going ship.

The company also manufactures electrical overhead travelling cranes, deepwell turbine submersible pumps, steel plant equipment, conveyors, diesel road rollers, fibreglass life boats, pressure vessels, heat exchangers and deck machinery items like cargo winches, windlasses etc. and portable steel bridges.

They are also manufacturing marine diesel engines of three types at Ranchi and Calcutta with power range varying from 225 BHP to 20,000 BHP. They have M.A.N. service-base at Calcutta and Bombay.

Chairman & Mg. Director: Commodore A. K. Sarkar.

General Insurance Corpn. of India Ltd., Ind. Assurance Bldg., Churchgate, Bombay 400020.

(See Govt. of India Personnel).

Goa Shipyard Ltd., Vasco-da-Gama 403802, Goa.

Undertakes construction of vessels upto 1,000 tonnes and 70 metres length like fishing vessels, warships, self-propelled ore barges, tugs, dredgers etc.

Also undertake repairs to such crafts and ships visiting the port. Specialists in hull marine engineering, electrical radio and radar repair work.

Chairman: Vice-Admiral N. P. Datta, PVSM, AVSM; *Mg. Director:* Rear-Admiral L. R. Mehta, AVSM.

Govt. Opium & Alkaloid Works Undertaking, Neemuch 458441, Madhya Pradesh. Exports opium to various parts of the world and the Alkaloid Works is engaged in the manufacture of five main alkaloids of opium viz. morphine, codeine, narcotine, papaverine and thebaine and their finished salts, which are widely used for pharmaceutical purposes. A 'Research and Development' Wing has been set up in the Alkaloid Works to undertake research work in the field of opium and its alkaloids.

Gen. Manager: T. R. S. Krishnan; *Chief Controller of Factories:* M. C. Sharma.

Handicrafts & Handlooms Exports Corpn. of India Ltd., Lok Kalyan Bhavan, 11A, Rouse Ave. Lane, New Delhi 110001.

Functions: It undertakes export of handicrafts and handloom goods, with the main object of introducing new items and exploring new markets.

The corpn. has offices in New York, Paris and Tokyo. It has a carpets warehouse in Hamburg, a branch office in Madras, and regional offices in Bombay, Calcutta, Ludhiana, Bhadohi and Srinagar.

Chairman & Mg. Director: D. Aurora.

Heavy Engineering Corpn. Ltd., Administrative Building Plant, Plaza Rd., P.O. Dhurwa, Ranchi 834004, Bihar.

The Corporation has established the following projects.

Heavy Machine Building Plant, Ranchi: (Collaboration with U.S.S.R.). The plant has a production capacity of 80,000 tonnes of machinery items for steel plants and heavy engineering industries and 25,000 tonnes of steel structural items per year. *Foundry Forge Plant*, Ranchi: (Collaboration with Czechoslovakia). This plant has the following production capacity per year from its main production shops: Grey Iron Foundry (shaped castings) 33,345 tonnes; Steel Foundry (shaped castings) 40,182 tonnes; Non-ferrous Foundry (castings) 700 tonnes; Forgings 50,000 tonnes; Grey Iron Steel and Forged Rolls 21,310 tonnes. *Heavy Machine Tools Plant*, Ranchi: (Collaboration with Czechoslovakia). This plant has an annual production capacity of 278 diverse items of heavy machine tools, weighing 10,000 tonnes approximately. The plant has gone into production of items like radial drilling machines, central lathes, double column planing machines etc.

Chairman-cum-Mg. Director: S. R. Jain.

Heavy Vehicles Factory, Avadi, Madras 600054.

The factory is an integrated unit for the manufacture of components and fabrication and assembly of the Vijayanta Tank and its modified versions. The first 'Vijayanta' medium tank produced in this factory rolled out on Dec. 29, 1965 as scheduled and since then, regular production of tanks has been established. The factory has also established production of armoured recovery vehicles required for the Army.

The planning of the factory has been done in a manner that manufacturing capacity is available not only for the manufacture of tracked vehicles but also for other items of heavy engineering required for military as well as civilian purposes.

General Manager: J. C. Marwaha, I.O.F.S.

Hindustan Aeronautics Ltd., Indian Express Building, Dr. Ambedkar Veedhi, Bangalore 560001.

The Hindustan Aeronautics Limited, came into being on 1st October 1964 by the amalgamation of Hindustan Aircraft Ltd. of Bangalore with Aeronautics India Ltd. It has three Complexes viz. *Bangalore Complex* comprising of six units, *MiG Complex* comprising of Nasik and Koraput divisions and *Accessories Complex* comprising of Hyderabad, Korwa and Lucknow divisions besides a separate unit at Kanpur.

It is currently manufacturing: *(a)* the Supersonic interceptor *Mig Variants; (b)* the Jet fighter Ajeet; *(c)* the Jet trainer Kiran MK II (designed and developed by HAL); *(d)* the Alouette III (Chetak) & SA-315 *Cheetah* Helicopters; *(e)* the transport aircraft HS-748; *(f)* several types of aero-engines; *(g)* several items of airborne electronic equipment and *(h)* gliders.

Work on the manufacture of a modified version of the MiG aircraft under licence is progressing. The company has also successfully designed, developed and test flown HPT-32 piston engined trainer aircraft which will go into production shortly.

HAL also undertakes the overhaul of aircraft, aeroengines and allied equipment.

Manufacture of Jaguar Aircraft with the collaboration of British Aerospace is progressing.

Chairman: Air Marshal L. M. Katre; *Director (Corporate Planning):* G. Narasimhan; *Director (Finance):* C. V. Nagendra; *Addl. Director (Personnel & Admn.):* K. P. Rabindranathan; *Mg.*

Director (Design and Development): R. Varadarajan; *Mg. Director (Accessories):* Wg. Cdr. H. K. Singh (Retd.); *Mg. Director (MiG Complex):* Wg. Cdr. B. S. Balooja; *Mg. Director (Bangalore Complex):* S. C. Keshu.

Hindustan Antibiotics Ltd., Pimpri, Pune 411018, Maharashtra.

Set up in 1954 with WHO/UNICEF assistance—First drug manufacturing unit in Public Sector in India.

Pioneer in the manufacture of Penicillin, Streptomycin, Ampicillin and now Gentamicin, it has to its credit original discoveries, viz. "Hamycin" (antifungal antibiotic), "Aureofungin" (fungicide) and now "Nancy-kit" for early, safe and reliable detection of pregnancy. Apart from manufacture and marketing of bulk drugs and formulations for human use, the company is engaged in agricultural and veterinary products as well.

The production capacity of Penicillin has doubled from 105 to 200 m.m.u. and Streptomycin from 90 to 170 TPA. Gentamicin plants of 1 tonne capacity and Ampicillin from 5 to 35 TPA has already been commissioned. It has also set up Joint Sector Formulation Units along with State Governments at Nagpur, Goa and Bangalore. Of these, the Nagpur Unit is already in production

Drugs worth Rs. 2.01 million were exported during 1982-83.

Mg. Director: Y. H. Gharpure.

Hindustan Cables Ltd., P. O. Hindustan Cables, Hyderabad 500051, Andhra Pradesh.

The company produces paper insulated underground telephone cables, polyethylene insulated jelly filled telephone cables and various other types of communication cables.

Chairman & Mg. Director: S. K. Roy; *Executive Director:* D. K. Gupta.

Hindustan Coir, P. O. Kalavoor 688522, Alleppey Dist., Kerala.

This powerloom factory is under the Coir Board (Govt. of India) for the production of coir mattings—first of its kind under public sector. Started production on commercial scale on 1st Jan. 1969.

General Manager-in-Charge: V. Abdul Majeed.

Hindustan Copper Ltd., Regd. Office: Industry House, 10, Camac St., Calcutta 700017.

Khetri Copper Complex, Rajasthan: Capacity; *(i)* Production of 31,000 tonnes of electrolytic grade copper metal per annum; *(ii)* Production of about 200,000 tonnes of triple super phosphate per annum.

Indian Copper Complex, Bihar: The current production of copper metal at Ghatsila is about 15,000 tonnes per annum. The company plans for the expansion of production of copper metal at this complex to about 20,000 tonnes.

Rakha Copper Project, Bihar: Located in District Singhbhum and comprising 3 blocks *(i)* Rakha Mines Block; *(ii)* Roam Sideshwar; and *(iii)* Tama Pahar. Work on the first phase development of Rakha Copper Project started in August, 1969. A new concentrator plant has been set up.

Dariba Copper Plant, Alwar District, Rajasthan: The project with a capacity production of 100 tonnes of ore per day or copper concentrates equivalent to about 600 tonnes of copper metal per year, went into production in August, 1973.

Malanjkhand Copper Project, Madhya Pradesh: The first stage of the work to exploit the Malanjkhand deposits in Balaghat District has been completed. The target is to produce 20,000 to 30,000 tonnes of copper metal per year.

Chandmari Copper Project, Jhunjhunu Dist., Rajasthan: Open-cast mining operations started at Chandmari to produce 500 tonnes of copper ore per day. The mine is being planned to be expanded to produce 1,000 tonnes per day.

Chairman-cum-Mg. Director: M. V. N. R. S. Rao.

Hindustan Diamond Co. Ltd., Atlanta, 15th Floor, Nariman Point, Bombay 400021.

Functions: Import and sale of rough diamonds.

Chairman & Mg. Director: S. N. Sharma.

Hindustan Fertilizer Corpn. Ltd. (HFCL), Madhuban, 55, Nehru Place, New Delhi 110019. One of the five companies of the reorganised Fertilizer Corpn. of India Ltd., and National Fertilizers Ltd., HFCL has three fertiliser producing units namely—Namrup, Durgapur and Barauni and a Project—Haldia which is on commissioning stage. It has an annual production capacity of 650,000 tonnes of Nitrogen, 75,000 tonnes of P_2O_5 and 75,000 tonnes of K_2O.

Mg. Director: Pratap Narayan.

Hindustan Insecticides Ltd., Regd. Office: Hans Bhavan, Wing 1, 1, Bahadur Shah Zafar Marg, New Delhi 110002.

Factories at Delhi, Udyogmandal (Kerala), Rasayani (Maharashtra), and *Regional Sales Offices* at Delhi, Hyderabad and Calcutta.

Manufacturers of well known pesticides like DDT, BHC, ENDOSULFAN, MALATHIAN, DICOFOL, CYPERMETHRIN, VITAVAX, and PLANTAVAX, etc. used extensively for the pest control in agriculture and health programmes.

HIL is recognised as a Technical Consultant on pesticides by United Nations Development Programme.

HIL is also a recognised agency for coordinating Regional Pesticide Development Programme of the UNDP for ESCAP.

HIL is also setting up a Central R&D Complex with Pesticide Development Programme, a project executed by UNDP.

HIL has a successive record sales turnover during the last 5 years and during 1982-83 showed Rs. 393.6 million turnover—4.43 per cent increase over the previous year.

Chairman & Mg. Director: Dr. Ram S Hamsagar.

Hindustan Latex Ltd., Nirodh Factory, Peroorkada, Trivandrum 695005, Kerala.

Registered Office: Latex Bhavan, Mahilamandiram Rd., Poojapura, Trivandrum 695012 (Under the Ministry of Health and Family Welfare).

The company set up with Japanese collaboration, manufactures upto 288 million pieces of Nirodh (Rubber condoms) per year and also Rakshak, Share and Meteorological Balloon, etc.

Hindustan Machine Tools Ltd., No. 36, Cunningham Rd., Bangalore 560052.

The company was incorporated on 7th February, 1953 under the Indian Companies Act, 1913 as a Private Limited Company and was converted into a Public Company with effect from May 13, 1977.

It is engaged in the manufacture of high precision machine tools, tractors, mechanical and quartz analogue wrist watches, horological machinery, printing machines, lamps and lamp-making machinery, bearings and dairy machinery.

The company's manufacturing units are as under: HMT I & II, Bangalore (Karnataka); HMT III, Pinjore (Haryana); HMT IV, Kalamassery (Kerala); HMT V, Hyderabad (Andhra Pradesh); HMT VI, Ajmer (Rajasthan); Watch Factory I & II, Bangalore (Karnataka); Watch Factory III, Srinagar (Jammu & Kashmir); Watch Factory IV, Tumkur (Karnataka); Horological Machinery Divn., Bangalore (Karnataka); Dairy Machinery Unit, Aurangabad (Maharashtra).

Production & Sales: The company's production and sales for the year 1982-83 were Rs. 2,803 million and Rs. 2,755 million respectively.

Exports: The company's products are exported through HMT (International) Limited, the wholly-owned subsidiary of the company.

During the year 1982, the exports of HMT (International) Limited amounted to Rs. 192 million.

Central Metal Forming Institute: This institute has been set up by the company at Hyderabad for the purpose of promoting metal forming technology in India. The cost of the project is Rs. 36.2 million.

Fifth Watch Factory: HMT's Watch Factory-V is being set up at Ranibagh in Nainital (UP)—an economically backward area. It will be a parent plant with a production capacity of 2 million watch component sets feeding its output of precision components to assembly units in the small-scale sector. This Rs. 447.1 million project is scheduled to be completed in 1985.

Miniature Battery Unit: A separate unit for the manufacture of Silver Oxide Batteries required for effective functioning of electronic watches is being set up at Patagaon in Assam at an estimated project cost of Rs. 296 million. The unit with an annual production capacity of a million Silver Oxide Batteries is scheduled to be commissioned this year.

Stepper Motor Project: This Rs. 1.9 million project is being set up at Tunkur, Karnataka. Commercial production will commence by January, 1984.

Mg. Director: T. V. Mansukhani; *Directors:* I. K. Amitha (Marketing Policies, Corporate Planning & Projects); G. V. Appa Rao (Machine Tools); Dr P. K. Chaudhuri (Personnel); N. Swaminathan (Finance); *Executive Directors:* R. Raghurama Reddy (Watches); C. R. Nagendran (International); K. S. Namdev Rao (General Engineering Products); H. C. Gandhi (Agricultural Machinery).

Hindustan Organic Chemicals Ltd., P. O. Rasayani 410207, Raigad Dist., Maharashtra.

Hindustan Organic Chemicals Ltd., a Rs. 500 million ultra modern chemical complex is located at Rasayani about 75 kms. from Bombay. It has also started setting up a Rs. 500 million Phenol/Acetone complex at Cochin and a Rs. 240 million Polytetrafluoroethylene project at Medak District, Andhra Pradesh.

Product Range: Phases I & II: By 1973-74 first phase was completed and phase II has been put on stream by 1981-82.

The company manufactures Aniline, Acetanilide, Nitrobenzene, Dinitro-benzene, Hydrogen, Sulphuric Acid/Oleums, Meta Amino Phenol, Formaldehyde, Benzene Hexachloride (Tech), Nitrotoluenes, Chlorobenzenes, Nitrochlorobenzenes, Resorcinol etc.

Expansions and Increasing capacities: Doubling capacities of Nitrotoluenes (6180 TPA) and trippling capacities of Nitrochlorobenzenes (9000 TPA) would be over by 1983-84. Minor schemes like debottlenecking of some of the existing plants are also under way.

The company's sales are of the order of Rs. 440 million at present and are expected to touch a level of Rs. 1,000 million in the next 3-4 years.

Chairman & Mg. Director: H. Krishnamurthy.

Hindustan Paper Corpn. Ltd., Regd. Office: Vishal Bhavan, 95, Nehru Place, New Delhi 110019. *Head Office:* 75-C, Park St., Calcutta 700016.

Project Offices: Nowgong Paper Project, Jagi Rd., Nowgong 782001; Cachar Paper Project, P.O. Panchgram, Cachar, Assam 788802. *Subsidiaries:* Hindustan Newsprint Ltd., P. O. Kerala Newsprint Nagar, Kerala 686616; Nagaland Pulp & Paper Co. Ltd., P.O. Paper Nagar, Mokokchung 798601, Nagaland; Mandya National Paper Mills Ltd., Belagula 571606, Karnataka.

Functions: The Corporation has set up four plants. Two of these, *viz.* the Hindustan Newsprint Ltd., situated in Vellore, Kottayam Distt. with a production capacity of 80,000 tonnes of Newsprint per annum, and the Nagaland Pulp & Paper Co. Ltd. situated at Tuli in Nagaland, Distt. Mokokchung, with an annual production capacity of 33,000 tonnes of writing & printing paper, are already in production. The two other units are situated at Nowgong & Cachar in Assam, each with a production capacity of 1,00,000 tonnes of paper per annum.

Chairman: R. V. Subrahmanian; *Mg. Director:* S. N. Tripathi.

Hindustan Petroleum Corpn. Ltd., 17, J. Tata Rd., Bombay 400020.

(See Chapter on "Petroleum Industry".)

Hindustan Photo Films Mfg. Co. Ltd., Indunagar, Ootacamund 643005, Tamil Nadu.

This factory was set up in collaboration with a French firm Bauchet and Co. The production during 1981-82 was 11.328 m. sq.m. valued at Rs. 826.20 million and the turnover during the year is Rs. 837.40 million. The company produces cinema positive (B & W), cinema sound, medical X-ray film and photographic paper in addition to converting cine positive colour and roll film out of imported jumbo rolls. The company also converts the industrial X-ray film and graphic arts film out of imported jumbo rolls. As an adjunct to the main plant a silver nitrate plant, a silver sludge recovery plant and a unit for synthesising organic chemicals are also in operation. For the last seven years the company has been making reasonable profits.

Mg. Director: P. R. S. Rao.

Hindustan Prefab Ltd., Jungpura, New Delhi 110014.

Main products: Prefabricated components for multi-storeyed buildings; prestressed concrete electric transmission and street-light poles; P.C.C. beams and trusses for industrial sheds with sheeted roofs; hollow core roofing and flooring components; hollow blocks for roofing and walling; overhead concrete water storage tanks; prestressed concrete monoblock railway sleepers, precast R.C.C./P.C.C. components of bridges; Vayuthan cellular concrete blocks for cold storage and air-conditioned buildings and for light weight partitions; machine-made doors, window frames and shutters made out of kiln-seasoned timber; R.C.C. channel slabs for roofing, seasoning of timber; design and execution of prefeb residential, commercial and industrial constructions on turn-key basis; consultancy services as recommended by bureau of public enterprises; project management and quality control services for industrial and housing projects.

Chairman & Mg. Director: G. K. Majumdar.

Hindustan Salts Ltd., 'Lal Niwas', 21, Ram Singh Road, Narain Singh Circle, P.B. 146, Jaipur 302004, Rajasthan.

The salt sources at Kharaghoda (Gujarat) and the salt mines at Mandi (Himachal Pradesh) are under the administrative control of the company. At Kharaghoda the salt is manufactured from sub-soil brine and at Mandi it is excavated from mines.

The Bromine plant at Kharaghoda started functioning since March 1979. It produces 500 kg. Bromine per day from salt bitterns discarded after the manufacture of salt.

The Sambhar Salts Ltd., is a subsidiary of Hindustan Salts Ltd. It has a unit at Sambhar Lake in Rajasthan where the salt is manufactured out of lake water.

Chairman & Mg. Director: K. K. Shukla.

Hindustan Shipyard Ltd., Visakhapatnam 530005, Andhra Pradesh.

The shipyard has four building berths with a capacity of general cargo vessels upto 15,000 dwt. each, and bulk carriers/tankers upto 30,000 dwt. The capacity of the dry dock constructed at a cost of Rs. 48.2 million is 70,000 dwt. Hindustan Shipyard has so far built 79 ships of different sizes and types aggregating more than 823,126 dwt.

Chairman & Mg. Director: Vice-Admiral K. R. Menon.

Hindustan Steel Ltd., Durgapur 713208, West Bengal (Refer to "Steel Authority of India" in this list). (Also see Chapter on "Steel Industry").

Hindustan Steelworks Construction Ltd., 1, Shakespeare Sarani (8th Floor), Calcutta 700071.

The company undertakes entire responsibility for the construction of steel plants. The diversified activities of the company cover the existing as well as the new steel plants under construction. The company has also undertaken construction of dams, bridges, mining complexes, dry docks, townships, etc. This technology and expertise are also available for export abroad.

Hindustan Teleprinters Ltd., G.S.T. Rd., Guindy, Madras 600032.

Regional Offices: (I) E-65, Himalaya House, 23, Kasturba Gandhi Marg, New Delhi 110001. (2) 33-A, Jawahar Lal Nehru Road, Chatterjee International Centre, Sixth Floor, Flat No. 5, Calcutta 700071. (3) Office No. 2, 12th Floor, Regent Chambers, Backbay Reclamation, Nariman Point, Bombay 400021.

Manufacturers of: Teleprinters in Latin, Devanagari and Arabic scripts and bilingual teleprinters and teleprinter ancillaries such as reperforator attachments, tape transmitter attachments, independent automatic tape transmitters, line units etc., data modems, computer peripheral and electric typewriters, etc.

Exporters of teleprinters and ancillaries.

Chairman & Mg. Director: T. K. Sethuraman.

Hindustan Zinc Ltd., 6, New Fatehpura, Udaipur 313001 (Rajasthan).

The units administered by this company are:

Under Operation: MINES: (1) **Agnigundala Lead Mine,** Bandalamottu, District Guntur (A.P.) has an installed capacity of 72,000 tonnes of ore mining and milling per annum; (2) **Maton Rockphosphate Mine,** District Udaipur (Rajasthan)—Developed to meet rockphosphate requirement of superphosphate and phosphoric acid plants at Debari, it has an installed capacity of 180,000 tonnes of rockphosphate ore with matching capacity for beneficiated ore having 32% P_2O_5; (3) **Zawar Group of Mines** (Mochia and Balaria), District Udaipur (Rajasthan) has an installed capacity of 1.2 million tonnes of zinc-lead ore with about 5 per cent zinc and lead metal content.

SMELTERS: (1) **Debari Zinc Smelter,** District Udaipur (Rajasthan) has an installed capacity of 45,000 tonnes of zinc metal, 87,000 tonnes of sulphuric acid, 190 tonnes of cadmium metal, 72,600 tonnes of single superphosphate and 26,000 tonnes of phosphoric acid (100% P_2O_5) per annum; (2) **Tundoo Lead Smelter,** District Dhanbad (Bihar). The present smelting capacity is 8,000 tonnes per annum lead with 12 tonnes per annum silver as by-product; (3) **Vizag Zinc-Lead Smelter,** Visakhapatnam (AP). This zinc-lead smelting complex has a designed capacity of 30,000 tonnes of zinc, 10,000 tonnes of lead (now expanded to a capacity of 22,000 tonnes), 66,000 tonnes of sulphuric acid, 115 tonnes of cadmium and 30 tonnes of silver per annum.

Under Trial Operation: (1) **Rajpura-Dariba Mine,** District Udaipur (Rajasthan). This mine has been commissioned in March 1983 and it has an installed capacity of 900,000 tonnes of zinc-lead ore per annum with about 7.8 per cent of zinc and lead metal content; (2) **Sargipali Lead Mine,** District Sundergarh (Orissa). Commissioned in April, 1983, this mine is designed to produce and beneficiate 150,000 tonnes of ore per annum.

New Projects: (i) Rampura-Agucha Zinc-Lead Project, District Bhilwara (Rajasthan)—to develop a mine for producing 2,500 tonnes per day of ore containing 13.48% zinc and 1.93% lead; (ii) Baroi Zinc-Lead Mine (Zawar Group) District Udaipur (Rajasthan)—to produce 1,000 tonnes ore per day containing 3.85% lead and 1.22% zinc; (iii) Chanderiya Zinc-Lead Smelter, District Chittorgarh (Rajasthan)—to produce 70,000 tonnes of zinc and 35,000 tonnes of lead per annum.

Chairman & Mg. Director: R. P. Kapur.

Hotel Corpn. of India Ltd., Fifth Floor, Centaur Hotel, Bombay Airport, Bombay 400099.

Functions: A wholly-owned subsidiary of Air India, aims at carrying on the business of Hotel Management and Flight Catering providing lodging and boarding facilities for the tourist trade.

At present it operates two Flight Kitchens at Bombay and Delhi under the name—"Chefair", Restaurants and Snack Bars at Bombay and Delhi Airports.

The Corporation runs a 288 room luxury class Centaur at Santacruz, Bombay, and the 416 room Centaur Hotel, Delhi Airport, with a 24-hour check-out facility; the Centaur Beach Resort, Bangaram, Lakshadweep Islands. The Corporation's new properties are two luxury class hotels—the 281 room Centaur Lake View Hotel, Srinagar (opened in Oct. 83) and the 396 room Centaur, Juhu Beach, Bombay (under construction). Two Japanese style inns in U.P. and Bihar are coming up shortly. Also a new Flight Kitchen is being built near the new international Airport Complex in Bombay and the one at Delhi has started functioning.

Chairman: Raghu Raj; *Mg. Director:* A. C. Mahajan.

Hotel Janpath, Janpath, New Delhi 110001.

This Hotel is a unit of India Tourism Development Corporation having 213 rooms. It is moderately priced and very centrally situated.

Housing & Urban Development Corpn. Ltd., HUDCO House, Lodhi Rd., New Delhi 110003.

Functions: To finance or undertake housing and urban development programmes in the country, to offer consultancy services for Housing & Urban Devpt. Projects in India and abroad and also setting up of new or satellite towns and building material industries etc. In ten years it has approved loans for 2,493 projects for about Rs. 11,470.3 million spread over almost all States and Union Territories.

Chairman & Mg. Director: H. U. Bijlani.

Hydro Carbons (India) Pvt. Ltd., (See Chapter on Petroleum Industry).

IISCO Stanton Pipe & Foundry Ltd., IISCO House, 50, Chowringhee Rd., Calcutta 700071.

India Firebricks & Insulation Co. Ltd., 'Nirmal' (21st Fl.), Nariman Point, Bombay 400021.

Works: P. O. Marar, Near Ranchi Rd. Rly. Stn., Hazaribagh 829117.

Mg. Director: N. C. Mukherjee.

India Tourism Development Corpn. Ltd., Jeevan Vihar, 3, Parliament St., New Delhi 110001.

Regional Offices: Nirmal, Nariman Point, Bombay 400021; 3G, Everest Bldg., 46C, Chowringhee Rd., Calcutta 700071; 29 Victoria Crescent, Commander-in-Chief Road, Madras; C-119, Naraina, Near Ring Road, New Delhi.

Functions: It provides a range of tourist services throughout the country: Accommodation, transport, entertainment, tourist literature, duty free shops, operates its own travel agency Ashok Travels & Tours' and also offers consultancy-cum-managerial services.

ITDC runs 25 hotels, 2 beach resorts, 4 forest lodges, 12 travellers' lodges, 3 sound and light shows, 7 duty free shops, 19 transport units and 14 restaurants (including six airport restaurants).

Chairman: Lt. Gen. A. M. Sethna, PVSM, AVSM (Retd.); *Mg. Director:* Rajan Jetley.

Indian Airlines (See Chapter on Civil Aviation).

Indian Dairy Corpn., Darpan Bldg., R. C. Dutt Rd., Vadodara 390005.

Branches: Delhi, Bombay, Madras & Calcutta.

Functions: To promote dairying in India and to execute IDA-EEC-GOI Dairy Development programme—Operation Flood.

Objectives: Operation Flood-II aims at enabling some 10 million rural milk producers' families in over 155 districts to build a viable, self sustaining dairy industry; to rear a National Milch Herd of some 14 million cross bred cows and upgraded buffaloes; to erect a National Milk Grid which will link the rural milksheds to the major demand centres with urban population totalling 150 million; to erect an infrastructure and through this to increase the per capita availability of milk to 144 gms. daily towards mid 1980s.

Achievements: Operation Flood-I which was initiated during July 1970 and terminated in March 1981 covered 27 milksheds in 10 states of the country. Under Operation Flood-II the project with total outlay of Rs. 4,850 million, similar dairy development programmes are now being implemented in about 77 milksheds of 19 states/Union Territories. The programme is being extended to cover a total of 155 districts in the country. At the end of the year 1982-83, the programme covered over 20,000 primary village dairy cooperative societies in various states with participation of over 2.2 million farmer families, under the cooperative ambit. The rural dairies covered under the programme procured on an average over 3.3 million kg. of milk per day during 1982-83, the average peak collection being over 4.8 million kg. per day. The peak capacity utilisation of the rural dairies during the year was around 106 per cent. Upto 31.3.1983 the funds generated by IDC under OF-II have been Rs. 1,667.47 million. The total amount released to the state implementing agencies under OF-II inclusive of direct expenditure by the Indian Dairy Corporation till 31.3.1983 amounts to Rs. 1,392.68 million.

Indian Drugs and Pharmaceuticals Ltd., *Head Office:* IDPL Complex, Delhi-Gurgaon Road, Gurgaon 122001 (Haryana). *Postal Address:* P.B. No. 3816, New Delhi 110049.

IDPL has five plants—IDPL Virbhadra (Rishikesh) for antibiotics; IDPL Hyderabad for synthetic drugs; IDPL -Madras for surgical instruments and pharmaceutical specialities; IDPL Gurgaon for pharmaceutical specialities and IDPL Muzaffarpur for alcohol based chemicals and allied products.

At IDPL's Fine Chemicals Division at Hyderabad, a wide range of fine chemicals are being produced for industry and research. IDPL's Design, Development & Process Engineering Division (DDPE) at Hyderabad provides the technical expertise for designing, erection and commissioning of pharmaceutical plants. It has its Research & Development wings both at Hyderabad and Rishikesh.

Apart from these projects, IDPL, in collaboration with the Govt. of Uttar Pradesh through Pradeshiya Industrial and Investment Corpn. Ltd., Govt. of Rajasthan through Rajasthan State Industrial and Minerals Development Corpn. Ltd., Govt. of Orissa through Industrial Promotion Investment Corpn. of Orissa Ltd., and Govt. of Punjab through Punjab State Industrial Development Corpn. Ltd., has set up formulation units at Lucknow, Bhubaneswar and Jaipur and a starch-cum-glucose-cum-dextrose plant at Sangroor.

IDPL complex consists of 9 plants in India employing over 13,000 people.

Chairman & Mg. Director: P. N. Bahl.

Indian Investment Centre, Jeevan Vihar, Sansad Marg, New Delhi 110001.

The Indian Investment Centre (IIC), an autonomous organisation sponsored by the Government of India, was established in 1960. It provides information and advice on all aspects of industrial investments in India including promotion of projects with foreign collaboration within the framework of government's policies. It also assists Indian industrial investments abroad. It works in close co-operation with the Central and State Governments and official industrial promotion agencies. It renders free assistance to public and private firms for setting up joint ventures in India and abroad. To stimulate the flow of foreign private capital and technical know-how into India, the Centre assists non-residents of Indian origin to identify and bring together potential collaborators for joint ventures in the country. It also disseminates information on commercially viable indigenous technologies to the prospective investors and provides effective assistance to Indian entrepreneurs for the setting up of joint ventures in third countries in collaboration with suitable foreign concerns. For encouraging industrial investment in the country it provides guidance and assistance to the entrepreneurs regarding government's policies, procedures, available incentives, availability of raw materials etc.

The IIC brings out a monthly 'Newsletter' containing information on latest developments in industrial investment policy and procedures and on the investment opportunities in various sectors of industries. The IIC also brings out, from time to time, a number of publications providing authentic information in respect of government policies/procedures on and facilities/incentives etc. Besides the head office at New Delhi, the IIC has five offices abroad, viz. Said Muhorbi Bldg. (Behind Al Masaood), Villag Khalida, P.O. Box No. 4090, Abu Dhabi (UAE); India House, Wilhelm Leuschuer-Str 936000, Frankfurt/Main, West Germany; C/o High Commission of India. Louvre Buildings, 263, Regent Street, London WIR 7PA; 445, Park Avenue, N.Y. 10022, New York; C/o Embassy of India, 2-11, Kudan Minami, 2-Chome Chiyado-ku, Tokyo.

Under its Project Financing Operations IFCI provides financial assistance to medium and large-sized eligible industrial projects, set up in the corporate and co-operative sectors in India. It is also authorised to undertake research and surveys for evaluating or dealing with marketing or investments, techno-economic studies, merchant banking operations and to provide technical and administrative assistance to any industrial concern for promotion, management or expansion of any industry.

In its promotional role, the thrust of IFCI's endeavour is on the development and growth of industries in the rural, tiny, small and medium-scale and ancillary sectors. It has also helped in the upgradation of managerial skills, broad-basing the entrepreneurial base and development of entrepreneurship through its specially devised 'Promotional Schemes' and, 'specialised agencies', set up for the purpose.

Chairman: D. N. Davar.

Industrial Reconstruction Corpn. of India Ltd., 19, (2nd Fl.), N. Subhas Rd., Calcutta 700001.

Delhi Office: Vandhna, 11, Tolstoy Marg, New Delhi 110001.

Functions: It has been set up jointly by the Govt. of India, Reserve Bank of India, IDBI and other leading financial institutions as well as nationalised banks in the country. It aims at providing financial, managerial and other assistance to sick industrial units which are potentially viable towards their revival, rehabilitation and modernisation.

Chairman & Mg. Director: V. Dixit.

Instrumentation Ltd., Kota 324005, Rajasthan.

The largest manufacturers of Industrial Process Control Instruments in India. The product-mix of the company includes a variety of sensors and transmitters, indicating, controlling and recording instruments for the measurement of temperature, pressure, flow, level and other process variables in different measuring systems such as magneto-electric, electronic, ferrodynamic and the pneumatic range of products.

Manufactures control valves and allied items with technical collaboration of Japan at the company's second unit at Palghat (Kerala).

Under its diversification scheme an agreement for manufacture of gas analysers in the line of pollution control instruments has been signed with Messrs. Hartmann & Braun of West Germany and production has commenced. A technical assistance and know-how agreement has also been signed with Messrs. Brown Bovari Kent of U.K. under its modernisation programme which covers the introduction of electronic loop instruments and pneumatic instruments with unified current output.

The company is also setting up an electronic milk analyser plant in Rajasthan as a joint venture with the Govt. of Rajasthan with technical know-how from Denmark.

The company provides specialised turn-key services of instrumentation to steel plants, thermal power stations, fertilizer and chemical based plants and other process industries. It has developed capabilities to design, fabricate, erect and commission instrumentation systems with indigenous know-how.

Chairman & Mg. Director: Wg. Cdr. A. K. Dhingra.

Integral Coach Factory, Perambur, Madras 600038.

This factory was established in collaboration with the Swiss Car and Elevator Mfg. Corpn. Ltd., Schlieren, Zurich, Switzerland, and the production was inaugurated on Oct. 2, 1955.

ICF meets the major requirements of passenger coaches of the Indian Railways. The output is 750 coaches per annum. So far, ICF has turned out over 16,000 coaches of 75 different types.

The factory has exported bogies to Burma, Thailand and Taiwan and coaches to Taiwan, Philippines, Zambia, Tanzania, Uganda, Vietnam and Nigeria.

The two Metro trainsets produced by ICF are being reached for the commercial services to begin in the near future at Calcutta.

Gen. Manager: C. N. Kapur.

ISRO Satellite Centre (ISAC), A1-6, Peenya Industrial Estate, Bangalore 560058. Set up under the Indian Space Research Organisation of the Department of Space, Govt. of India, to design, develop, integrate and plan the operations of artificial earth satellites for activities related to space science and applications. Seven satellites have so far been successfully designed, developed and put into orbit. ARYABHATA (358 Kg.—the first Indian satellite) in April 1975, BHASKARA I (445 Kg.) and BHASKARA II (435 Kg.) in June 1979 and Nov. 1981 respectively, were launched using Soviet inter-cosmos vehicle. Of these three, the first one was a technological satellite demonstrating the basic satellite technology in India and the other two were earth observation satellites and carried TV cameras (in visible and near IR bands), microwave radiometers and Data collection platform receiver. RS-1, the first Indian satellite (35 Kg.) to be launched by ISRO's own Indian launch vehicle SLV-3 in July 1980 was followed by RS-DI in May 1981 (38 Kg.) which also carried a landmark tracker payload. APPLE (launch weight 670 Kg.), the first Indian experimental communication satellite was launched in June 1981 and has been successfully carrying out many satellite communication experiments. One more of the Rohini series (RS) of satellites RSD2, was launched successfully in April 1983 using SLV-3 D2. The next series of satellites SROSS (Stretched Rohini Satellite Series), in the weight class of 150 Kg. is planned to be launched using augmented version of SLV-3, starting from 1984-85. Preparatory work on the first semi-operational Indian Remote Sensing Satellite (IRS) has commenced and the project costing a little over Rs. 620 million has been approved. In addition, specific sophisticated developmental projects have been completed for many agencies and specialised consultancy services are also made available.

Director: Prof. U. R. Rao.

Jessop & Co., Ltd., 63, N. Subhas Rd., Calcutta 700001.

Manufacturers of structural and bridge steelwork, electric overhead travelling cranes, dockside and ship building cranes, steel mill cranes, mobile cranes, diesel loco cranes, hydraulic gates, railway wagons, electric multiple unit coaches, passenger coaches, paper machinery, aerial ropeways, diesel road rollers, vibratory rollers, earth moving equipments, machine tools, steelworks equipments.

Mg. Director: R. V. Gupta.

National Dairy Development Board, Anand 388001, Gujarat was constituted as an autonomous body (1965).

Regional Offices: Bangalore, Bombay, Calcutta and Delhi.

Functions: To speed up the overall development of dairying, animal husbandry, food and agriculture and allied sectors in the country, the Board offers *(a)* technical services for development of dairy and allied projects; *(b)* manpower development services; *(c)* production, procurement, processing and marketing services for agricultural and food products; *(d)* specialised dairy engineering services; *(e)* consultation services on dairy, oilseeds and allied agricultural operations and *(f)* international liaison and consultancy.

Chairman: Dr. V. Kurien.

National Fertilizers Ltd., 20, Community Centre, East of Kailash, New Delhi 110065.

NFL is the ninth largest company in the country in terms of investment—Rs. 5,938 million.

NFL plants at Nangal, Bhatinda and Panipat have a combined production capacity of about 700,000 tonnes of nitrogen per annum.

NFL has retained its position as the largest producer of nitrogenous fertilizers in the country during 1982-83 with a turnover of Rs. 3,620 million—registering an increase of about 13 per cent from the previous year.

Kisan Khad and Kisan Urea produced at NFL plants are easily available to farmers through a large network of dealers, cooperatives and agro-industries.

Mg. Director: B. S. Kakkar.

National Film Development Corporation Ltd. (N. F. D. C.), 13-16, Regent Chambers, Nariman Point, Bombay 400021. (For details see chapter on Film Industry).

National Hydroelectric Power Corporation Ltd., 'Hemkunt Tower', 98, Nehru Place, New Delhi 110019 is an enterprise of the Central Government set up in November 1975.

The Corporation has successfully commissioned the 180 MW Baira Siul Project in H.P., put on stream the 105 MW Loktak Project in Manipur, and partly commissioned the 14.1 MW Devighat Project in Nepal, which is over a year ahead of target schedule. The Corporation is executing three important projects namely, the 345 MW Salal Project in J & K, the 390 MW Dul Hasti Project in J & K and the 710 MW Koel Karo Project in Bihar. Besides, a network spread over 850 circuit kms including the 400 KV has been completed and over 3250 circuit kms is under execution.

The Corporation is geared up to plan, promote and organise the development of hydroelectric power in all its aspects including planning, investigation research, designing, preparation of feasibility and definite project reports, construction, generation, operation and maintenance of hydroelectric power stations and projects, and undertake the complete designing and construction of transmission lines and ancillary works.

Chairman & Mg. Director: Pirzada Ghulam Nabi.

National Industrial Development Corpn. Ltd., P.B. 5212, Chanakya Bhavan, Vinay Marg, New Delhi 110021.

Functions: NIDC provides the entire range of engineering, economic and management consultancy services for the implementation of new industrial projects and infrastructure and modernisation/rehabilitation of existing investments. Its field of specialisation include Site and Off Site engg.-plant designs; Mineral based and engineering industries including Mining, Mineral processing, Material handling and metal working industries, Agro based industries, Industrial townships and Urban development for industrial projects; Renewable sources of energy-solar energy utilisation in agricultural and industrial sector; economic planning and regional development, industrial estates etc.

The services of the Corporation are being made use of by Central Government, various State Governments, public sector enterprises and private entrepreneurs in India. The services have also been increasingly availed of by international agencies like UNIDO, Commonwealth Secretariat, over 30 foreign countries and entrepreneurs abroad.

Chairman-cum-Mg. Director: Dr. Ram K. Iyengar.

National Instruments Ltd., 1/1, Raja S. C. Mullick Rd., Jadavpur, Calcutta 700032.

This company manufactures and repairs precision surveying instruments, meteorological and optical instruments, pressure and vacuum gauges and high precision defence instruments, scale reading device, national 35 mm. Sprinty camera and solar energy instruments.

Chairman-cum-Mg. Director: P. R. Rao.

National Insurance Co. Ltd., 3, Middleton St., Calcutta 700071.

National Jute Manufacturers Corpn. Ltd., 4, Netaji Subhas Rd., Calcutta 700001.

National Mineral Development Corpn. Ltd., Pioneer House, 6-3-653, Somajiguda, Hyderabad 500004.

Founded in 1958; *Regional Offices:* 13, Camac St., Calcutta 700017; Haroon Manzil, Thompson St., Visakhapatnam 530001; 10/2, Kasturba Road, Bangalore 560001; 109, Surya Kiran, K. Gandhi Marg, New Delhi 110001.

Functions: Exploration, development and exploitation of iron ore deposits, diamond mining in the 'Panna' area of Madhya Pradesh and prospecting for other miscellaneous minerals such as limestone, dolomite, bentonite. NMDC's Consultancy Services include mineral investigation, evaluation and feasibility study; development of sampling system, process selection and flow sheets; analysis bench scale and pilot plant testing of ore minerals; preparation of DPR; basic engineering, mine construction, commissioning and performance tests; market studies and training etc. During 1982-83, NMDC has produced 6.3 million tonnes of iron ore and 13.056 carats of diamonds and earned Rs. 1,469 million in foreign exchange from an export sale of about 6.3 million tonnes of iron ore. Presently, NMDC is having three operating iron ore mines (Bailadila deposits No. 5 and 14 in Bastar District of M.P. and Donimalai in Bellary District of Karnataka) and a diamond mine at Majhgawan in Panna, M.P. A new iron ore mine at Bailadila-11C is under development. Development of a mine based on Jagdalpur Dolomite deposit in M.P. for meeting the requirements of Vizag Steel Plant has been approved by the Government recently.

Number of projects are under investigation/planning viz.: *(a)* for Iron Ore: Bailadila Deposit No. 11B, Bastar Dist., Madhya Pradesh; Kumaraswamy, Bellary Dist., Karnataka; Bababudan Magnetite Deposits, Chickmagalur Dist., Karnataka; Malangtoli, Keonjhar Dist., Orissa; *(b)* for Diamonds at Vajrakarur and Racherla in Andhra Pradesh and Panna in M.P.

Chairman-cum-Mg. Director: C. S. Venugopala Rao; *Directors:* A. Ramachandra Rao (Finance), A. K. Chatterjee (Production) and N. Neelakantan (Planning).

National Newsprint & Paper Mills Ltd., Nepanagar 450221, East Nimar Dist., Madhya Pradesh.

Chairman-cum-Mg. Director: A. D. Singh.

(Also see Chapter on "Paper Industry".)

National Projects Construction Corpn. Ltd., Raja House, 30-31, Nehru Place, New Delhi 110019.

Functions: To provide the Central and State Governments with an organisation capable of undertaking the execution of power projects, river valley projects, industrial structures and allied civil engineering works requiring high technical skill, strict adherence to specifications and quality standards.

Chairman-cum-Mg. Director: B. R. Oberoi.

National Research Development Corpn. of India, 20-22, Zamroodpur Community Centre, Kailash Colony Extension, New Delhi 110048.

Functions: Promotion of technological self reliance by development of indigenous technologies including rural technologies, arranging their exploitation and encouraging inventive talent in the country.

NRDC is a repository of indigenous technologies and a prime agency for technology transfer. Working closely with private and government funded R & D institutions, it has licensed over 1,000 technologies, the annual value of whose production is of the order of Rs. 800 million.

Managing Director: Dr. H. S. Rao.

National Seeds Corpn. Ltd., Beej Bhavan, Pusa, New Delhi 110012.

Functions: Chief co-ordinator of the National Seed Programme, responsible for organising a sound seed industry in India; concentrates on production of foundation and certified seeds of promising varieties of cereals, vegetables, fibre, fodder, pulses and other crops evolved by research; handles inter-state marketing and export of certified seeds; provides consultancy services in different fields of seed production, processing, quality control, marketing, information communication, advertising and public relations, training and project formulation and project management.

(Tamil Nadu & Pondicherry) Ltd., NTC House, P.B. No. 2409, 1064, Somasundaram Mills Rd., Coimbatore.

Mg. Director: P. G. Jain.

National Thermal Power Corpn. Ltd., N.T.P.C. Square, 62-69, Nehru Place, New Delhi 110019.

Functions: Set up under the Ministry of Energy to provide an integrated approach to development of thermal power in the country. The NTPC is responsible for the designing construction, commissioning and operation of super thermal power stations at coal pit-heads in the country. Projects under implementation include Singrauli (U.P.), Korba (M.P.), Ramagundam (A.P.), Farakka (W. Bengal), Rihand (U.P.) and Vindhyachal (M.P.) with cumulative capacity of 13,560 M.W. along with associated 400 kV transmission systems. Also presently responsible for the management of Badarpur thermal power station and project.

Chairman & Mg. Director: A. K. Shah.

Neelachal Ispat Nigam Ltd., IPICOL House, Janpath, Bhubaneswar 751007. (Orissa State).

New India Assurance Co. Ltd., New India Assurance Bldg., 87, M. Gandhi Road, Bombay 400023.

Neyveli Lignite Corpn. Ltd., Neyveli 607801, South Arcot Dist., Tamil Nadu.

This is a Rs. 7,500 million project. The integrated project envisages the mining of about 6.5 million tonnes of lignite per annum.

The 600 M.W. Thermal Power Station at Neyveli is the largest and the first lignite fire thermal power station in India and Asia located close to the pit-head.

The Urea Plant of Neyveli switched over to oil gasification from July 1979.

The Briquetting and Carbonisation Plant at Neyveli produces carbonised briquettes (Trade name: LECO) a smokeless domestic and industrial fuel from lignite.

The following tar products are also produced in the B & C plant: tar, neutral oil, carbolic acid (phenol), ortho cresol, meta-para cresols, xylenols and polyvalent phenols.

The construction of second mine with a capacity of 4.7 million tonnes of lignite per annum and a Second Thermal Power Station of 630 M.W. capacity is in full swing. The lignite from the second mine is expected to be made available from October 1984 and the first Unit (210 M.W. capacity) of the Second Thermal Power Station is expected to be commissioned by February 1985.

In February 1983, Govt. of India sanctioned the expansion of second mine from 4.7 to 10.5 million tonnes of lignite per annum and the Second Thermal Power Station from 630 M.W. to 1470 M.W.

North Eastern Electric Power Corpn. Ltd., Shillong 793003, Meghalaya.

Chairman-cum-Mg. Director: S. R. Shah.

North Eastern Handicrafts and Handlooms Development Corpn. Ltd., Upper Lachumiere, Shillong 793001.

Main objects of the corporation is to develop and promote handicrafts and handlooms in all aspects in the North Eastern Region, by providing financial, technical and other assistance to craftsmen, weavers, co-operative and any establishment, undertaking or enterprise, connected with handicrafts, handlooms and other allied products.

Chairman: B. K. Handique, M.P.; *Mg. Director:* A. K. Saikia, I.A.S.

North Eastern Regional Agricultural Marketing Corpn., Rajgarh Rd., Gauhati 781003. (Assam).

Optical Glass Plant, Central Glass and Ceramic Research Institute, Calcutta 700032.

The pilot plant located at the institute produces different types of optical glass. The plant has supplied till the end of March 1983 optical glass worth approximately Rs. 13.65 million to consumers.

M/s. Bharat Ophthalmic Glass Ltd., Durgapur, are making a few types of optical glass essentially based on the know-how developed at CGCRI.

Director: Dr. S. Kumar.

Oriental Fire & General Insurance Co. Ltd., Jeevan Udyog, Asaf Ali Road, New Delhi 110001.

Orissa Textile Mills Ltd., Choudwar, Cuttack 754025.

Paradeep Phosphates Ltd., A-132, Saheed Nagar, Bhubaneswar 751007.

Petrofils Co-operative Ltd., New Delhi House, Barakhamba Rd., New Delhi 110001.

A joint venture of the Govt. of India and weavers co-op. societies. The plant with an annual capacity of 3,500 tonnes of polyester filament yarn is situated at P.O. Petrochemicals, Vadodara Dist., Gujarat State. The capacity is going upto 7,000 mts. shortly.

Power Engineers Training Society, R. No. 207, 2nd Flr., Charanjiv Tower, 43, Nehru Place, New Delhi 110019.

Acts as an apex body for meeting the trg. needs of the power sector. It will set up a National Trg. Resources Unit for producing trg. materials, analysing skills and tasks for review & development of major trg. schemes, producing audio-visual material. etc. The Unit will also assess trg. needs & priorities, and keep liaison with the trg. units of the State Electricity Boards and suppliers of power plants and equipments, etc.

Praga Tools Ltd., 6-6-8/82, Kavadiguda Rd., Secunderabad 500003.

The company produces machine tools and machine tool accessories, forgings for railways and automobiles, defence items, etc.

Projects & Development India Ltd., CIFT Bldg., P.O. Sindri 828122, Dhanbad Dist., Bihar.

This new company was formed by constituting the Planning and Devpt. Division of the Fertilizer Corpn. of India into a separate independent Govt. Company.

Functions: Consultancy, design and engineering firm, research and development in fertilizer and chemical fields and manufacture of catalysts

Chairman & Mg. Director: Dr. B. K. Bhattacharya; *Director:* D. B. S. Sachdev (Finance).

Projects & Equipment Corpn. of India Ltd., Hansalaya, 15, Barakhamba Road, New Delhi 110001.

Formed in April 1971 as a subsidiary of the State Trading Corporation of India with complete autonomy in its marketing and commercial operations.

Functions: To export engineering, industrial and railway equipment from India, to undertake turnkey jobs abroad and to co-ordinate efforts of public and private sector industries and help them with marketing opportunities abroad, tendering and negotiations, finance and foreign exchange, procurement of materials, quality control, delivery schedules, etc.

Pyrites, Phosphates & Chemicals Ltd., *Registered Office:* Pali Road, Dehri-on-Sone 821307, Rohtas Dist., Bihar.

Units: 1. Mining Project, Amjhore, Rohtas Dist., Bihar; 2. Mussoorie Phosphorite Project, 1-AB, Ravindra Nath Tagore Marg, Dehra Dun, Uttar Pradesh; 3. Saladipura Project, P. O. Khandela, Sikar Dist., Rajasthan. *Branch Offices:* 6, Community Centre, East of Kailash, New Delhi 110065; 9, Sayed Amir Ali Avenue, Park Circus, Calcutta 700017; B-69, Sector-C, Mahanagar, Lucknow; B-4, Door No. 17, Sennathi Street, Subramania Nagar, Salem 636005; Prashant Puri, Varanasi 221002; Ramakrishnapuri, 13, Dr. M. P. Sinha Lane, Kanke Rd. (Near Jawaharnagar), Ranchi 834008; C-6, New Market Building, Sahidnagar, Bhubaneswar (Orissa); Kundu Bhavan, Bidhan Rd., Siliguri (West Bengal); Happy Villa, Uzan Bazar, Gauhati 781003; 878-E, III-B, Main Rd., RPC Layout, Vijayanagar, P. O. Bangalore 560040, Karnataka; XXXV/507-4, CRC Bldg., M. G. Rd., Cochin 682016 (Kerala); Chaturbhuj Thakur Marg, Ganipur, Muzaffarpur (Bihar).

Mining Programme: Pyrites: It has been planned to produce 270,000 tonnes of pyrites ore per annum (+33 per cent 'S') to feed the pyrites based sulphuric acid plant in Sindri at a capital cost of Rs. 133.2 million. However, the present mine capacity has been sealed at 120,000 tonnes per annum to the reduced requirement of ore at Sindri at present.

In addition to the above production of low grade pyrites, 22 per cent ('S' Agriculture Grade) is also being mined and marketed by the company for reclamation of usar (Alkali soils). The demand of this material is going up.

Rock Phosphate: The company is mining rock phosphate at Maldeota and Durmala mines in Dehra Dun. This material is being marketed as a straight phosphatic fertiliser in acidic soils situated in the States of Kerala, Karnataka, Tamil Nadu, Orissa, Bengal, Assam, Uttar Pradesh, Himachal Pradesh etc. The demand for phosphate is growing year after year. The sales during 1981-82 was about 58,100 tonnes.

Saladipura Production-cum-Exploratory Mining Project: Exploratory work for exploitation of pyrites deposit is being undertaken.

Financial: The turn over of the company during 1981-82 was Rs. 69.00 million and profit during 1981-82 was about Rs. 2.00 million.

Mg. Director: T. N. Jaggi.

Radio & Electricals Mfg. Co. Ltd., P. B. No. 2606, Mysore Rd., Bangalore 560026. (A subsidiary of Bharat Heavy Electricals Ltd.)

Products Manufactured: Single & Polyphase electricity meters, water meters, paper, electrolytic and polyster capacitors.

Rail India Technical & Economic Services Ltd. New Delhi House, 27, Barakhamba Rd., New Delhi 110001.

Rajasthan Atomic Power Project (See Chapter on "Atomic Energy".)

Rashtriya Chemicals & Fertilisers Ltd. (RCF), Chembur, Bombay 400074

Responsible for the operation of Trombay Fertilizer Complex and two giant fertilizer plants based on Bombay High Gas at Thal in Raigad Dist. The company has its full fledged R&D Centre, Training Institute for development of human resources with Marketing operations in the Western & Southern Regions of the country. It produces most of industrial products which are used as intermediaries for life saving drugs and pesticides etc.

Chairman & Mg. Director: Duleep Singh.

Rehabilitation Industries Corpn. Ltd., 25, Free School St., Calcutta 700016.

Functions: Manufacturing and trading of consumer items by creating employment opportunities through industries for the displaced persons from Bangladesh and to the migrants from West Pakistan (who have entered Indian territory as a result of the conflict with Pakistan), repatriates from Burma and Sri Lanka and persons of Indian origin migrated from other countries with the intention of permanently settling in India.

Richardson & Cruddas (1972) Ltd., *Head Office:* Byculla Ironworks, Bombay 400008. *Branch Offices & Works:* L.B. Shastri Marg, Mulund, Bombay 400080; Post Box No. 1276, Madras 600001; MIDC Ind. Estate, Hingna Road, Nagpur 440016.

Liaison Offices: Surya Kiran, K. Gandhi Marg, New Delhi 110001; Hindustan Bldgs., 4, Chittaranjan Avenue, Calcutta 7000[illegible].

Established in 1858, this company became a wholly owned Government of India Undertaking from 1-4-1972.

Product Lines: Byculla: Fabricated steel structures, points & crossings, rubber & sugar machinery and grey iron castings; Mulund: pressure vessels, heat exchangers & chemical processing equipment; Madras: Fabricated steel structures, refrigeration equipments and sanitation & public health engineering, India Mark-II Deepwell handpumps; Nagpur: Transmission line & Microwave Towers, Railway electrification structures.

Rural Electrification Corpn. Ltd., D.D.A. Bldg., Nehru Place, New Delhi 110019.

Functions: (i) To finance rural electrification schemes; *(ii)* To subscribe to special rural electrification bonds that may be issued by the State Electricity Boards; *(iii)* To promote and finance rural electric co-operatives; *(iv)* To administer the funds received from the Government of India and other sources as grants or otherwise.

Chairman-cum-Mg. Director: M. Venkataratnam.

Chairman: M. R. Naidu; *Mg. Director:* Y. Adinarayana Sastri.

United India Insurance Co. Ltd., 24, Whites Road, Madras 600014.

Unit Trust of India, Head Office: 13, Sir Vithaldas Thackersey Marg, New Marine Lines, Bombay 400020.

Regional Offices: 13, Sir Vithaldas Thackersey Marg, Bombay 400020; Gulab Bhavan (Rear Block), 2nd Floor, 6, Bahadur Shah Zafar Marg, New Delhi 110002; 4, Fairlie Place, Calcutta 700001; Regina Mansion, 46, Second Line Beach, Madras 600001.

Functions: It pools the savings of the community and invests them in securities of various types. To pool the savings, the Trust sells 'units'. All units rank equal for the distribution of income, regardless of when they are acquired. The Trust offers one other important and unique advantage: it is always ready both to sell and buy its units at prices published by it. A unit-holder is thus assured complete liquidity for his investment.

The Trust is exempt from payment of income tax and other taxes on income. Income from units enjoys exemption from income tax upto an overall limit of Rs. 10,000 (Rs. 3,000 is available exclusively for units while Rs. 7,000 is available for units together with certain other specified investments). Investment in units qualify for exemption from wealth tax upto Rs. 0.2 million (Rs. 35,000 is exclusively applicable to units while Rs. 0.165 million is for units together with certain other specified categories of investments.

The Trust paid a dividend of 13.5 per cent for 1982-83 under Unit Scheme 1964.

Mg. Director: Vijendra Singh.

Weighbird (India) Ltd., Chartered Bank Buildings, Calcutta 700001.

STATE GOVERNMENT UNDERTAKINGS

The Public Sector covers those undertakings, which are owned or managed by the Government. These are departmental undertakings like the railways and statutory corporations under which come the Damodar Valley Corporation, financial institutions, which cover the Film Finance Corporation, public utility undertakings like transport & electricity, which come under the purview of the Indian Companies Act. Prior to independence, private companies were by far a large controller of most of the industrial & commercial undertakings with the exception of the railways. The Government's 1948 resolution on economic policy projected the ideal of mixed economy where both the private sector and public sector had each an important role to play in the industrial development of the country. But by the 1956 resolution on economic policy the States were entrusted with key national projects.

The following are the undertakings, State-wise:

ANDHRA PRADESH

Agro Pumpsets & Implements Ltd., 10-2-317/3, Vizianagar Colony, Hyderabad 500457.

A marketing and service organisation set up by the A.P. State Agro Inds. Devpt. Corpn. SPORTS

THE origin of Olympic games goes back to Olympia in Greece which was held in honour of Zeus and dates back to 776 B.C. to 394 A.D. Olympiads covered the four years between each celebration of the Olympic games. The festivals included competitions in literature, art, drama, rhetoric, music and gymnastics. In 1896 Baron Pierre de Coubertin fathered the modern Olympic Games. "The important thing" he said, "in the Olympic Games is not winning but taking part. The essential thing in life is not conquering but fighting well."

The U.S.A. boycotted the 1980 Moscow Olympics because of the Soviet intervention in Afghanistan.

The other major powers who stayed away from joining the Olympics were China, Japan, West Germany and Canada. Only 81 nations took part in the Olympic games in 1980.

OLYMPIC CHAMPIONS

Track and Field-Men

Year	*Winner*	*Country*	*Time (Seconds)*

HIMALAYAN CAR RALLY (1982)

Winners: First Prize—**Air-India Trophy** and a cash award of Rs. 30,000—Jayant Shah (a Kenyan businessman) and his driving partner Aslam Khan; Second Prize—**Modi Rubber Trophy** and a cash award of Rs. 15,000—Rudolf Stohl (Austrian); Third Prize—A trophy and a cash prize of Rs. 10,000—Ramesh Khoda (Kenyan businessman).

See Chapter on State Associations for State-wise list of Sports Associations.

MOUNTAINEERING

THREE flags of three nations, Indian, British and New Zealand, fluttered proudly on the summit of Mt. Everest on May 29, 1953, announcing to the world that the highest peak had been, at last, conquered. For three mountaineers, Edmund Hillary, Tensing Norgay, the sherpa, and the leader of the expedition, Col. John Hunt, it was indeed a deed of great achievement which evoked admiration and applause the world over.

This great event prompted the Government of India to set up the Indian Mountaineering Foundation in Delhi and the Himalayan Mountaineering Institute at Darjeeling. Interestingly, August 27, 1983, marked the silver jubilee of the Indian Mountaineering Foundation, a milestone in the rapid strides of mountaineering in India. An offshoot of this is the establishment of several mountaineering institutes in India.

Historically, mountaineering, which has been described as the practice of climbing to elevated points for sports, pleasure or research, took the first leap forward in a significant achievement in the ascents of Mount Blanc in 1786 by Jacques Balmat and Michel G. Paccard and in 1787 by Horace B. de Saussure.

Mountaineering as a sport, however, started with the ascent of Wetterhorn (in Colorado) in 1854. But this feat was surpassed in popularity by the success of Edmund Whymper on the Matterhorn in 1865. The sport rapidly attracted admirers and the Alpine Club of London was set up in 1858 and published its own magazine, "Alpine Journal", in 1867.

Two other notable feats in mountaineering were the conquest in 1961 of the South face of Mt. McKinley in Alaska and Chincy (1961) of Northwall of Eiger in the Alps.

The towering giants for mountaineers are: Mt. Everest, Mt. Godwin-Austen and Mt. Kanchenjunga, all conquered in the 1950s.

The fascinating Himalayas have always posed an irresistible challenge to man inviting him to unravel its mysteries by scaling the virgin peaks. The earliest survey of the contours of the Himalayas is recorded in a book entitled "Kedarkhand" written by Veda Vyas, the mythological surveyor. Most of the peaks derive their names also from this exploratory document.

Though by 1850 most of the lesser known peaks and their heights were established trigonometrically, the world's highest peak was fixed only in 1852 by a team of surveyors who named it Mt. Everest, after Sir George Everest, the Surveyor-General of India. It was a feat in an era when very little was known about air pressure, lack of oxygen and living conditions on such heights. The first organised mountaineering was in 1852 when W. H. Graham climbed the 24,000ft. Kabru peak, near Kanchenjunga.

Modern mountaineering in India can be said to have started from 1918, when two Englishmen climbed the 19,000ft. peak near Leo Pargyal in Simla. Gradually local sherpas were inducted into expeditions and air reconnaissance was also introduced in 1933 whereby the first aerial view of Mt. Everest was established.

With the conquest of Mt. Everest on May 29, 1953 by Sir Edmund Hillary and Tensing Norgay a new era opened up and mountaineering as a sport came to be widely and internationally recognised.

The three most historic events in mountaineering history are the assault on Annapurna by Mauric Herzog of France in 1950, the conquest of Mt. Everest by Edmund Hillary and Tensing Norgay in 1953 and the Japanese all-women expedition to Mt. Everest in 1975 under the leadership of Mrs. Junko Tabei.

The first all-Indian expedition was launched on Mt. Everest in the summer of 1960 under Brig. Gyan Singh which unfortunately missed the peak. In 1962 a second party under Maj. John Dias was

SUCCESSFUL EXPEDITIONS TO MT. EVEREST

Year	Sponsored Country	Group Leaders
May 1953	Great Britain	Edmund Hillary and Tensing Norgay (1)
May 1963	United States of America	Norman G. Dyhrenfurth
May 1963	United States of America	W.F. Unsoeld and T.F. Hornbein
May 1965	India	M.S. Kohli
May 1970	Japan	Torno Matsunra and Naomi Uermera
May 1973	Italy	Guido Monzino
May 1975	Japan (All women)	Mrs. Junko Tabei (2)
May 1975	China with Tibet	Miss Panthong (3)
Sept 1975	Great Britain	Chris Bonington (4)
Sept 1976	Great Britain (Canoeing)	Mike Jones
Oct. 1976	United States of America (Bicentennial Everest)	Phil Trimble
Sept. 1977	Korea	Ko Sang Don

(1) Under the leadership of John Hunt. (2) First woman to reach summit. (3) Second woman to reach summit. (4) Reached summit through South West face. (5) Climbed without oxygen. (6) First German to reach summit. (7) Climbed without oxygen.

EXPEDITIONS BY WOMEN

Year	Sponsored by	Group Leader	Peak
June 1964	Four Women Indian Expedition of Manali Mountaineering Instt.	Miss Snehalata Pilke	Mt. Deo Tibba
Oct. 1964	Expedition by Girl Guides	Miss Joyce Dunsheath	Mrigthuni
April 1966	All-women Himalayan Expedition	Miss Pushpa Athavle	Mt. Koktang
June 1966	Gujarat University Girls' Expedition	Miss Nandini Patel	Gangotri I
June 1967	Pune Girls' Expedition	Dr. G.R. Patwardhan	Jogin III
Oct. 1967	All-women Expedition	Miss Deepali Sinha	Ronti
May 1968	Indo-Japanese Women Expedition sponsored by Indian Mountaineering Foundation	Nandini Patel	Mt. Kailash
June 1969	Gujarat Girls' Expedition	Miss Dolly Sahar	Hanuman Tibba
June 1970	Bombay All-women Expedition	Miss Meena Agrawal	Trisul
Oct. 1970	All-women Delhi Mountaineering Association	Miss M.C. Usha	Hanuman Tibba
June 1974	Maharashtra Trekkers and Cultural Society Women Expedition	Miss Lalita Patil	Hanuman Tibba
May 1975	Japanese All-women	Mrs. Junko Tabei	Mt. Everest
May 1975	Chinese-Tibetan	Miss Panthong	Mt. Everest
June 1975	Two-women Expedition sponsored by Delhi Mountaineering Association	Miss Usha Chari	Mukerbeh
June 1975	Youth Hostel Association of India	Miss Nalini V. Dave	Ranikoot
Oct. 1975	Calcutta All-women Mountaineering Team	Miss Chandraprabha	Kedarnath Dome
Oct. 1975	Maharashtra Mountaineering and Trekking Club	Miss Lalita Patil	Deo Tibba
June 1976	Indo-Japanese Girls'	Dr. Meera Agrawal	Abi Gamin
Oct. 1978	Western Himalayan Women	Raman Sen Gupta	White Sail
Oct. 1978	American Women's Expedition	Irene Miller	Annapurna
June 1981	Maharashtra N.C.C. Girl Cadets	N.A.	Friendship
Sept. 1981	Six men and six women	Col. B.S. Sandhu	Nanda Devi
May 1982	Korean Expedition	Miss Hyoung Heekay	Mt. Lamjung Himal
May 1983	Japanese Women Mountaineering Expedition	Fumie Shimamura	Mt. Takuche

sent. That also was a failure. In 1965 an Indian expedition led by Com. M. S. Kohli succeeded in reaching the summit with nine members.

English and German poets have waxed eloquent over the glory of the Alps and John Ruskin and Joseph Turner gave them prominence as subjects for painters. There has been a rich and extensive literature on mountaineering, partly because the sport has attracted persons of cultured accomplishments.

MOUNTAINEERING BY WOMEN

The all-women expedition led by Madame Claude Kogan of France to conquer Cho Oyu peak in the Himalayas in 1959 is considered to be the starting point of mountaineering by women. In India, the Himalayan Mountaineering Institute of Darjeeling was the pioneer in starting an all-women mountaineering course. It was in 1961 that a team of 24 girls was selected for this course by Brig. Gyan Singh who was then the principal of the institute. Later, other institutes also started a similar course.

The systematic training given by the institutes and the encouragement by various state governments namely, Gujarat, Maharashtra, Uttar Pradesh, Rajasthan, Himachal Pradesh, West Bengal, etc. resulted in giving a moral boost to the mountaineering adventure among youth and consequently women came to the forefront. The various peaks scaled by women mountaineers from 1964 onwards testify to the adventurous spirit among women.

At present plans are afoot by the Indian Mountaineering Foundation, Delhi, and the Himalayan Mountaineering Institute, Darjeeling, to organise an all-women expedition to conquer Mt. Everest.

TRAINING INSTITUTES

There are six major institutes in India. They are: (1) Indian Mountaineering Foundation, Delhi; (2) Himalayan Mountaineering Institute, Darjeeling; (3) Nehru Institute of Mountaineering, Uttarkashi, Uttar Pradesh; (4) Madhya Pradesh Mountaineering Institute; (5) Western Himalayan Mountaineering Institute, Manali, Kulu; and (6) Manali Institute of Mountaineering, Gangtok.

COMMUNICATIONS

THE telephonic conversation which the Prime Minister of India Mrs. Indira Gandhi, had with the British Prime Minister, Mrs. Margaret Thatcher, on May 3, 1983, was a milestone which marked 50 years of India's telephonic link with Great Britain. It was on that day 50 years ago that the then Secretary of State of India, Sir Samuel Hoare, had made the call from London to Sir Frederick Sykes, Governor of Bombay.

Growth of Postal System: The first postal system was introduced by Lord Clive in 1766, which was meant for official purposes only. In 1837, it was opened to the public and the first postal stamps were issued in Sind in 1852. In 1854, the East India Company set up the postal service as a separate entity under a Director-General and issued postal stamps to be used on an all-India basis. The postal system in India became operative by Act VI of 1858 and by another act in 1898 the Posts and Telegraphs system received statutory recognition.

At the time of independence there were only 22,116 post offices in the country but with the extension of postal facilities to all the villages there has been a phenomenal growth. On July 1, 1968, the 100,000th post office was opened in Sahabad district of Bihar. At present there are 140,435 post offices, out of which 125.743 are in the rural areas and 14,692 in the urban areas.

In 1853 the first long-distance overhead telegraph was introduced between Calcutta and Agra and later the line was extended to Bombay and Peshawar. Telegraph circuits were gradually extended to all parts of India by 1867. The centenary of the telegraph system was celebrated in November, 1953. At present there are 34,096 telegraph offices.

The Telephone service in India was started in 1881 when a 50-line telephone exchange was installed in Calcutta and the first automatic telephone exchange was installed at Simla in 1913. At the time of independence there were only 321 exchanges and 86,000 telephones in the country. At present there are 2,149,470 exchanges and 2,468,874 telephones.

POSTS AND TELEGRAPHS

Administration: The Indian Posts and Telegraphs Department, the second largest civil employer in the country, comes under the administrative control of the Ministry of Communications. The Secretary of the Department holds charge of the office of the Director General, Posts and Telegraphs as also that of the Chairman of the Posts and Telegraphs Board. The country is divided into 15 telecommunication circles, 16 postal circles, 17 Posts and Telegraphs Civil circles, 5 Posts and Telegraphs electrical circles and 30 telephone districts.

Staff: The total staff strength on March 31, 1981 was 852 million including .284 milion extra departmental employees and 7,084 industrial workers. 33 officers and 3,293 other ranks (including 139 under training were on deputation to the Army Postal Service.

No. of Post Offices: At the end of 1981, the total number of Post Offices in the country was 140,435 out of which 125,743 were in the rural areas and 14,692 in urban areas. Against a target of 1,600 post offices to be opened during 1981-82, the actual number of post offices opened up to end of 1981 was 1,054 (including 247 in tribal areas), including 157 post offices opened in the urban areas.

During the Sixth Five-Year Plan, it is proposed to open 8,000 post offices. Out of these 63 per cent are to be opened in the backward, hilly and tribal areas.

Rural Mobile Post Offices: The cycle post office was opened in Shirgaon, near Ratnagiri, in 1974. Against the target of 2,000 villages to be covered by Mobile Post Offices in the rural areas, 1,187 have been covered till December 31, 1981. This includes 276 villages in the tribal areas. The facility had to be withdrawn from a number of villages as it was not being utilised fully. The total number of villages receiving this facility through mobile post offices was 82,800 as on December 31, 1981.

Postal Traffic: In 1981-82 about 9,730 million pieces of mail were handled of which 243.3 million were registered articles, about 2.5 per cent of the total mail. 111.8 million inland money orders totally valued at Rs. 12,510 million were issued, earning the department Rs. 300 million as commission. 11.1 million value payable articles were dealt with. 723.415 parcels were despatched to foreign countries and 714,586 parcels were received from abroad.

Letter Boxes: At the end of 1981, the total number of letter boxes in the country was 495,853 out of which 421,604 were in the rural areas.

Mail Conveyance: The mail is carried both by surface and air. Various modes of conveyance such as rail, road, transport runners etc. are used for surface mail. Within the country all principal cities are connected by air, and other cities are connected by the surface link.

All inland letters, letter cards, postcards, registered letters and money orders are normally carried by air without surcharge. During 1980-81 a total weight of 2.927 million kg was carried from India for abroad and domestic mail within the country was 12.15 million kg.

Commemorative Special Stamps (1981), Occasion & date respectively: 51st death anniversary of Mazharul Haque, a great journalist, poet and writer, Jan 2; First centenary of St. Stephens College, Delhi, Feb. 1; 1,000th anniversary of the installation of the statue of Gommateshwara, Feb. 9; 25th death anniversary of G. V. Mavalankar, first Lok Sabha Speaker, Feb. 27; 50th anniversary of the martyrdom of Bhagat Singh, Raj Guru, Sukhdev, Chandrashekhar Azad and others 'Homage to Martyrs', Mar. 23; 84th death anniversary of Heinrich Von Stephan, founder of Universal Postal Union, Apr. 8; International Year of Disabled Persons, Apr. 20; Tribes of India Series, 4 stamps, May 30; Highlighting the need of Conservation of Forests. Environmental Conservations. June 15; 101st birth anniversary of Nilmoni Phukan a poet and freedom fighter from Assam, June 22; First death anniversary of Sanjay Gandhi a young leader, June 23; Anniversary of Launching of Rohini Satellite by Indian Satellite Launching Vehicle (SLV-3), July 18; First set of 2 stamps of IX Asian Games, 1982, July 28; Series of Flowering Trees, 4 stamps, Sep. 1; World Food Day, Oct. 16; Butterflies, 4 stamps, Oct. 20; Renowned actor and great dramatist, Bellary Raghava, Oct. 31; Presentation of colours and reunion of Mahar Regiment, Nov. 9; Children's Day, Nov. 14; Second issue (third stamp) on IX Asian Games, 1982, Nov. 19; Death centenary of great historian of India Kashi Prasad Jayaswal, Nov. 27; International Day of Solidarity with the Palestinian People, Nov. 29; To commemorate Navy Day, Dec. 4; In honour of Henry Heras, an Indologist and founder of Bombay Historical Society, Dec. 14; To commemorate the inauguration of the IOCOM Submarine Telephone Cable, Madras, Dec. 24; Fifth World Cup Hockey, Bombay, Dec. 29; Third issue (fourth stamp) on IX Asian Games, 1982, Dec. 30.

Overseas Communications Service:

India's external telecommunication service is operated by the Overseas Communications Service (OCS) with its headquarters at Bombay, which is a department of the Ministry of Communications, Government of India.

OCS operates in four international gateway centres located at Bombay, New Delhi, Calcutta and Madras, and provides Overseas telephone, telex, telegraph radiophoto leased teleprinter, voice grade and high speed data services. International TV relays and broadcast transmission and reception facilities for news agencies and government are also provided.

Almost 99% of India's external telecommunications are handled by OCS via INTELSAT Satellite in the IOR, through its two satellite earth-stations at Arvi near Poona (established in 1971) and Dehradun (established in 1976). A modern wideband submarine telephone cable system has also been established between Madras and Penang in Malaysia, providing diversity routine facilities. Electronic stored programme control gateway telephone and telex exchanges at the OCS gateway centres facilitate the most modern means of handling telephone and telex calls. Fully Automatic Subscriber Dialled International Telex service is available to more than 75 countries. International Subscriber Dialled (ISD) telephone service which is presently available to UK from the metropolitan cities of Bombay, New Delhi, Calcutta and Madras is being extended to more countries.

Private Leased Circuits: As on 1.1.1982, OCS has leased 14 voice-grade circuits for telephone and data services and 124 teleprinter circuits.

Program Transmissions (Voice-casts): Facilities are provided on the overseas telephone system for the transmission and reception of "voice-casts" by correspondents of foreign broadcasting organisations for relay on their broadcast networks.

Press Broadcasts: OCS provides multi-address teleprinter news broadcast transmissions on behalf of the Ministry of External Affairs, simultaneously to about 66 Indian consular posts around the world. OCS also provides reception of foreign radio teleprinter press broadcasts on behalf of news agencies. Press Bulletin Services at concessional tariff are also provided to news agencies. 20 such Press Bulletin circuits are in service as on January 1, 1982.

Sixth Plan Outlay and Expenditure: Against an outlay of Rs. 850 million the actual expenditure during the first (1980-82) and second (1981-83) years of the Sixth Plan were Rs. 264.5 million and Rs. 176.2 million respectively. The anticipated expenditure for 1982-83 is Rs. 90 million.

During 1982-83 Overseas Communication Services registered considerable growth in its gross revenue and net profit, figures rising from Rs. 743 million and Rs. 460 million in 1981-82 to Rs. 850 million and Rs. 568.9 million in 1982-83.

"QMS" (Quick Mail Service) was introduced in India on August 1, 1975 interconnecting the headquarters of the State/Union Territories. As on December 31, 1979 QMS was available in 45 national and 410 regional centres. On an average more than 450,000 articles are handled per day by QMS.

Savings Bank: Over 139,000 post offices offer savings bank facilities. About 45 million account-holders have savings in the post offices. The post office savings bank runs all savings schemes. The progress of post office savings bank business since 1978 is given below:

As on March 31	Savings Bank		Cumulative Time Deposits		Savings Certificate
	No. of depositors (in million)	Balance (Rs. million)	No. of depositors (in million)	Balance (Rs. million)	Balance (Rs. million)
1978	25.0	15,210	3.1	2,080	9,190
1979	26.8	16,950	3.0	2,370	11,250
1980	30.6	18,770	3.2	2,840	13,570
1981	33.3	1,990	4.2	3,390	15,620

During 1982-83 the net small savings collection in the country was over Rs. 16,500 million. The collection made by Maharashtra and West Bengal during 1982-83 were Rs. 3,110 million and 2,460 million respectively.

Postal Life Insurance: 120,170 new policies for an assured total sum of Rs. 1,021.5 million were issued during 1980-81 as against 108,975 policies for Rs. 830.9 million secured in 1979-80.

Telegraph Offices: There were 34,096 telegraph offices as on March 31, 1981. During 1980-81, 2,459 telegraph offices were opened in the country. During the Sixth Plan period, it is proposed to open 15,000 more telegraph offices.

During 1980-81, 71.4 million inland telegrams were booked. Besides 12.15 million phonograms, 6.7 million greeting telegrams, 1,548 inland, 694 outgoing and 693 incoming foreign phototelegrams were handled during the year. 2.47 million phonograms were delivered over the phones during 1980-81.

Devanagari Telegraph Service: The number of telegraph offices providing this service rose from 10,748 in 1978-79 to 11,200 in 1980-81.

Telex: This service is available in 62 telegraph offices in the country. 2.07 million telegrams were booked and 1.73 million were delivered over telex.

Telephones: The switching capacity in the country reached 2,468,874 lines with the addition of 133,029 lines during the year. There was also a net addition of 133,404 direct exchange lines bringing the total of direct exchange lines up to 2,149,470,441. New telephone exchanges were installed so that by March 1981 end 7,871 departmental exchanges were operating in the country. The number of connections provided in the Sixth Plan up to February 1, 1983 are as follows: Andhra Pradesh: 36,489; Bihar: 4,645; Delhi: 47,628; Gujarat: 34,764; Haryana, Punjab, Himachal Pradesh and Chandigarh: 29,047; Jammu & Kashmir: 2,745; Karnataka: 30,639; Kerala: 17,629; Madhya Pradesh: 8,219; Maharashtra: 86,901; North-Eastern States: 3,832; Orissa: 3,785; Rajasthan: 16,311; Tamil Nadu: 26,088; West Bengal: 20,361.

International Telephone Service: Direct telephone service is available with 44 countries of which 40 countries are connected through satellite circuits. Switched telephone service is now available to almost all the countries of the world. The year 1983 marks the completion of 50 years of telephonic link between India and Great Britain.

Mobile Phone Exchange: A trailer-mounted mobile telephone exchange (first of its kind in the country) designed and manufactured by Indian Telephone Industries, Bangalore was commissioned on January 19, 1977. The exchange with a 1,000 line capacity, costing Rs. 200,000 will provide telephone services in any area. It has all the facilities of a regular exchange.

Subscriber Trunk Dialling: First STD route was introduced between Delhi and Jaipur on September 8, 1964. At present out of 373 Dist Headquarters outside the State Capitals, 355 are linked with State Capitals. The number of routes having STD facility from State Capitals to Dist. Headquarters has increased from 79 to 88 during 1980-81. The routes having STD facility from Dist. Headquarters to State Capitals have gone up from 79 to 88. Additional routes with 'No Delay Service' were introduced between State Capitals and Dist. Headquarters and as on 31.3.1981 there were 256 routes with 'No Delay Service' between State Capitals and Dist. Headquarters and 264 in the reverse direction.

The first electronic trunk automatic exchange (TAX) was inaugurated in Bombay on April 30, 1983 for quicker maturity of STD calls beginning with "O".

International Telex Service: Fully automatic subscriber dialled international telex service is available in respect of 49 countries and switched telex service to almost all countries of the world. During the year direct telex service was extended to Thailand, Malaysia, Kenya, Spain and Egypt on fully automatic basis through electronic type Gateway Telex Exchange, Bombay. Switched telex service was extended to New Caledonia.

BROADCASTING

Organised broadcasting was started in India in 1927 by a private Indian Broadcasting Company from Bombay and Calcutta. This lasted till 1930. The Government of India decided to run radio stations in 1932. In 1936, broadcasting was constituted into a separate department. All India Radio replaced the earlier Indian State Broadcasting Service on June 3, 1936. The real break in broadcasting came with World War II. Most of the news services and external services originated during the war years.

Akashvani: All India Radio operates this service over a network of broadcasting stations located throughout the country. It caters to the complex needs of all communities in the country.

Broadcasting constitutes the most powerful medium of mass communication covering 89 per cent of our population. At the end of 1981 there were 85 broadcasting stations.

An outlay of Rs. 1,223.8 million has been fixed during the Sixth Plan for development projects.

Commercial Broadcasting: Commercial services were started in November, 1967. The earnings of commercial Broadcasting service of Akashvani up to January 31, 1982-83 was Rs. 135.9 million.

Broadcast Receiver Licences: The number of Broadcast Receiver Licences and TV licences in force as on 30.9.1979 for the three quarters of the calendar year 1979 was 16,467,890 and 887,384 respectively. It was expected that the number of Broadcast Receiver Licences and TV licences may go up to 21,200,000 and 1,000,000 respectively by the end of December 31, 1979. During the calendar year 1978 the number of unlicensed sets detected was 304,773 Radios and TVs together and Rs. 3,855,230 as licence fee and Rs. 3,401,409 as surcharge were collected.

TELEVISION

Television at Delhi started as an experimental service in 1959 and since then it has grown rapidly. In 1961, an educational TV service was also started in Delhi with the help of the Ford Foundation and in collaboration with the educational authorities of Delhi. A regular daily service was started from Delhi in 1965. The duration of the general television progrramme in the evening transmission has been increased to three hours from July 1970. The Bombay television station started on 2nd October 1972. It started with a programme time limited to 2 hours and 15 minutes daily, which has been increased to 3 hours on week days and 3½ hours on Saturdays and Sundays. Commercial TV started in India on 1st January, 1976.

At present Television has 7 full-fledged centres at Srinagar, Bombay, Madras, Calcutta, Lucknow, Delhi and Jullundur-Amritsar; 3 Programme Production Centres at Delhi, Cuttack and Hyderabad; 7 SITE on-going transmitters at Hyderabad, Muzaffarpur, Sambalpur, Raipur, Jaipur, Gulbarga and Ahmedabad; and 3 Relay centres at Mussoorie, Kanpur and Pune. The most recent station in the network was commissioned at Jullundur on April 13, 1979.

At present TV network covers an area of 0.2 million sq. km. (6.1 per cent of the total) with a population of 83.21 million out of which 48.16 million is rural and 35.05 million is urban.

During 1982-83 television service has been extended to 53,883 villages covering a rural population of 68.3 million.

An outlay of Rs. 869.5 million has been allotted for expansion plans during 1980-85.

The Sixth Plan of TV service envisages setting up of four new TV centres at Ahmedabad, Bangalore, Trivandrum and Gauhati and providing for production facilities at Raipur, Gulbarga, Jaipur and Muzaffarpur. Eight additional centres are also proposed to be set up.

Commercial T.V.: Commercial service was started in India from January 1, 1976. Ten per cent of the total transmission time is available for commercials every day. The revenue from commercials from 1978-79 to 1981-82 (in Rs. million) is 1978-79: 49.7; 1979-80: 61.6; 1980-81: 80.9; 1981-82: 115.

CIVIL AVIATION

J. R. D. TATA'S historic flight from Bombay to Karachi and return to Juhu airport. Bombay, in a twin-seater single-engine Leopold Moth on October 15, 1982, commemorating the same solo flight he had made exactly 50 years ago, also marks the golden jubilee of civil aviation in India.

In the thirties, Juhu airport was nothing more than a cluster of mud huts in swampy land and often submerged in floods during the monsoon. It was the rustic bullock-carts that supplied aviation fuel for three or four small aircraft that was all that comprised the airline fleet.

In marked contrast is the present sophisticated fleet of Boeing planes that converge day and night on the tarmac from all parts of the world and make Sahar a buzzing and bustling international airport.

It was J.R.D.'s vision and dynamism that enabled Air-India Boeings to take to the skies and achieve remarkable success as one of the foremost international airlines of the world. It is indeed the pride of India. Over the years the "father of civil aviation", as J.R.D. has been rightly called, nursed Air-India International and established air links with America, Europe and Asia.

Growth: In point of fact, 1911 marks the beginning of civil aviation in India for it was in that year demonstration flights were made for the first time. The flight by a Frenchman, M. Picquet, carrying mail from Allahabad to Naini was believed to be the first air mail service in the world.

But organised air transport began in India only in 1920 and the Civil Aviation Department was set up in 1927. In 1929, Imperial Airways opened a weekly service between U.K. and India. In 1932 Indian National Airways Ltd. and Tata Airways Ltd. opened two services one from Karachi to Madras and the other from Karachi to Lahore.

The Empire Air Mail Scheme was introduced in 1937. The commencement of World War in 1939 paralysed all air services. From 1945 onwards air services progressed steadily. In 1945, 11 aviation companies were formed, and the Air Transport Licensing Board was established in 1946.

But it is only after Independence that civil aviation in India has made spectacular progress. In 1949 night air mail services were opened between the four metropolitan cities. In 1953 the Indian Airlines Corporation and Air-India International were set up by passing the Air Corporation Act. The Air Transport Council was set up in 1955 to advise the Government on matters relating to the two corporations.

At present the operation of air services is entrusted to two public sector corporations, Air India for the international services and Indian Airlines for the domestic services. The International Airports Authority of India, which was established in 1972, is responsible for the management of international airports.

Department of Civil Aviation: The department of civil aviation is one of the two departments in the Ministry of Tourism and Civil Aviation under the independent charge of a Minister of State.

Minister of State for Tourism and Civil Aviation: Khurshid Alam Khan. **Director General of Civil Aviation:** J. N. Kaul. (For other officials see "Government of India Personnel".)

Sixth Plan Outlay: Rs. 1,585 million.

Total Plan Outlay for 1983-84: Rs. 400 million

Annual Budget for 1983-84: Rs. 400 million

INTERNATIONAL AIRPORTS AUTHORITY OF INDIA, Yashwant Place, Chanakyapuri, New Delhi 110021. Based at Delhi, I.A.A.I. was established as a statutory corporation with effect from February 1, 1972 for the management and development of the four international airports at Bombay, Calcutta, Delhi and Madras.

Members: Capt. A. M. Kapur, *Chairman;* Capt. Dhruva Bose, *Chairman and Managing Director, Air India;* Capt. K. Chadha, *Managing Director, Indian Airlines;* Ved Prakash, *Member (Finance & Admn.), I.A.A.I.;* P. S. Sandhawalia, *Member (Engg.), I.A.A.I.;* A.V.M. P. S. Dere, *Member (Operations), I.A.A.I.:* Vacant, *Director-General, Tourism;* Air Vice-Marshal C. K. S. Raje, *Director-General. Civil Aviation.*

General Managers of International Airports: Bombay: Air Cdr. N. W. Tilak; **Delhi:** Air Cdr. N. Sinha Ray; **Calcutta:** Shri A. V. Anand; **Madras:** K. K. Gulati.

I.A.A.I./Operational Statistics		1980-81	1981-82	1982-83*
Aircraft Movement	Nos. in '000	111	108	
Passengers Movement	-do-	10,738	11,986

Profit after tax	-do-	68.7	106.6	118.7

*Revised estimates.

AIRPORTS: At the end of December, 1982, 87 airports were maintained by the Civil Aviation Department.

Major Aerodromes (22) are: Agartala, Ahmedabad, Amritsar, Aurangabad, Barapani, Bhubaneswar, Bhuj, Gauhati, Hyderabad, Imphal (Tulihal), Jaipur, Khajuraho, Lucknow, Mangalore, Nagpur, Panagarh, Patna, Ranchi, Trivandrum, Tiruchirapalli, Udaipur and Varanasi.

The following are Intermediate Aerodromes (20): Belgaum, Bhopal, Bhavnagar, Chakulia, Dibrugarh (Mohanbari), Gaya, Indore, Jabalpur, Kandla, Keshod, North Lakhimpur, Port Bihar, Raipur, Rajkot, Silchar, Tirupati, Vadodara, Vijayawada, Visakhapatnam and Madurai.

The Minor Aerodromes (45) are: Akola, Balurghat, Bilaspur, Behala, Cooch-Behar, Cuddapah, Delhi, Hassan, Hadapsar, Jharsuguda, Juhu, Kanpur, Khandwa, Khowai, Kailashahar, Kamalpur, Kota, Kulu, Jhansi, Jogbani, Kolhapur, Donakonda, Lalitpur, Malda, Muzaffarpur, Mysore, Nadirgul, Panna, Palanpur (Deesa), Porbandar, Pantnagar, Passighat, Rajamundry, Raxaul, Rupsi, Satna, Shella, Sholapur, Tanjore, Vellore, Warangal, Ramnad, Coimbatore, Dehradun and Ludhiana.

In addition there are many aerodromes controlled, owned and maintained by Ministry of Defence, State Governments, Public undertakings, private individuals and bodies.

AIR-INDIA: Headquarters: Air-India Bldg., Nariman Point, Bombay 400021. Has online and offline sales offices and representations all over the world.

Starting with just one weekly service to London in June 1948, Air-India now operates extensive scheduled passenger and cargo services from Bombay and five other Indian cities—Calcutta, Delhi, Madras, Trivandrum and Amritsar to Africa (Addis Ababa, Nairobi, Accra, Lagos, Seychelles, Mauritius, Dar-es-Salaam, Lusaka and Harare); to U.S.A. (New York); to Canada (Montreal); to Europe (London, Birmingham, Paris, Amsterdam, Frankfurt, Geneva, Rome, Zurich, Brussels and Moscow); to West Asia (Doha, Abu Dhabi, Dhahran, Dubai, Bahrain, Kuwait, Aden, Muscat, Jeddah, Ras-al-Khayam, Sharjah and Sanaa) and to East Asia (Dacca, Bangkok, Hong Kong, Tokyo, Osaka, Kuala Lumpur, Singapore, Perth and Sydney).

Fleet: Air-India today has ten Boeing 747s, five Boeing 707s and three Airbus A300s.

Board of Directors: Capt. Dhruva Bose, *Chairman-cum-Managing Director;* Air Chief Marshal Dilbagh Singh, M. M. Kohli, G. N. Mehra, Miss Prem Lal, R. P. Billimoria, Capt. A. M. Kapur, Capt. K. Chadha, C. L. Sharma, Capt. D. Bose, J. R. D. Tata. and Natwar Singh.

Management: Capt. Dhruva Bose, *Chairman-cum-Managing Director;* C. L. Sharma, *Dy. Managing Director;* Capt. D. Bose, *Dy. Managing Director;* J. N. Mogrelia, *Director of Finance;* H. M. Kaul, *Commercial Director;* Capt. C. P. Narayanan, *Director of Operations;* S. K. Nanda, *Director, Manpower Planning & Special Services;* H. C. Kapoor, *Director, Engineering;* P. Jayant, *Dy. Director, Management Services;* P. D. Marathe, *Controller of Stores & Purchases;* G. D. Dubey, *Controller, Communications;* S. K. Datta, *Dy. Director, Planning;* V. R. Subnavis, M. P. Patkar, *Controller, Civil Works & Properties;* and J. J. Naegamvala *Dy. Director, Inflight Service.*

Subsidiary Companies: The Hotel Corporation of India and Air-India Charters Limited.

The 288-room Centaur Hotel at Bombay Airport is the first 5-star hotel built by the Hotel Corporation of India Ltd., a wholly-owned subsidiary of Air-India. The second of the proposed chain was opened at Delhi Airport in November 1982. It has 416 rooms. The work has started on two other 5-star hotels, one on Juhu Beach, Bombay (396 rooms) and the other at Srinagar, Kashmir (281 rooms). The latter is part of a convention complex. In addition, two Japanese style hotels are to be constructed in collaboration with the Hokke Club of Japan at the famous Buddhist pilgrim centres of Rajgir in Bihar and Kushinagar in Uttar Pradesh. They will be named Centaur-Hokke Hotels.

Air-India set up on September 9, 1971 Air-India Charters Limited. This is a non-IATA charter company set up with a capital of Rs. 0.5 million.

INDIAN AIRLINES: (Head Office: Airlines House, 113, Gurdwara Rakab Ganj Rd., New Delhi 110001). The fleet as on June 30, 1982: 10 Airbus A300 B2, 25 Boeing 737, 8 Fokker Friendships F-27, 12 HS 748. The Airline's services extend over the entire sub-continent, including Nepal, Sri lanka, Afghanistan, Pakistan, Male and Bangla Desh. With operations to 70 stations, every 2.5 minutes one Indian Airlines plane is either taking off or landing at any of these airports. The operations of the Airlines have been divided into four regions: *Eastern Region:* Calcutta; *Western Region:* Bombay; *Northern Region:* Delhi; *Southern Region:* Madras.

Board of Directors: *Chairman:* R. P. Billimoria; *Directors:* Capt. Kamini Chadha, Dr. B. Venkataraman, Air Chief Marshal Dilbagh Singh, K. K. Srivastava, Miss P. Lal, Capt. A. M. Kapur, Capt. Dhruva Bose, Capt. N. M. Pereira.

Executive Heads: R. P. Billimoria, *Chairman;* Capt. K. Chadha, *Managing Director;* Capt. N. M. Pereira, *Deputy Managing Director;* S. Sen Gupta, *Director of Finance;* Capt. P. N. Reddy, *Director of Operations;* S. A. Rajagopal, *Commercial Director;* Dharam Vir, *Director of Engineering;* Capt. J. F. Ranji, *Director of Training (CTE);* R. K. Kanchan, *Controller of Stores & Purchases;* Capt. B. K. Bhasin, *Director, Flight Safety;* Ajit S. Gopal, *Public Relations Manager;* K. K. Sharma, *Controller, Ground Support;* Wg. Cdr. N. C. Bharma, AVSM, *Secretary.*

Regional Directors: Capt. R. A. Williams, Bombay (Western Region); Capt. R. K. Sen, Calcutta (Eastern Region); S. Sen, Delhi (Northern Region); Capt. V. K. Mehta, Madras (Southern Region).

Operations of Air India and Indian Airlines

The following table about the operations by Air India and Indian Airlines will give an idea about the performance of the two national carriers during the years 1981 and 1982:

	1981	1982
1. Hours flown	161,874	163,909
2. Kilometres flown (000)	88,067	91,161
3. Passengers kilometres flown (000)	12,038,725	13,263,882
4. Passengers carried (000)	7,498	8,293
5. Cargo carried freights (Tonnes)	133,269	141,473
6. Mail " " "	20,395	20,482
Total " " "	153,664	161,955
7. Tonne Kms. preferred (000)		
(i) Passenger	1,051,246	1,148,157
(ii) Freight	427,719	432,363
(iii) Mail	37,332	36,811
Total	1,516,297	1,617,331
8. Capacity tonne Kms. available (000)	2,384,003	2,616,073
9. Revenue weight load factor (%)	63.6	61.8
10. **Average length of haul in Kms.**		
a) Passenger	1,606	1,599
b) Freight	3,209	3,056
c) Mail	1,830	1,797
11. **Operating Revenue (Rs. in thousands)**		
a) Passenger	6,945,379	8,455,957
b) Freight	1,484,371	1,716,012
c) Mail	182,118	194,105
Total	8,611,868	10,366.075
12. **Operating Revenue per Unit of service**		
a) Passenger Revenue per passenger (Kms.)	0.58	0.64
b) Freight Revenue per tonne (Kms.)	3,47	3.97
c) Mail Revenue per tonne (Kms.)	4.69	5.27

VAYUDOOT was launched on January 26, 1981 with an authorised capital of Rs. 250 million to provide airlinks initially to inaccessible areas in the North-Eastern Region and is jointly owned by the Indian Airlines and Air India on a 50:50 basis.

At present the company is operating the following major services: New Delhi-Ludhiana: Gangtok-Bagdogra; Jamshedpur-Ranchi-Patna-Muzzaffarpur; Hissar; Gauhati-Shillong-Silchar; Agartala-Kailashshahr-Agartala; Chabua-Tezu-Chabua; Calcutta-Jamshedpur-Rourkela-Ranchi-Patna, Delhi-Chandigarh-Kulu and Bombay-Kandla.

Chairman (Part-time): Capt. A. M. Kapur.

FLYING CLUBS: There are 25 subsidised flying clubs with their headquarters at Amritsar, Hyderabad, Gauhati, Banasthali, Patna, Bombay, Coimbatore, New Delhi, Bangalore, Vadodara, Lucknow; Hissar, Jamshedpur, Karnal, Trivandrum, Indore, Nagpur, Madras, Jullundur Gantt., Bhubaneshwar, Patiala, Jaipur, Behala (Calcutta), Raipur and Ludhiana.

During 1982, Government paid an amount of Rs. 2.03 million as subsidy to these clubs who logged a total of 14,184 hours for imparting training to trainees/members.

GLIDING CLUBS: Besides the Government centre at Pune there are 16 subsidised gliding clubs/gliding wings of flying clubs at Agra, Ahmedabad, Amritsar, Delhi, Deolali, Hissar, Jaipur Jullunder, Kanpur, Pilani, Raipur, Patiala, Patna, Hyderabad, Ludhiana and Pinjore.

The number of gliders registered up to December 1982 was 113 of which 31 hold current certificate of airworthiness.

RESEARCH & DEVELOPMENT DIRECTORATE

Principal functions: *(i)* Airworthiness engineering including type-certification of civil aircraft and aeronautical equipment; approval of modifications to civil aircraft, etc. *(ii)* Research, evaluation and development, including investigations on operational problems like aircraft noise, atmospheric turbulence, evaluation of performance and economics of civil transport and other aircraft, etc, *(iii)* Prototype development, including design and development of prototype light aircraft gliders, sailplanes, winches, etc. *(iv)* Airworthiness engineering training.

AIRCRAFT DEVELOPMENT: An engine mount for reengining of the PUSHPAK aircraft has been developed and fabricated. Due to shortage of spares of the existing engine being used on this aircraft it has become necessary tc carry out this modification for full utilisation of the existing fleet of PUSHPAK aircraft being used by flying clubs and other operators in the country.

Glider Development: As on December 31, 1982, the design, development and construction of prototype powered glider RG-1 was in an advanced stage and was expected to be completed and test-flown shortly.

Winch Development: The fabrication of the second prototype of a diesel engine powered winch is in progress. A set of design drawings for Dhanush-I diesel engine was prepared.

Aircraft Registration: At the end of December 1982, 688 aircraft held current certificates of registration and 293 aircraft held current certificates of airworthiness.

Navigational and Communication Aids: As on December 31, 1982, the Aeronautical Communication Services were operating and maintaining 90 Aeronautical Communication stations, providing 256 acromobile channels in the aeronautical mobile service, 275 radio and landline circuits in the aeronautical fixed telecommunication network, 216 navigational channels and 9 ground-to-air voice broadcast channels in the Aeronautical Broadcast Service.

During the year 1981. Direct Speech Circuits were established between Madras-Colombo, Madras-Nagpur, Bombay-Cochin; Landline Teleprinter Circuits were established between Madras-Colombo Madras-Kuala Lumpur and an area Control Centre commissioned at Trivandrum.

Training Centres: The Civil Aviation Training Centre, Allahabad, comprising of an Aerodrome School and Communications School, is the principal training centre in the country, where basic training and refresher courses are conducted for departmental officers During the year 1982, 324 persons were trained in various categories.

Facilities exist for training of glider instructors and winch operators at the Government Glider Centre, Pune. Facilities are available at the Fire Services Training School at 229, N. Subash Rd., Calcutta, for training of departmental candidates for courses in "crash and fire rescue". Facilities for training foreign national are also available at Allahabad and other centres under various aid schemes.

The establishment of a Civil Flying Academy is under consideration of the Government.

Accidents: During the period January 1, to December 31, 1982, there were 25 nofifiable accidents in India. Three of the accidents proved fatal resulting in the death of 6 crew members and 15 passengers.

Air Transport Agreements: Agreements have been concluded with Afghanistan, Australia, Bahrain, Bangladesh, Belgium, Burma, Canada, Czechoslovakia, Egypt, Ethiopia, Federal Republic of Germany, Fiji, France, Ghana, Hungary, Indonesia, Iraq, Iran, Italy, Japan, Kenya, Kuwait, Lebanon, Malaysia, Mauritius, Republic of Maldives, Nepal, Netherlands, Nigeria, Poland, Pakistan, Philippines, Qatar, Saudi Arabia, Seychelles, Singapore, Sri Lanka, Sweden, Switzerland, Syria, Thailand, U.K., U.S.A., U.S.S.R., Yemen People's Democratic Republic, Zambia, Tanzania, North Yemen, Oman and U.A.E.

Civil Aviation Security: Two bills, namely the Anti-hijacking Bill and the Suppression of Unlawful Acts against safety of Civil Aviation, were passed by Parliament and received the President's assent on November 6, 1982. These bills have come into force on November 15, 1982.

PORTS

A PORT being the gateway to a country's commerce and prosperity, it facilitates the movement of passengers and cargo between the ship and shore through well-equipped and maintained docks, wharves, quays, berths and jetties. The Indian ports, scattered over a vast coastline, have played an important role in maritime trade. Even during the ancient civilization of the Monenjodaro period and through the Moghul period India was well-known for trade in spices, pepper, oils, silks, ivory, precious stones and other luxuries to far-off countries like Alexandria and Rome. History has recorded the many maritime struggles between the British, French, Dutch and the Portuguese for the supremacy of the Indian coastline with the eventual success of the East India Company.

As India stepped into the industrial age under British rule, Indian ports were fast modernised and the port capacity expanded. At the time of independence there were only four major ports: Bombay, Calcutta, Cochin and Madras. Today we have ten major busy ports bustling with passenger and cargo activities, both domestic and international. Additionally, there are 21 intermediate ports and 152 minor ports.

To meet its tight schedule, each major port is equipped with its own road, waterways and railway network connecting it to the sprawling hinterland. Berthing, bunking, watering facilities, dry docks (wherever possible) for servicing facilities besides transit sheds, warehouses, etc. are other development aspects necessary for the smooth functioning in every major port.

Builders' top choice

CHARMINAR Roofing Sheets

○ DURABLE
○ WEATHER-PROOF
○ FIRE-PROOF
○ ECONOMICAL

HYDERABAD ASBESTOS

CHARMINAR

A.C. Pressure Pipes

Well-known for their:

○ Leak-proof Hydrotite Couplings
○ Life-long durability
○ Higher flow capacity

- Immune to encrustation, tuberculation and bacterial corrosion.
- Higher strength for hydrostatic crush and flexural loads.
- Easy to cut and lay and inexpensive to install.
- Once installed needs no maintenance.
- Available in wide range of sizes from 80mm to 600mm diameters and in classes 5, 10, 15, 20 and 25

Charminar A.C. Pressure Pipes have been the natural choice of engineers for rural, urban and industrial water supply schemes.

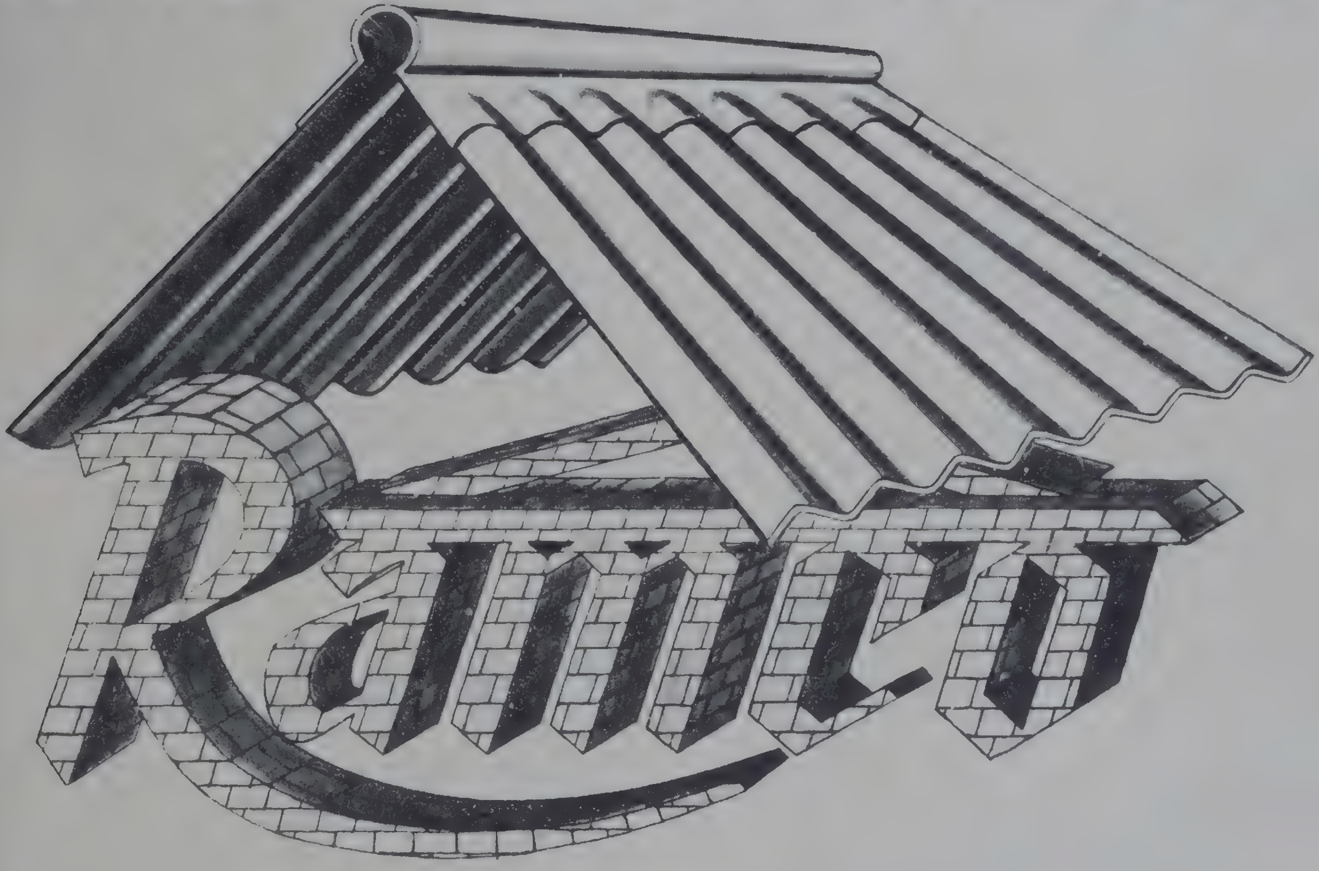
HYDERABAD ASBESTOS
CEMENT PRODUCTS LIMITED
Sanatnagar Hyderabad - 500 018.

ASP/HACP/833

Always use Charminar A.C. Pressure Pipes with Hydrotite Couplings !

What do you call a roof that's more than a roof?

THE TOP ROOF



Ramco

More than a roof-
permanent protection.

SOUTHERN ASBESTOS CEMENT LIMITED

Fenner Fit-and-Forget© V-belts

- Superior length stability means stretching is minimal, downtime reduced.
- Higher load-carrying capacity means fewer belts per drive.
- Unaffected by humidity; shrinkage is eliminated.
- Longer life for higher productivity and improved economy.

Another top reliability Fenner product. Heat-set, pre-stretched, polyester reinforced...Fenner Fit-and-Forget© V-belts enhance performance, eliminate fitment and adjustment problems. Just fit and tension the belts, then...relax !

Feel the embossed Fenner label

Fit-and-Forget Fenner V-belts . . . so long as you remember the name.

The next generation V-belts that make all other V-belts outdated.

High performance chains —Industrial and Automotive

ROLON

- Made of high grade imported steel
- Precision-made components
- Superior wear resistance
- Every link assembled and tested with care
- Automotive chains—manufactured in a wide range

Industrial chains—Available in sizes from 6 mm to 50.8 mm (2″) B.S. & A.S.

ROLON - Built to outlast and outperform

Dist. Valsad (W. Rly.), Gujarat (INDIA)

ARE YOU PLANNING A DISTILLERY PROJECT?

Here we are :

★ We offer you most economical, quality assured, performance guaranteed plant with complete design, fabrication, erection and commissioning of wholly indigenous power alcohol, rectified spirit, potable liquor and extra neutral spirit plants with most modern and sophisticated designs.

★ Specialists in fabrication of stainless steel, copper metal made plants and equipments for chemical, pharmaceutical, dairy and allied industries, manufactured according to clients designs or ASTM Codes or equivalent according to requirements.

★ Alco Cold Drawn Argon Arc welded stainless steel pipes, tubes and its fittings of any size and specifications.

★ E.R.W. Tubes.

★ Engineering services and general contractors. Established for over 40 years with reputation for excellent services.

★ Our services are at your disposal. Please drop in for a chat when you can see for yourselves what we can do for you or we shall call you on hearing from you.

★ The BIGGEST SINGLE UNIT of Rectified Spirit has been supplied by us.

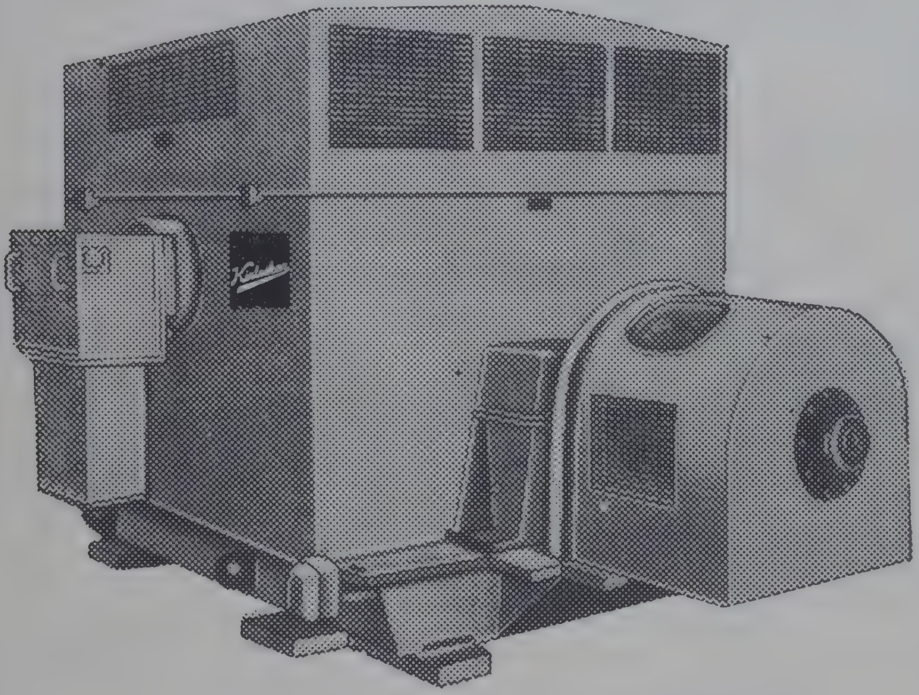
Kirloskar Electric now offers Higher Range AC Motors up to 3000 kW

in technical collaboration with NEI Parsons Peebles Ltd., U.K.



Kirloskar Electric presents a solution to all drive problems—Unit Type Standardised Paricon Range Induction Motors.

The Paricon Range of AC Motors are designed for arduous and demanding applications in core industries like Steel, Cement, Chemical, Fertilizer, Petro-Chemical, Refineries and Thermal Plants. Geared to operate efficiently in varied environmental conditions, these motors drive loads like Pumps, Compressors, Fans, Crushers, Conveyors, Ball Mills, etc.

KEC's engineering expertise and reputed after-sales service guarantee reliable performance.

Range: 100 to 3000 kW
375 to 3000 rpm
415, 3300, 6600, 11000 Volts.

Squirrel Cage Motors
Slip-ring Motors
Industrial or fully certified Motors with Type of protection Ex 'e' or Ex 'n'.

Converting energy to serve the millions

Fluoro Craft

the other name for luminaires

"Fluorocraft" has 30 years experience in making a complete range of quality luminaires

The range includes luminaires for Incandescent, Fluorescent, HPMV, HPSV (SON), LPSV (SOX) and Metal Halide lamps. In short, we have a luminaire for every lighting need and budget.

We have a fully equipped R & D department to design and develop the most sophisticated luminaires.

Our Lighting Advisory Service (LAS) is at your disposal to plan the energy effective and economic illumination design without any obligation.

Leading public & private sector organisations, government bodies, municipalities, business organisations etc. have availed our services, why not you?

CDIL

Continental Device India Limited

Leading Manufacturers of :

- ★ **SILICON SEMICONDUCTOR DEVICES** — Transistors, Diodes, Zener Diodes, Power Transistors, Rectifiers & Bridge, Integrated Circuits, Chips for Hybrids.
- ★ **RELAYS** — Reed Relays, Reed Switches, Mercury Wetted Relays/Switches, Solid State Relays, Proximity Switches.
- ★ **AUTOMOTIVE PRODUCTS** — Electronic Flasher Modules, Ignition Switches, Voltage Regulators, Battery Level Indicators.
- ★ **INSTRUMENTATION** — Specialised Timing Systems, Digital Sequence & Programmable Controllers, Temperature Scanners & Alarm, R-C and Digital Timers, Semiconductor Test equipment.
- ★ **MODULAR PRODUCTS** — Chopper Amplifiers, Modular Power Supplies, Solid State Relays, Microprocessor Based Systems, Inverters, Execution of numerous custom made modules and equipment for specialised applications.
- ★ **CLEAN AIR EQUIPMENT** — Laminar Flow Benches, Clean Room Air Showers, and Turn-key Clean Room Projects.

Services offered

- ★ Turn-key know-how for semiconductors, electronic components and consumer products.
- ★ Design & Development services for special semiconductors, electronic circuit & sub-assemblies and special purpose equipment.
- ★ Marketing products in the domestic and export markets.
- ★ Sub-assembly and fabrication work undertaken for large-scale modules and sub-assemblies.

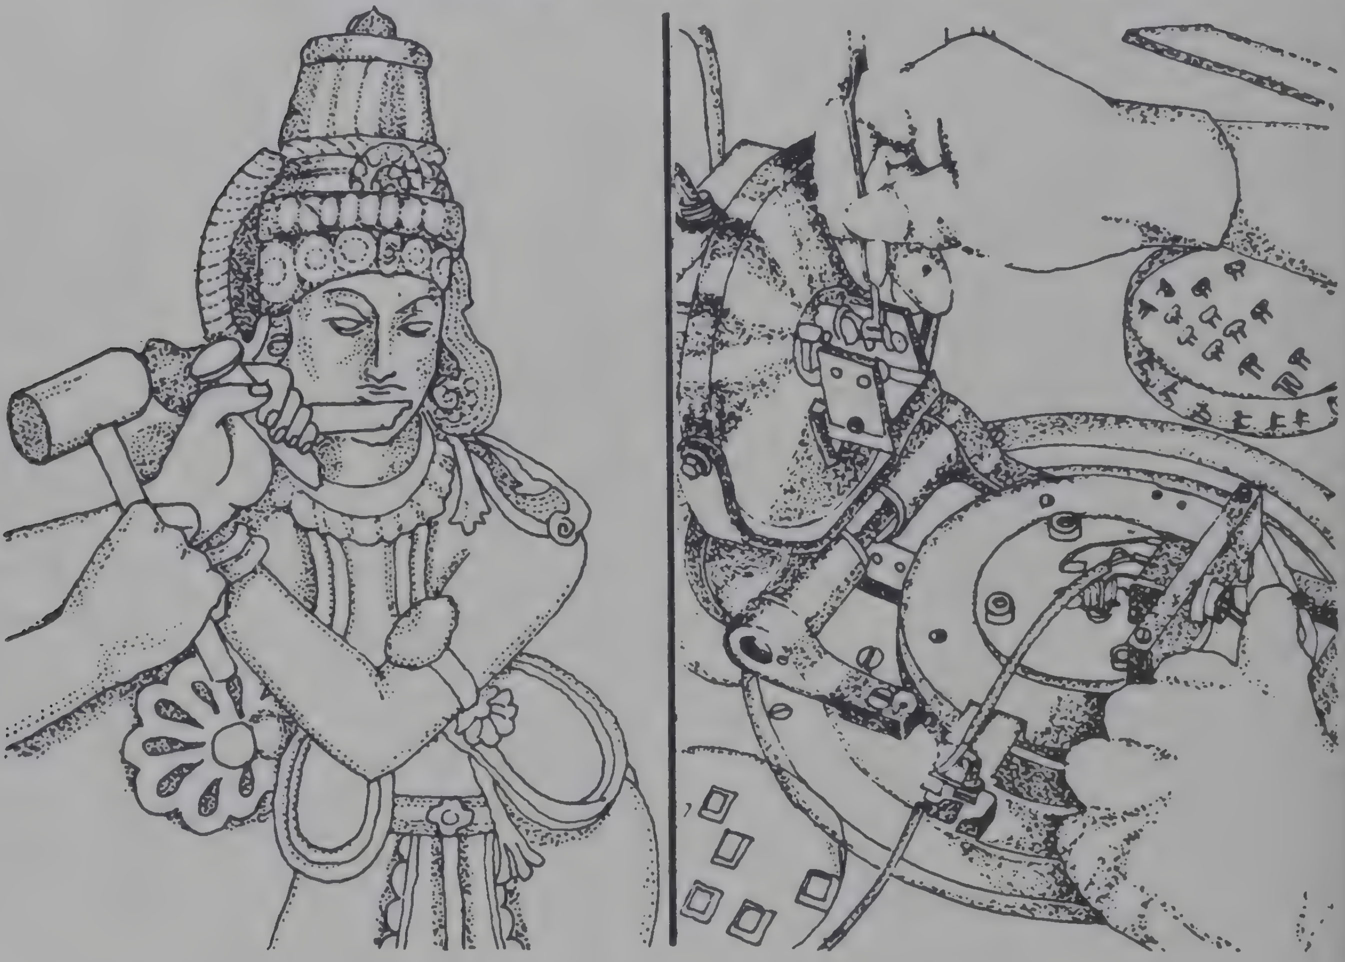
Skilled hands
keeping yesterday's traditions alive,
shaping tomorrow's
technological innovations.



India. Land of rich traditions and varied cultures. Preserved through the years. By hands, skilled and dexterous. India. A unique blend of art and science in the twentieth century. Poised for mammoth technological breakthroughs in the future. BEL has played a vital role in this progressive amphitheatre. Manufacturing radars, communication equipment, transmitters, studio equipment. And vital components like ICs, Transistors, Valves and Tubes.

Taking the Indian culture to millions through Radio and T.V. where its involvement is in studio, transmitter and receiving set.

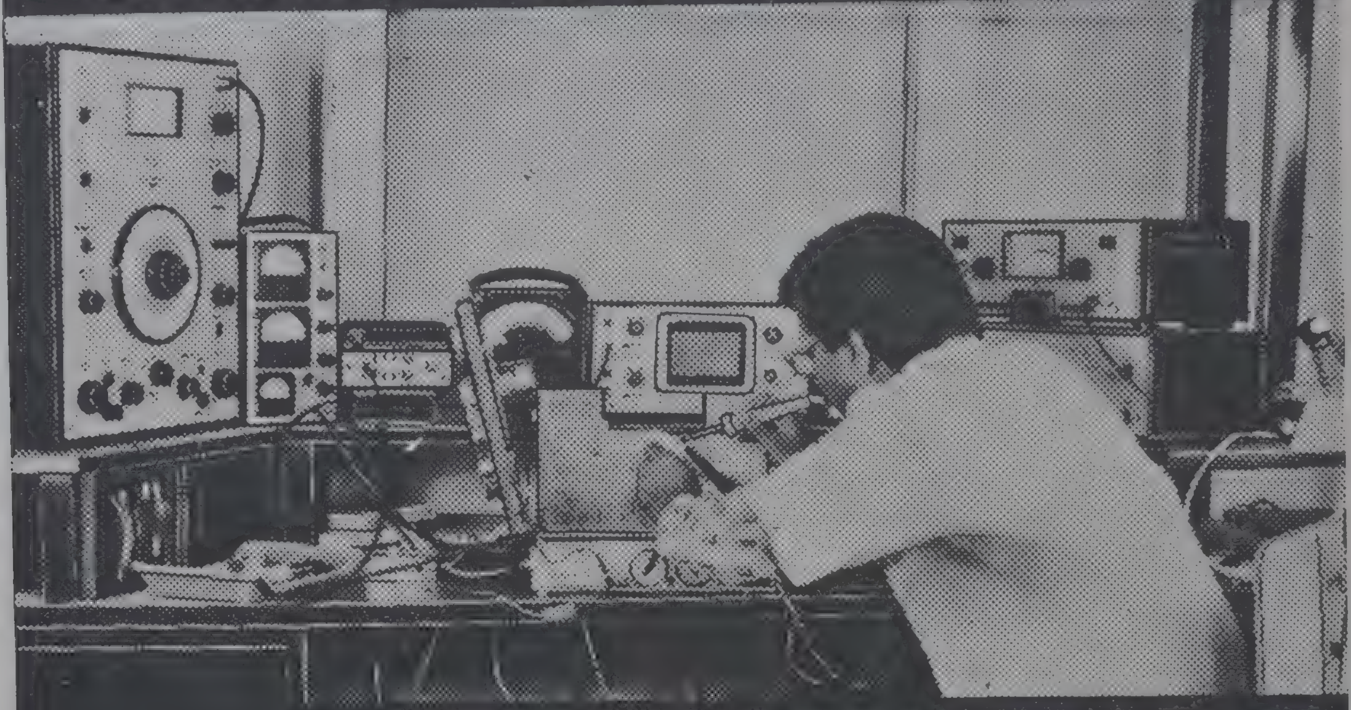
Every day in every way Meltron plays a more and more important role in people's lives...



TOMORROW BELONGS TO US!

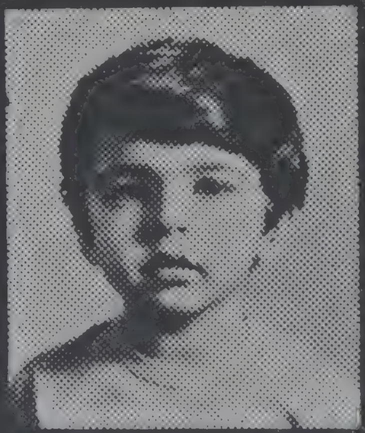
Electronics has penetrated almost every walk of modern life. And Meltron, one of India's leading organisations manufacturing and marketing a wide spectrum of electronics products, is right in the forefront.

Meltron manufactures advanced semi-conductor power devices and broadcast communication systems. It markets a wide range of electronics products and components, which play a vital role in various important industries.

With its tremendous marketing infrastructure, Meltron reaches out to support many small scale units and makes sure it brings the social benefits of electronics to every corner of Maharashtra, every area of the country.

But Meltron is not content to rest on its laurels. Two new projects are being planned—the radio communication systems and the electronic PABX systems—which will go a long way in helping Meltron establish its aim of a total communication culture.

Yes, electronics is making today's science and industry progress with giant leaps. And Meltron is racing ahead—planning for a better tomorrow.



MELTRON

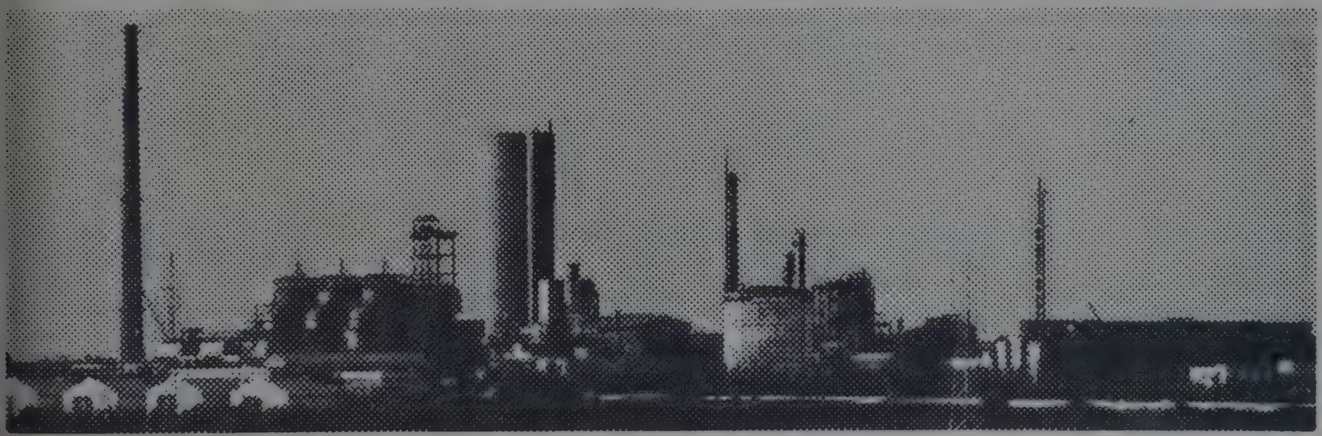
GUJARAT NARMADA-The world's largest single stream Ammonia-Urea plant is also

the country's most unique Fertilizer plant



It has dramatically changed the industrial skyline in Gujarat. Promoted by the Government of Gujarat and Gujarat State Fertilizers Company, Gujarat Narmada; with its 4.60 lakh shareholders, is Asia's largest company in respect of public shareholding. 1.30 lakh investors are farmers and their co-operatives.

World renowned experts: Linde of West Germany, Texaco of USA, Haldor Topsoe of Denmark, BASF of West Germany and Snamprogetti of Italy have participated in its making: Based on a zero pollution concept, its electrostatic precipitators eliminate fly ash discharge, and a high stack of 125 metres, 1½ times taller than Qutab Minar, ensures highest dispersion factor of pollutants, if any.

Going on stream in December, 1981 and into commercial production in July, 1982, the plant has a massive production capacity of 1350 tonnes of Ammonia and 1800 tonnes of Urea per day. This goes to the farm sector in Gujarat, Rajasthan, Madhya Pradesh, Punjab, Haryana and Uttar Pradesh. It helps in increasing food grain production by 28 lakh tonnes with an added income of Rs. 35 crores to the farmers.

Gujarat Narmada is already marketing its by product Liquid Nitrogen, Pure Sulphur recovered in its pollution control process, and surplus Ammonia, to industrial users. This results in a large saving of foreign exchange.

Gujarat Narmada plans ahead of today's needs, and many more projects are on the anvil.

Gujarat Narmada—a growth nucleus for the country.

That certain feeling

Every time you open a box of Whatman filter papers you have that renewed certainty.
An assurance of ongoing consistency in filtration characteristics. Whatman maintains one fulltime quality control inspector for every two production staff.
Highest purity — always.

Technical back-up at your request, to match your latest techniques.
Experienced laboratory and research workers know that they have to be absolutely sure of filtration quality, consistency and reliability.
So they use Whatman filter papers. That's the certainty.

house of SICO

Makers of quality laboratory equipment

- **SICOSPEC**—100 Solid State, Direct Reading Spectrophotometer for the visible range.
- **SICOSPEC 200-G UV**—VIS Spectrophotometer
- **SICODIGISPEC-110** Solid State, Digital Spectrophotometer for the visible range.
- **SICO**—Double Cell Photoelectric Colorimefer
- **SICO** Electronic pH meter Model EM-3
- **SICO** Electronic Digital pH Meter Model EM-5
- **SICOFRAC** Automatic Fraction Collector. Designed primarily for collecting effluents from Chromatographic or Electrophoretic columns
- **SICOVAC** High Vacuum Pumps—Single and Double stage rotary oil-sealed pumps
- **SICO** Compressovac—Lubricated Compressor-Cum-Vacuum Pump
- **SICO** Multivac Non-lubricated Air Sampling pump (Suction pump) for low vacuum and low pressure applications
- **SICO** Vacuum Systems-for Degassing, Plotting, Impregnation, Encapsulation of Electric motors, Transformers, Capacitors and Modules
- **SICO** Lyophilab-80 (Lyophiliser). A laboratory Freeze Drying Equipment
- **SICO** High volume Sampler. Used for measurement of mass concentration of suspended particles in Ambient Air
- **SICO** B.O.D. Incubator, A low temperature Incubator having a working range of 5°C to 50°C
- **SICO** Humidity Cabinet. Intended for all tests where both temperature and humidity are to be controlled upto 50°C and 95% relative humidity
- **SICO** Dissolved Oxygen & Temperature Meter.
- **SICO** Auto Cane Feed Controller.
- **SICO** Popular Single pan Balance.

SICO MICROWAVE COMPONENTS & EQUIPMENT

* J,K,Ku, S and X-Band Microwave Components
* Gunn Oscillators.
* Pin Modulators
* Gunn Oscillator & Pin Modulator Power Supplies
* Universal & Low Voltage Klystron Power Supplies
* Solid State & Valve type VSWR Meters

Spearheading the thrust in development of traditional leather industry in U.P.

U.P. State Leather Development & Marketing Corporation Ltd., a state Govt. owned organisation is involved in the manufacturing of shoes and leather accessories using high quality leather and advanced technology.

The Corporation also provides manufacturing facilities to the artisans and weaker section by way of training, providing raw material and other related facilities at various Common Facility Centres being run in different towns of Uttar Pradesh. With the back up of 15 retail outlets all over the state, the Corporation is keeping pace with the ever growing demand for leather products.

The U.P. State Leather Development & Marketing Corporation Ltd.,
(A U.P. Govt. Undertaking)
16/7, Sadar Bhatti Crossing,

CENTRIFUGAL CASTING MACHINES

VERTICAL & HORIZONTAL TYPE

for ferrous and non-ferrous metals

Manufactured by

THE CENTRIFUGAL CASTING MACHINE CO. INC., U.S.A.

for production of centrifugally cast

HYDRAULIC CYLINDERS
STEEL MILL ROLLS
GRINDING ROLLERS
BI-METAL ROLLERS
CI & STEEL PIPES
SPUN PIPES
REFORMER TUBES
HOLLOW SHAFTS
AUTOMOBILE PARTS & SPARES
INVESTMENT CASTINGS
PERMANENT DIE CAST MOULDS

and many other foundry-cast components.

The impelling reasons behind nation-wide acceptance of chemflo® pumps

-by process industries

The Impeller is just one of the highlights of the outstanding features of Chemflo Pumps. Its unique design of smoothly contoured inlet passages reduces turbulence and provides exceptionally high efficiency. Statically and dynamically-balanced, it allows operation over a wide range of suction pressures.

There are, of course, other features too, equally outstanding, which impel the widespread acceptance of Chemflo Pumps—throughout the length and breadth of India. Why not write to us, so that we may tell you all about them?

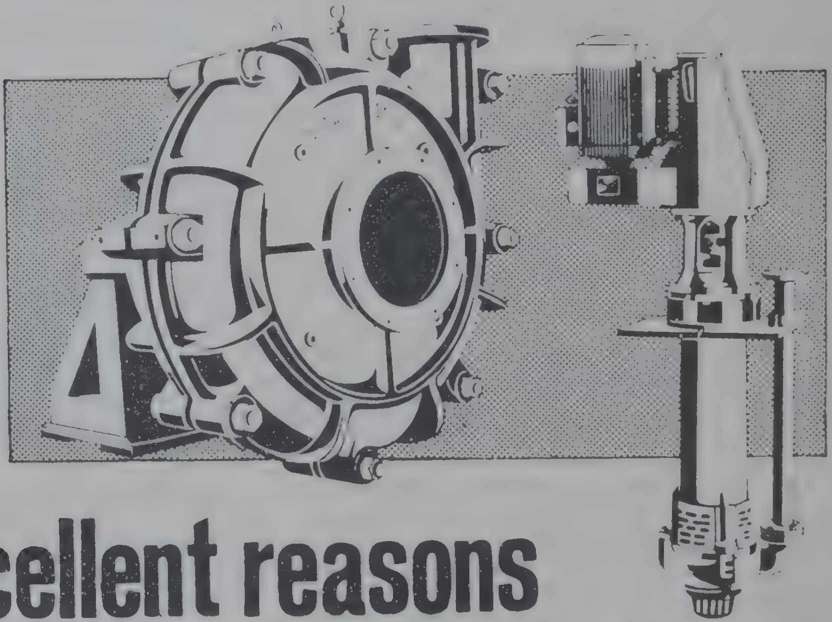
WORLD'S No.1 CHOICE* of solids handling Centrifugal Pumps



Some excellent reasons why Warman Pumps are chosen

■ Low operating costs ■ Interchangeable liners and impellers ■ High resistance to abrasion ■ Higher heads ■ Minimum down time ■ Maximum efficiency ■ Greater capacities ■ Longer working life

aki-wp-102 R C Advt

A single purpose unifies this vast and diverse array of products. A commitment to better your life.

Products Produced:
Hydraulics

Pumps: Vertical Turbine * Horizontal Non-clog & Vertical Non-clog * Vertical Mixed-flow, Axial-flow and Radial-flow * Vertical Propeller * Horizontal Mixed-flow End-suction * Unibuilt (Monobloc) * Coolant * Horizontal Split-casing Wilfley Sand & Slurry * Olivite Rubber-lined * Special-lubricating oil and Moderator * Vertical Condensate * Jet * Dredger * Gravel * Horizontal Chemical and Process * Circulating Water * Horizontal Self-priming.

Hydro-electric Generating Sets: Propeller and Tubular Turbine * Francis Turbine * Turgo-Impulse and Pelton Turbines.

Butterfly Valves and Actuators.

Electricals

Motors: Horizontal H.T. & L.T.—High and Low Tension (Squirrel Cage and Slip-ring) * Vertical H.T. & L.T.—High and Low Tension (hollow shaft and solid shaft) * Centrifuge * Special-purpose Textile—Loom & Card and Ring-Frame * D.C. Motors & D.C. Generators.

Generators: Self-regulated and self-excited type * Brushless * Synchronous * Diesel Generating Sets

Regulators: Induction * Automatic-voltage for Generators

Converters: Frequency * Arno Static/Solid State Excitation Systems

Switchboards & Switch Gears

Motor Starters: Full Voltage—Oil immersed Direct-on-line and Air-break Direct-on-line * Reduced Voltage—(Oil-immersed Automatic Star/Delta, Air-break Automatic Star/Delta, Manually-operated Air-break Star/Delta, Manually-operated Oil-immersed Auto-transformer, Automatically-operated Oil-immersed Auto-transformer)

Control Panels: For Auto-transformer *Textile Motor (Ring-Frame and Card)

Circuit Breakers: L.T. Air * High Tension Low Oil-content * Extra High Tension.

Vacuum Contactors: High Tension

Transformers: H.T. Instrument—Indoor and Outdoor

Switches: Cam Type * Pole changing

Switchboards: L.T. & H.T.—draw-out type.

Relays & Control Panels

Relays (Protective): Static Inverse Definite Minimum Time Over Current & Earth Fault * Electro Mechanical Single Pole Inverse Definite Minimum Time Over Current & Earth Fault Type RSA * Instantaneous Over Current and Earth Fault Type PA * Instantaneous Undervoltage & Overvoltage Type PV * Static Definite-Time Lag Over Current & Earth Fault Type SPAK * Static Definite Time Lag Undervoltage & Overvoltage Type SPVK * Static Motor Protection Type JSMP * Static Transformer Differential with Harmonic Restraint * Static Directional Inverse Definite Minimum Time Over Current & Earth Fault Type JPRSA * Static Distance.

Relays (Auxiliary): Voltage-operated Plug-in Type RE * Static Time Delay with delay on pick-up or drop off SRT * Annunciator Type AR * Storage Power packs for Tripping Type JDC * Trip SuperVision * Test Plug Boxes Type

Control Panels: Simplex/Duplex Type.

Agricultural Equipment

Wheat Thresher * Multi-crop Thresher * Paddy Thresher * Chaff Cutters Type 230 & 400 * Seed-cum-Fertiliser Drills * Milking Machines—Single & Duplex * Mango-stone-decorticators * Drip Irrigation Systems * Garden Tools.

Renewable Sources Energy Systems

Solar Hot Water—Industrial & Domestic * Solar Hot Air * Solar Desalination * Solar Low Pressure Steam Generation * Wind Energy Conversion * Acqua Ammonia Vapour Absorption Systems for Waste Heat Recovery * Solar Thermal Power Generation * Wood-fired boilers-cum-steam engine * Wood gasifiers-cum-dual fuel engine.

Laser Systems

Alignment Systems—Water-proof and Flame-proof * Industrial—CO_2 and Nd: YAG

Instrumentation

Single and Multi-point Temperature Indicators and Temperature Scanners * Loggers * Circuit Breaker Testing Panels * Supervisory Control Panels * Power Factor Meters * Digital Test & Measuring Instruments * Texas Instruments

Ceramic Products

Arc Chute * Ceramic Tumbling & Debarring media * Chemical Porcelain * Electro Porcelain * Refractories * Stainer Cores & Combustion Boats * Textile Guides * Tower Packings.

Nima Fans

Oscillating Table Fans * Cabin Fans—Gyroscopic Cabin & Non-oscillating * Wall Mounting Fans * Pedestal Fans * Exhaust Fans.

CREATE SPACE WITHIN A SPACE!

Crescent

SLOTTED ANGLES

Crescent Slotted Angles solve the problem by "creating" more spacious space in narrow, nooks and corners of Factories, Godowns, Shops, Offices, etc., with the greatest economy and ease.

You can make:

*** SHELVES * RACKS * LOFTS * PLATFORMS * LADDERS * PARTITIONS * TABLES * COUNTERS**

+ Can be fixed easily, quickly
+ Strong and durable
+ Elegant in looks — yet inexpensive
+ Supreme quality: Excellent service
+ Can be re-set to suit your future needs

CRESCENT METAL PRESSING WORKS

Seven Pillars of Steel

A fascinating product panorama

Steel is the pivot of industry and agriculture, the two prime movers of economy. And SAIL, through its plants at Bhilai Bokaro, Rourkela, Durgapur, Burnpur and two special steel plants at Durgapur and Salem, produces a wide range of products.

SAIL's product panorama:

Pig Iron–Basic and Foundry Grades.

Carbon Steels—Semis–blooms; billets squares; slabs.

Shaped Products–Bars; rods and structurals; wire rods in coils; ribbed torsteel.

Flat Products–Heavy and medium plates; hot and cold rolled coils sheets; electrolytic tinplates, galvanized plain and corrugated sheets; electrical steel sheets; skelps.

Special Products–Heavy and light rails, wheels and axles; fish plates; chequered plates; sleepers; ERW and Spiral Weld pipes (large diameter); Spun pipes; Cast iron pipes; varieties of iron, steel and non-ferrous castings.

Coal Chemicals–Tar, Benzol Creosote oil, Benzene, Toluene etc.

Alloy Steels–Rolled forged bars and Billets; Stainless steel sheets and plates.

Fertilizers–Two nitrogenous fertilizers SONA (Calcium Ammonium Nitrate) and RAJA (Ammonium sulphate)

PROGRESS THROUGH
PANTOGRAPH

SMEVS BRAND —

- ★ **THREE Dimensional Pantograph Milling Machine—Model SEW-21.**
  For manufacturing Dies, Moulds, Metal Patterns and shallow & deep engraving.
- ★ **Single Lip Cutter Grinder—Model OM**
  A vital accessory for grinding cutters and stylus.
- ★ **Two Dimensional Pantograph Engraving Machine—Model SILPA ST2.**
  For all types of engraving—engineering, plastic, Rubber, Electronic, etc.
- ★ **Multispindle Profile Milling Machine—Model COPMILL-79.**
- ★ **Circular Saw Sharpening Machine—Model SEW-12.**
  For re-sharpening circular saw cutters upto 710 mm ϕ.

Bye bye stoneage

we are in the space

The winding dust track of evolution was long one to tread. So indeed is the evolution of any product, any industry. Moulded luggage is now being zoomed forward by Ambassador Luggage Industries in fibre glass, the same stuff which goes today into the making of the space crafts of tomorrow.

G. P. O. Box No. 1793, Bombay 400 001.
65, Sonawala Bldg., 2nd Floor, Apollo Street, Fort,
BOMBAY 400 023.

WELDING ACCESSORIES & SAFETY EQUIPMENT

MODERN WELDING MACHINES :

All types of WELDING Transformers, SPOT Welder, ARGON-ARC UNIT (TIG) RECTIFIERS, GENERATOR, PROFILE CUTTING MACHINE.

ARC WELDING ACCESSORIES :

SUPERFLEXO Superior Quality WELDING CABLE, Electrode Holder, Earthing Clamp, Earthing Cable, Fibre Hand Screen & Helmets, Arc Welding Goggles, Chipping Hammer, Lugs (Sockets), imported WELDING GLASSES. Also we are undertaking Guaranteed Repairing Job of Welding Machine, Cutting Torch & Regulators.

GAS WELDING ACCESSORIES :

OXYGEN Regulator, ACETYLENE Regulator, ARGON, Chlorine, Nitrogen, Medical Regulators, BLACK & RED Hose Pipe for Welding & Cutting, Hose Clips as per ISI, Cylinder Trolley, Cylinder Opening & Closing Key, Spark Lighter, Steel Wire Brush, Stainless Steel Brushes, Circular Steel Wire Brush, Hose Pipe Connection, Regulator Nut, Hose Protector & all types of Parts for Regulator & Cutters.

SPECIAL ELECTRODES & GAS WELDING RODS :

Cast Iron Electrodes, Stainless Steel, Hard Facing, High Manganese Steel, Bronze, Copper, Brass Brazing Rods, Copper (Pure), Copper Coated Mild Steel, Cast Iron Super Silicon, Aluminium (Pure), Aluminium 5% & 10% Silicon, Stainless Steel for ARGON ARC WELDING.

SAFETY EQUIPMENT & PROTECTIVE CLOTHING :

Various types of Hand Gloves, Aprons, Sleeves, Leg-guard (Asbestos, Chrome, Sheepskin, Canvas, Rubber), Hood, Boot, Suit, Jacket, Face Mask, P. V. C. (Oil, Acid & Alkali Proof) Suits, DUST & GAS MASK, Respirator, Safety Goggles, Safety Belts, Shock-proof Hand Gloves upto 25,000 Volts, Shock-proof Mattings, INDUSTRIAL HEAVY DUTY GUMBOOTS, Safety Shoes, P. V. C. Fibre, Fibre Glass & Aluminium Helmets & First Aid Box.

P. V. C. WELDING TORCH & RODS :

P. V. C. Welding Torch complete in Box, High Density Polythene Welding Rods, Polypropylene Welding Rods, Rigid P. V. C. Rods, P. V. C. Cements, P. V. C. Welding & Leaking Tester, SPARE HEATING & PORCELAIN ELEMENTS for P. V. C. Welding Torch.

Berco Welding & Electrical Pvt. Ltd., G.T. Rd., Bye-Pass, Jullundur 144004.

KANUBHAI ENGINEERS LTD.

offer a wide range of equipment.

IMPORTED EQUIPMENT

1. SKL Diesel Generating Sets 500 KVA to 3125 KVA—more than 550 sets operating in India.
2. Heavy Duty Reciprocating Compressors and Pumping Sets upto 1,00,000 M^3/Hr and 400 Kg/cm^2.
3. High and Extra High Voltage Testing and Measuring Equipment for AC testing upto 5000 KVA.
4. Process Equipment for Semi-Conductor and Electronic Industries, including Chemical Vapour Deposition Plants, Wire & Die Bonders, Mask Alignment, PCB Drilling Machines, Planar-Plasmatrons, Diffusion Plants, Automatic Wafer Probers, Automatic Assembling Plant for Dry Read Contacts.
5. High and Medium Frequency Induction Heating Plants for Melting, Hardening, Billet Heating, Annealing etc.
6. Electron Beam Melting Furnaces 60 to 1200 KW for High Temperature Melting of Rare Metals and Alloys under High Vacuum.
7. Light and Heavy Duty Multi-Torch Profile Cutting Machines—with optical and CNC controls.
8. Special purpose automatic Welding Plants for Tube to Tube sheets, for Gas cylinders, Bicycle and Moped Frames, Rear Axles, Silencers, Longitudinal plate welding, Pipe profiling etc.
9. Plasma Cutting machines capacity upto 140 mm thickness.

INDIGENOUS EQUIPMENT

1. KEARC Welding Equipment including Single and Multioperated Welding Transformers, Rectifiers, Single and Multi-Characteristic CO_2/MIG Welding Equipment, Argon Arc and TIG Welding Equipment, Submerged Arc Automatic Welding Machines, Spot Welders, Wire Butt Welders and special purpose Welding Plants.
2. Low Tension Control Panels including Power Control Centres, Changeover Panels, Double Busbar Systems, Mimic Panels, Relay and Capacitor Control Panels, Bus Ducts etc.
3. Material Handling Equipment including Chain and Wire Rope Type Electric Hoists, Jib Cranes, EOT and MOT cranes, Pulling and Lifting Machines and Chain Pulley Blocks and Drum Type Electric winches.
4. High Power Reduction Gear units in different ratios and sizes.

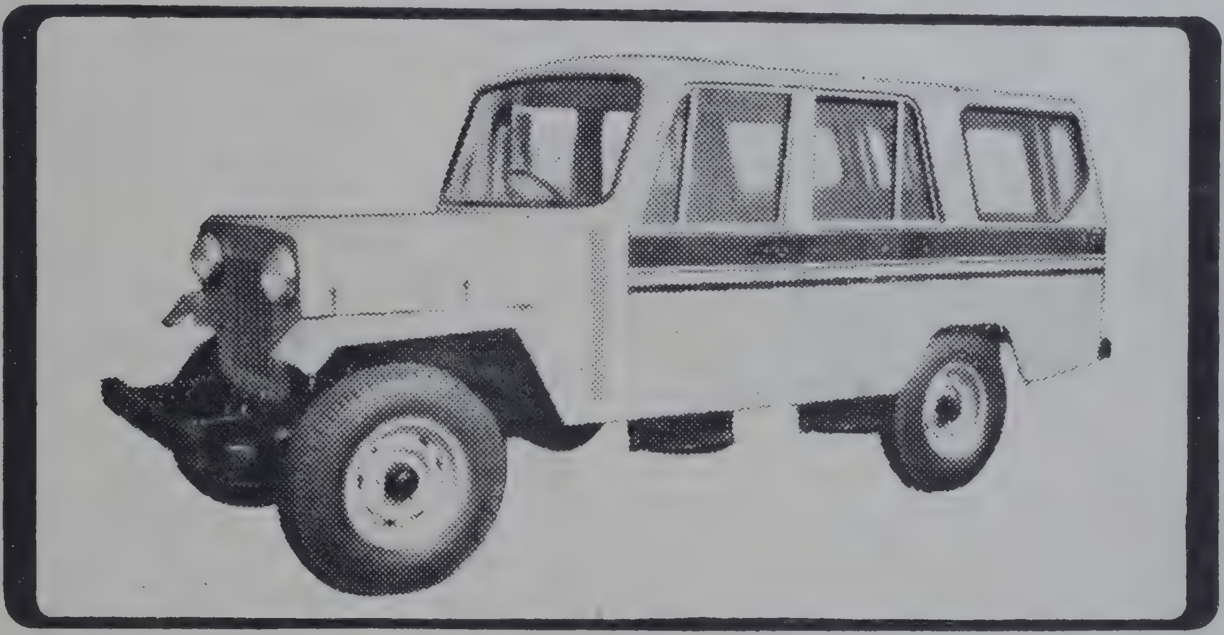
NOW ON DISPLAY IN OUR SHOWROOM



SPECIFICATIONS OF THE XDP 4.90 PEUGEOT ENGINE ONE OF THE BEST KNOWN DIESEL ENGINES IN THE WORLD

Bore	90 mms
Stroke	83 mms
Cubic Displacement	2112 cc
Horse Power R. A. C. Rating	20
Max. Developed horse power	75 at 4500 rmp
Compression Ratio	22.1:1
Weight of the engine	184 kgs

Please visit us for a free demonstration

ADVANTAGES

Specially designed for low vibration

Improved acceleration and higher top speed well in excess of other Diesel Engines manufactured in the country.

Over square engine concept gives longer engine life for higher compression ratio and lower engine weight giving fuel economy.

BODY HIGHLIGHTS

Aesthetically satisfying body design with reduced wind resistance.

Single piece curved windshield for better visibility and no image distortion on peripheral sides.

Specially engineered locks to facilitate closing of doors and to ensure rattle-free operation.

Optional extras such as tinted glasses, Thermocole insulation under roof lining, special upholstery with bamboo type seats, air conditioner, stereo equipment etc.
